Strategic Choice And Pathdependency In Postsocialism:

Strategic Choice and Path-dependency in Post-socialism Jerzy Hausner, Bob Jessop, Klaus Nielsen, 1995 This book focuses on the distinctive institutional legacies of state socialism and their impact on the transformation of Poland Hungary and the former Czechoslovakia

Postsocialist Pathways David Stark, Laszlo Bruszt, 1998-02-28 This book first published in 1998 analyzes democratization and economic change in the postsocialist societies of East Central Europe

Preying on the State Venelin I. Ganey, 2013-08-15 Immediately after 1989 newly emerging polities in Eastern Europe had to contend with an overbearing and dominant legacy the Soviet model of the state At that time the strength of the state looked like a massive obstacle to change less than a decade later the state s dominant characteristic was no longer its overweening powerfulness but rather its utter decrepitude Consequently the role of the central state in managing economies providing social services and maintaining infrastructure came into question Focusing on his native Bulgaria Venelin I Ganey explores in fine grained detail the weakening of the central state in post Soviet Eastern Europe Ganey starts with the structural characteristics of the Soviet satellites and in particular the forms of elite agency favored in the socialist party state As state socialism collapsed Ganey demonstrates its institutional legacy presented functionaries who had become accustomed to power with a matrix of opportunities and constraints In order to maximize their advantage under such conditions these elites did not need a robust state apparatus in fact all of the incentives under postsocialism pushed them to subvert the infrastructure of governance Throughout Preying on the State Ganey argues that the causes of state malfunctioning go much deeper than the policy preferences of free marketeers who deliberately dismantled the state He systematically analyzes the multiple dimensions implications and significance of the institutional and social processes that transformed the organizational basis of effective governance

Black Sea Politics Ayse Ayata, Ayca Ergun, 2005-09-23 Directly relates to current Ukraine crisis Russia s Black Sea fleet is based in Ukrainian port of Sebastapol Crimea This work brings together scholars from a variety of disciplines on a region vitally important in current international relations for Europe Russia and the Near East offering fresh perspective combining regional insiders and outsider international experts If ideas of civil society democratisation are Western in nature then how should one examine these trends in a non Western society This book presents a variety of experiences of civil society looking at representation participation and power relations in countries such as the Ukraine Romania Bulgaria and the Caucasus area It is a rare combination of insider perspectives of regional experts and the outsider views of international experts

Energy Poverty in Eastern Europe Stefan Buzar, 2007-01-01 One of the consequences of the post socialist transformation of Eastern and Central Europe and the Former Soviet Union is the emergence of energy poverty a condition where households are living in inadequately heated homes This book provides the first full length examination of the causes consequences and patterns of energy poverty in former Communist countries

Social Media and Emerging Economies Manlio Del Giudice, Maria Rosaria Della Peruta, Elias G. Carayannis, 2013-10-22 How have social media in emerging

