Subject Guide to Books in Print ,1993 *Scientific and Technical Books and Serials in Print* ,1989 Pesticide Interactions in Crop Production J. Altman,2018-01-18 Pesticide Interactions in Crop Production Beneficial and Deleterious Effects evaluates the effects of pesticides on plants by exploring the physical chemical biological and ecological interactions of pesticides that influence a crop The effects of pesticides on the environment and on the crop pests themselves are considered as well Specific topics addressed include iatrogenic responses the fate of pesticides applied to cereals under field conditions the persistence of pesticides on target crops the effect of pesticides on soil symbionts and the role of ecological agriculture on conventional and organic cropping systems Pesticide Interactions in Crop Production Beneficial and Deleterious Effects will be an important volume for agriculturalists phytologists mycologists soil biologists plant pathologists tropical ecologists arboriculturalists and other researchers interested in the effects of pesticides on crops and soil

Complex Interactions in Lake Communities Stephen R. Carpenter,2012-12-06 In its statutory authority National Science Foundation Act of 1950 as amended the NSF is directed to both initiate and support basic scientific research In its Ecology Program one mode of initiating research is to encourage the development of new ideas through advisory workshops The NSF is specifically directed to strengthen our nation's research potential In addition stimulating new approaches to research will continue to be prominent in the coming years as federal attention is given to increasing the innovativeness and competitiveness of the U S in science and engineering A decision to initiate a workshop does not arise de novo in the Ecology Program Rather it emerges from panel discussions conversations with investigators at meetings or on the phone and from discussions between program officers in the Division of Biotic Systems and Resources This workshop was developed to provide advice to the NSF and the limnological community Some NSF perceptions on future funding for ecological research on lake communities are presented here Researchers often mentioned a paucity of innovative lake ecology at the community level This perception was accompanied by a certain frustration since lakes probably have the best empirical data base of any natural environment and should continue to lead in the development of ecological concepts Members of NSF advisory panels sometimes expressed similar concerns during consideration of proposals for lake research **Directory of Published**
