Systematics In Prehistory:

Systematics in Prehistory Robert C. Dunnell, 1971 In evaluating introductory and higher level courses in archaeology one is struck with the absence of any general text which treats the units employed by the discipline though all texts are cast in terms of peculiar archaeological units This book is an attempt to record the use and classification of archaeological units

Phytolith Systematics Susan C. Mulholland, George Rapp Jr., 2013-06-29 This volume is the first in the Advances in Archaeological and Museum Science series sponsored by the Society for Archaeological Sciences The purpose of this biennial series is to provide summaries of advances in closely defined topics in archaeometry archaeological science environmental archaeology preservation technology and museum conservation The Society for Archaeological Sciences SAS exists to encourage interdisciplinary collaboration between archaeologists and colleagues in the natural and physical sciences SAS members are drawn from many disciplinary fields However they all share a common belief that physical science techniques and methods constitute an essential component of archaeological field and laboratory studies The General Editors wish to express their appreciation to Renee S Kra and Frances D Moskovitz of Radiocarbon for their special expertise and assistance in the production of this volume We also appreciate the contribution of the two reviewers for their excellent comments and suggestions The General Editor responsible for undertaking the development of this volume was R E Taylor **Biological**

Systematics Igor Pavlinov, 2021-03-25 This volume reviews the historical roots and theoretical foundations of biological systematics in an approachable text The author outlines the structure and main tasks of systematics Conceptual history is characterized as a succession of scientific revolutions The philosophical foundations of systematic research are briefly reviewed as well as the structure and content of taxonomic theories Most important research programs in systematics are outlined The book includes analysis of the principal problematic issues as scientific puzzles in systematics This volume is intended for professional taxonomists biologists of various specialties students as well as all those interested in the history and theory of biology and natural sciences Key Features Considers the conceptual history of systematics as the framework of evolutionary epistemology Builds a hierarchically organized quasi axiomatic system of taxonomic theory Contends that more reductionist taxonomic concepts are less objective Supports taxonomic pluralism by non classic philosophy of science as a normal condition of systematics Documents that taxonomic puzzles result from conflict between monistic and pluralistic attitudes Related Titles de Queiroz K et al eds Phylonyms A Companion to the PhyloCode ISBN 978 1 1383 3293 5 Sigwart J D What Species Mean A User's Guide to the Units of Biodiversity ISBN 978 1 4987 9937 9 Rieppel O Phylogenetic Systematics Haeckel to Hennig ISBN 978 1 4987 5488 0 Wilkins J S Species The Evolution of the Idea 2nd ed ISBN 978 1 1380 5574 2 **The Pleistocene Old World** Olga Soffer, 2013-11-11 Regional approaches to past human adaptations have

generated much new knowledge and understanding Researchers working on problems of adaptations in the Holocene from those of simple hunter gatherers to those of complex sociopolitical entities like the state have found this approach suitable

for comprehension of both ecological and social aspects of human behavior This research focus has however until recently left virtually un touched a major spatial and temporal segment of prehistory the Old World during the Pleistocene Extant literature on this period by and large presents either detailed site specific accounts or offers continental or even global syntheses that tend to compile site specific information but do not integrate it into whole c nstructs of functioning so ciocuhural entities This volume presents our current state of knowledge about a variety of regional adaptations that charaeterized prehistoric groups in the Old World before 10 000 B P The authors of the chapters consider the behavior of humans rather than that of objects or features and present data and models for variaus aspects of past cultures and for culture change These presentations integrate findings and understandings derived from a number of related disciplines actively involved in researching the past Data and interpretations are offered on a range of Old world regions during the PaIeolithic induding Africa Asia Australia and Europe and chronological coverage spans from the Early to Late Pleisto cene

Companion Encyclopedia of Archaeology Graeme Barker, 2002-08-13 This comprehensive fully illustrated Companion answers the need for an in depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field The work brings together the myriad strands and the great temporal and spatial breadth of the field into two thematically organized volumes In twenty six authoritative and clearly written essays this Companion explores the origins aims methods and problems of archaeology Each essay is written by a scholar of international standing and illustrations complement the text Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodologi enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of

excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology *Darwin's Legacy: The Status of Evolutionary Archaeology in Argentina* Marcelo Cardillo, Hernán Muscio, 2016-01-22 This book collects the contributions to the symposium The current state of evolutionary archeology in Argentina that was held in Buenos Aires for celebrating the 200th anniversary of Charles Darwin's birth and the 150th anniversary of the publication of *On the Origin of Species* The Archaeologist's Laboratory Edward B. Banning, 2020-07-27 This second edition of the classic textbook *The Archaeologist's Laboratory* is a substantially revised work that offers updated information on the archaeological work that follows fieldwork such as the processing and analysis of artifacts and other evidence An overarching theme of this edition is the quality and validity of archaeological arguments and the data we use to support them The book introduces many of the laboratory activities that archaeologists carry out and the ways we can present research results including graphs and artifact illustrations Part I introduces general topics concerning measurement error data quality research design typology probability and databases It also includes data presentation basic artifact conservation and laboratory safety Part II offers brief surveys of the analysis of lithics and ground stone pottery metal artifacts bone and shell artifacts animal and plant remains and sediments as well as dating by stratigraphy seriation and chronometric methods It concludes with a chapter on archaeological illustration and publication A new feature of the book is illustration of concepts through case studies from around the world and from the Palaeolithic to historical archaeology The text is appropriate for senior undergraduate students and will also serve as a useful reference for graduate students and professional archaeologists Artifact Classification Dwight W Read, 2016-09-16 Archaeologists have been developing artifact typologies to understand cultural categories for as long as the discipline has existed Dwight Read examines these attempts to systematize the cultural domains in premodern societies through a historical study of pottery typologies He then offers a methodology for producing classifications that are both salient to the cultural groups that produced them and relevant for establishing cultural categories and timelines for the archaeologist attempting to understand the relationship between material culture and ideational culture of ancient societies This volume is valuable to upper level students and professional archaeologists across the discipline Science on the Web Edward J. Jr. Renahan, 2013-06-29 The World Wide Web is loaded with science and science related material For everyone who wants to learn more about this amazing resource Ed Renahan has compiled this fun and informative guide to what's out there what's interesting what's new and who's doing it Whether your interest is in artificial intelligence Hubble Space Telescope images or the latest dinosaur findings the best sources and how to reach them