economies evolved differently from the rest of the world According to studies and anecdotal evidence innovations in the use of social media tools occur more frequently in emerging economies than they do in developed markets The aim of this volume is to show that in emerging regions such as China India and South America where the participation of stakeholders in the circuit of social media is more active i e greater frequency of contacts and creativity in the elaboration of contents organizations not only are involved in a set of exchange relations with other social actors but are also embedded in a network of dynamic relationships The authors utilize social network analysis to determine how entrepreneurs in emerging economies identify their most beneficial social contacts and use those contacts to leverage the resources needed for their enterprises revealing new insights on the process of business creation and economic development in the networked age *Economic Development in Tatarstan* Leo McCann,2005 Based on extensive original research in Tatarstan this book examines the economic development path followed by Tatarstan since the collapse of the Soviet Union State Power Bob Jessop,2013-04-26 Bob Jessop presents an up to date account of his distinctive approach to the dialectics of structure and strategy in the exercise of state power While his earlier work critically surveys other state theories this book focuses on the development of his own strategic relational approach It introduces its main sources outlines its development applies this approach to four case studies and sketches a strategic relational research agenda Thus the book presents a comprehensive theoretical statement of the approach and guidelines for its application Key features of the book include an account of the authors theoretical development a review of recent developments in state theory and the cultural turn in political economy critical strategic relational re readings of major state theorists Marx on political representation Gramsci on the spatiality of state power Poulantzas on the state as a social relation and the later Foucault on statecraft applications of the strategic relational approach to important issues concerning the contemporary state its gendered selectivity the future of the national state the states temporal sovereignty and the relevance of multi scalar meta governance in Europe for the more general future of the state The book concludes with recommendations for future strategic relational research in political economy and state theory **The Political Economy of Fiscal Reform in Central-Eastern Europe** Frank Bönker,2006-01-01 Frank B nker has done a masterful job This is probably the best book available on this important subject and its significance is not limited to studies of postcommunist societies It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy John L Campbell Slavic Review **Transforming Mozambique** M. Anne Pitcher,2002-11-14 Many of the economic transformations in Africa have been as dramatic as those in Eastern Europe Yet much of the comparative literature on transitions has overlooked African countries This 2002 study of Mozambique s shift from a command to a market economy draws on a wealth of empirical material including archival sources interviews political posters and corporate advertisements to reveal that the state is a central actor in the reform process despite the claims of neo liberals and their critics Alongside the state social forces from

World Bank officials to rural smallholders have also accelerated thwarted or shaped change in Mozambique M Anne Pitcher offers an intriguing analysis of the dynamic interaction between previous and emerging agents ideas and institutions to explain the erosion of socialism and the politics of privatization in a developing country She demonstrates that Mozambique's political economy is a heterogeneous blend of ideological and institutional continuities and ruptures **Work, Employment and Transition** Al Rainnie, Adrian Smith, Adam Swain, 2005-07-28 Since the late 1980s the experiences of work and employment in the former communist world have been profoundly transformed Work Employment and Transition brings together a series of essays by leading international scholars which highlights the varied and complex forms that work and employment restructuring are taking in the post soviet world and makes important theoretical contributions to our understanding of these transformations **The Entrepreneurial Society** Mark Sanders, Axel Marx, Mikael Stenkula, 2020-04-03 This open access book is an outcome of the EU's Horizon 2020 project Financial and Institutional Reforms for an Entrepreneurial Society FIRES Building on historical economic and legal analysis and combining methods and data across disciplines the authors provide policymakers stakeholders and scholars with valuable new tools for assessing and improving Europe's entrepreneurial ecosystems Then experts from Germany Italy and the United Kingdom discuss tailored strategies for introducing entrepreneurial policy reforms in their respective countries *International Partnership in Russia* James Henderson, Alastair Ferguson, 2014-02-17 International Partnership in Russia provides a unique insight into the joint ventures formed by international oil companies in Russia during the post Soviet era It outlines the highs and lows in their fortunes and analyses the reasons for their successes and failures **Russian Transformations** Leo McCann, 2004-07-31 Examining contemporary Russian socio economic development this book explores the degree to which Russian experiences can be incorporated into current social science theories **Restructuring the Chinese City** Laurence J.C. Ma, Fulong Wu, 2004-08-02 A sea of change has occurred in China since the 1978 economic reforms Bringing together the work of leading scholars specializing in urban China this book examines what has happened to the Chinese city undergoing multiple transformations during the reform era with an emphasis on new processes of urban formation and the consequent reconstituted urban spaces With arguments against the convergence thesis that sees cities everywhere becoming more Western in form and suggestions that the Chinese city is best seen as a multiplex city Restructuring the Chinese City is an indispensable text for Chinese specialists urban scholars and advanced students in urban geography urban planning and China studies **Workers and revolution in Serbia** Martin Upchurch, Darko Marinkovic, 2016-05-16 This book offers a refreshing new analysis of the role of workers both in Tito's Yugoslavia and in the subsequent Serbian revolution against Milošević in October 2000 The authors argue that Tito and the Communist leadership of Yugoslavia saw self management as a modernising project to compete with the West and as a disciplining tool for workers in the enterprise The socialist ideals of self management were subsequently corrupted by Yugoslavia's turn to the market The authors then move on to examining

