Systematic Reviews In The Social Sciences A Practical Guide:

Systematic Reviews in the Social Sciences Mark Petticrew, Helen Roberts, 2008-04-15 Such diverse thinkers as Lao Tze Confucius and U S Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference between real and assumed knowledge The systematic review is a scientific tool that can help with this difficult task It can help for example with appraising summarising and communicating the results and implications of otherwise unmanageable quantities of data This book written by two highly respected social scientists provides an overview of systematic literature review methods Outlining the rationale and methods of systematic reviews Giving worked examples from social science and other fields Applying the practice to all social science disciplines It requires no previous knowledge but takes the reader through the process stage by stage Drawing on examples from such diverse fields as psychology criminology education transport social welfare public health and housing and urban policy among others Including detailed sections on assessing the quality of both quantitative and qualitative research searching for evidence in the social sciences meta analytic and other methods of evidence synthesis publication bias heterogeneity and approaches to dissemination *Systematic Reviews in the Social Sciences* Mark Petticrew, 2006 [Cochrane Handbook for Systematic Reviews of Interventions](#) Julian P. T. Higgins, Sally Green, 2011-08-24 Healthcare providers consumers researchers and policy makers are inundated with unmanageable amounts of information including evidence from healthcare research It has become impossible for all to have the time and resources to find appraise and interpret this evidence and incorporate it into healthcare decisions Cochrane Reviews respond to this challenge by identifying appraising and synthesizing research based evidence and presenting it in a standardized format published in The Cochrane Library www.thecochranelibrary.com The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews Written in a clear and accessible format it is the essential manual for all those preparing maintaining and reading Cochrane reviews Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews critically appraise published reviews or perform reviews themselves This title is also available as a mobile App from MedHand Mobile Libraries Buy it now from Google Play or the MedHand Store **Assembling the Pieces of a Systematic Review** Margaret J. Foster, Sarah T. Jewell, 2017-03-03 Here is a complete guide for librarians seeking to launch or refine their systematic review services Conducting searches for systematic reviews goes beyond expert searching and requires an understanding of the entire process of the systematic review Just as expert searching is not fully mastered by the end of a library degree mastering the systematic review process takes a great deal of time and practice Attending workshops and webinars can introduce the topic but application of the knowledge through practice is required Running a systematic review service is complicated and

requires constant updating and evaluation with new standards more efficient methods and improved reporting guidelines After a brief introduction to systematic reviews the book guides librarians in defining and marketing their services covering topics such as when it is appropriate to ask for co authorship and how to reach out to stakeholders Next it addresses developing documentation and conducting the reference interview Standards specific to systematic reviews including PRISMA Institute of Medicine and Cochrane Collaboration are discussed Search strategy techniques including choosing databases harvesting search terms selecting filters and searching for grey literature are detailed Data management and critical appraisal are covered in detail Finally the best practices for reporting the findings of systematic reviews are highlighted Experts with experience in both systematic reviews and librarianship including the editors of the book contributed to the chapters Each step or piece of the review process Planning the review Identifying the studies Evaluating studies Collecting and combining data Explaining the results and Summarizing the review into a report are covered with emphasis on information roles The book is for any librarian interested in conducting reviews or assisting others with reviews It has several applications for training librarians new to systematic reviews for those developing a new systematic review service for those wanting to establish protocols for a current service and as a reference for those conducting reviews or running a service Participating in systematic reviews is a new frontier of librarianship in which librarians can truly become research partners with our patrons instead of merely providing access to resources and services
