Strategic Consequences of Nuclear Proliferation in South Asia Neil Joeck, 2025-04-01 Strategic Consequences of Nuclear Proliferation in South Asia 1986 examines the consequences for particular states should India and Pakistan decide to deploy nuclear weapons It looks in detail at the positions of both India and Pakistan and the responses of the United States the Soviet Union and China and their respective strategic positions This book includes contributions on the larger question of how nuclear pariah states pose a separate problem of nuclear proliferation as well as on the broader challenges to the nuclear non proliferation regime      Special Issue on Strategic Consequences of Nuclear Proliferation in South Asia Neil Joeck, 1985      **Nuclear Weapons Proliferation in the Indian Subcontinent** Ziba Moshaver, 1991-06-18 There is concern about the proliferation of nuclear arms in the sub continent This book examines what influences arms policies there and argues that although both India and Pakistan are determined to retain their nuclear option both would welcome a situation which allowed them to de militarize      *Strategic Dynamics and Nuclear Weapons Proliferation in South Asia* Bhumitra Chakma, 2004 This book analyses India and Pakistan s decision to go nuclear against the odds of Nuclear Non Proliferation Treaty based nuclear order It reflects upon the key factors that contributed to and the process that prompted India and Pakistan s nuclear programmes to take a military orientation which eventually culminated in the May 1998 nuclear tests It also explains the motivation which underscored both India and Pakistan s determination to advance nuclear postures in 1998 that appeared to be inconsistent with the post Cold War global strategic environment Further this book explains why international and regional nuclear non proliferation regimes were ineffective in preventing India and Pakistan from going nuclear      Nuclear Proliferation in South Asia Sumit Ganguly, S. Paul Kapur, 2008-08-06 This edited volume explores competing perspectives on the impact of nuclear weapons proliferation on the South Asian security environment The spread of nuclear weapons is one of the world s foremost security concerns The effect of nuclear weapons on the behaviour of newly nuclear states and the potential for future international crises are of particular concern As a region of burgeoning economic and political importance South Asia offers a crucial test of proliferation s effects on the crisis behaviour of newly nuclear states This volume creates a dialogue between scholars who believe that nuclear weapons have stabilized the subcontinent and those who believe that nuclear weapons have made South Asia more conflict prone It does so by pairing competing analyses of four major regional crises the 1987 Brasstacks crisis the Indo Pakistani crisis of 1990 the 1999 Kargil war which occurred after the nuclear tests and the 2001 2 Indo Pakistani militarized standoff In addition the volume explores the implications of the South Asian nuclear experience for potential new nuclear states such as North Korea and Iran      *India's Nuclear Development Plans and Policies* Prashant Agarwal, 1996 An attempt to go into both the policy and programme aspects of Indias nuclear development and factors influencing them Examines of the various national choices of nuclear policies involving consideration of diverse and often mutually conflicting objectives It also analyses the growth and

development of institutional infrastructure for the development of nuclear energy in India and also deals in some details nuclear technology development for peaceful purposes and economics of nuclear technology for power production in the context of energy crisis Finally it analyses the responses of the successive Indian governments to various international pressures on nuclear issues An attempt is made to perceive the potentialities of the nuclear policy with regard to economic growth and its implications for the international security system

*Nuclear Proliferation In South Asia* Stephen P Cohen,1991-02-14 This study is based on two policy related premises the pessimistic one is that both Pakistan and India have developed nuclear weapons covertly yet hold back from deployment because each sees political advantages in a policy of nuclear ambiguity The optimistic premise is that arms control and verification could take root in both countries to limit the instability of their national rivalry and nuclear potentials The first premise shapes Cohen s regionalist policy views The second premise is the key to several chapters by others The volume includes two political position papers from opposed national perspectives by Akhtar Ali from Pakistan and Brahma Chellaney from India The latter explains India s traditional reticence toward region specific arms control schemes Akhtar Ali presents insights both into the real obstacles and the openings that could move them aside ISBN 0 8133 8159 2 pbk 47 00

*Nuclear Weapons and Conflict Transformation* Saira Khan,2008-09-09 This new volume explores what the acquisition of nuclear weapons means for the life of a protracted conflict using the case study of the conflict between India and Pakistan