the central role of ordinary workers in overthrowing the nationalist regime of Milo evic and present an account which runs contrary to many descriptions of labour weakness in post Communist states Organised labour should be studied as a movement in and of itself rather than as a passive object of external forces Two labour movement waves have emerged under post Communism the first an expression of desire for democracy the second as a collaboration and clientelism A third wave against the ravages of neoliberalism is only just emerging

Europe Since 1989 William Outhwaite, 2015-10-05 Europe Since 1989 charts the development of Europe east and west since the 1989 revolutions It analyses the emergent European society the development of a European public sphere and civil society Most books on Europe are heavily biased to the West and Europe Since 1989 takes the opposite approach It argues that the transformation of the postcommunist world has implications for the whole of Europe and explores the interplay between long term fundamental tendencies and chance events and the possible futures which confront contemporary Europe With close attention to political economic and other social transformations and an appendix which gives special attention to European macro regions Nordic Baltic Europe Mediterranean Europe it offers a sociology of Europe with a strong interdisciplinary emphasis

The Routledge International Handbook of European Social Transformations Peeter Vihalemm, Anu Masso, Signe Opermann, 2017-11-22 This book focuses on social transformations as one of the central topics in the social sciences The study of European social transformations is very valuable in the context of universal discussions within social sciences explaining invariable universal attributes of societies and examining changing attributes The book consists of 20 chapters on European social transformations written from the perspectives of distinguished scholars from such disciplines as economics political science educational science geography media and communication studies public management and administration social psychology and sociology The temporal and spatial range of the book is wide including such global changes as time space compression focusing particularly on change processes in Europe during the last two decades The book consists of four main parts beginning with an overview of the theoretical and methodological approaches and then focusing separately on post communist transformations institutional drivers of social transformations in the European Union and European transformations in the context of global processes The book presents current theoretical empirical and methodological approaches that complement the scientific literature on social transformations This book is both an invaluable resource for scholars and an indispensable teaching tool for use in the classroom and will be of interest to students academics and policy makers studying how this diverse region has changed over recent years

New State Spaces Neil Brenner, 2004-09-10 In this synthetic interdisciplinary work Neil Brenner develops a new interpretation of the transformation of statehood under contemporary globalizing capitalism Whereas most analysts of the emergent post Westphalian world order have focused on supranational and national institutional realignments *New State Spaces* shows that strategic subnational spaces such as cities and city regions represent essential arenas in which states are being transformed Brenner traces the transformation of

urban governance in western Europe during the last four decades and on this basis argues that inherited geographies of state power are being fundamentally rescaled Through a combination of theory construction historical analysis and cross national case studies of urban policy change *New State Spaces* provides an innovative analysis of the new formations of state power that are currently emerging This is a mature and sophisticated analysis by a major young scholar **The Institutional Economics of Russia's Transformation** Anton N. Oleinik, 2017-11-30 This book applies institutional theory to the analysis of the post Soviet Russian economy to bring to light the reasons why reforms have gone awry Emphasis is put on the elements missed in the early blueprints of reforms constraints embodied in formal and especially informal institutions Other aspects considered include the dominant model of power relationships and the networks of localized and personalized relationships among economic actors The first part provides a general description of the core concepts of institutional theory including both the old institutionalism of T Veblen and J Commons and the new institutional economics of R Coase O Williamson and D North and in the second part an institutional model of the post Soviet Russian economy is developed In the course of the analysis the authors discuss such unresolved issues as post privatization development in Russia and validity of the Coase theorem in the post Soviet institutional context Rich empirical data grounds the discussion throughout