**South Asia's Nuclear Security** Bhumitra Chakma,2014-12-17 South Asia is often viewed as a potential nuclear flashpoint and a probable source of nuclear terrorism But how valid are such perceptions This book seeks to address this question and assesses the region s nuclear security from two principal standpoints First it evaluates the robustness of the Indo Pakistani mutual deterrence by analysing the strength and weaknesses of the competing arguments regarding the issue It also analyses the causes and consequences of nuclear arms race between India and Pakistan the nature of deterrence structure in the region and the challenges of confidence building and arms control between the two countries in order to assess the robustness of South Asia s nuclear deterrence Second it assesses the safety and security of the nuclear assets and nuclear infrastructure of India and Pakistan The author holds that the debate on South Asia s nuclear security is largely misplaced because the optimists tend to overemphasise the stabilising effects of nuclear weapons and the pessimists are too alarmists It is argued that while the risks of nuclear weapons are significant it is unlikely that India and Pakistan will give up their nuclear arsenals in the foreseeable future Therefore what needs to happen is that while nuclear elimination should be the long term goal in the interim years the two countries need to pursue minimum deterrence policies to reduce the likelihood of deterrence failure and the possibility of obtaining fissile materials by non state actors

Handbook of Nuclear Proliferation Harsh V Pant,2012-02-27 The chapters of this proposed volume are intended to shed light on the diverse themes surrounding this very important issue area in international security Each of the six major sections addresses an aspect of nuclear proliferation that will be critical in

determining the future trajectory of global politics in the years to come The first section examines the major thematic issues underlying the contemporary discourse on nuclear proliferation How do we understand this period in proliferation What accounts for a taboo on the use of nuclear weapons so far and will it survive What is the present state of nuclear deterrence models built during the Cold War What is the relationship between the pursuit of civilian nuclear energy and the risks of proliferation Why are we witnessing a move away from non proliferation to counter proliferation The second section gives an overview of the evolving nuclear policies of the five established nuclear powers the USA Russia the United Kingdom France and the People s Republic of China Section three looks at the three de facto nuclear states India Pakistan and Israel The fourth section examines the three problem areas in the proliferation matrix today Iran North Korea and the potent mix of non state actors and nuclear weapons The fifth section sheds light on an important issue often ignored during discussions of nuclear proliferation cases where states have made a deliberate policy choice of either renouncing their nuclear weapons programme or have decided to remain a threshold state The cases of South Africa Egypt and Japan will be the focus of this section The final section will examine the present state of the global nuclear non proliferation regime which most observers agree is currently facing a crisis of credibility The three pillars of this regime the Nuclear Non Proliferation Treaty NPT the Comprehensive Test Ban Treaty CTBT and the Fissile Material Cut Off Treaty FMCT will be examined This is followed by an analysis of the present trends and prospects for US Russia nuclear arms control The impact of missile defenses and the US India civilian nuclear energy co operation pact will be examined so as to ascertain whether they have weakened or strengthened the global non proliferation regime The chapters in this volume aim to document the increasing complexity of the global nuclear proliferation dynamic and the inability of the international community to come to terms with a rapidly changing strategic milieu The future in all likelihood will be very different from the past and the chapters in this volume will try to develop a framework that may help gain a better understanding of the forces that will shape the nuclear proliferation debate in the years to come

*The Politics of Nuclear Weapons in South Asia* Bhumitra Chakma, 2016-02-24

An important and critical re evaluation of South Asia s post tests nuclear politics in contrast to other books this volume emphasises the political dimension of South Asia s nuclear weapons explains how the bombs are used as politico strategic assets rather than pure battlefield weapons and how India and Pakistan utilise them for politico strategic purposes in an extremely complex and

competitive South Asian strategic landscape Written by a group of perceptive observers of South Asia this volume evaluates the current state of Indo Pakistani nuclear deterrents the challenges that the two countries confront in building their nuclear forces the post test nuclear doctrines of the two strategic rivals the implications of Indo Pakistani politics for regional cooperation the role of two systemic actors USA and China in the region s nuclear politics and the critical issues of confidence building and nuclear arms control Asia, Southern A. Sue Goodman,1989 **Pakistan's Nuclear Policy** Zafar Khan,2014-07-17 In May 1998 in reaction to India s nuclear weapons tests Pakistan tested six nuclear weapons Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence This book looks at how this seemingly innocuous shift seriously impacted on Pakistan s nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region s changed changing strategic environment After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test It examines the conceptual theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan s nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence The book not only highlights Pakistan deterrent force building but also analyzes closely Pakistan s doctrinal posture of first use option Furthermore it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence Conceptually providing a deeper understanding of Pakistan s post 1998 nuclear policy this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels It will be a useful contribution in the field of Nuclear Policy Security Studies Asian Politics Proliferation Non Proliferation Studies and Peace Studies This book will be of interest to policy makers scholars and students of nuclear policy nuclear proliferation and arms control related research *Strategic Assessment ...* , *India* John N.
