Valle, F. Gardin, N. Cercone, 1991-07-01 In recent years AI has been experiencing a deep internal debate on the appropriateness of the symbolic based paradigm and all of its consequences While various symbolic representation schemes as well as their integration have been proposed their limitations have continuously pushed researchers for improved versions or entirely new ones New viewpoints such as the complex dynamic based approach with neural nets can be regarded simply as new problem solving techniques with specific properties Under this perspective what seems to be important is the ability to combine heterogeneous representation and problem solving techniques Research on heterogeneous intelligent systems goes hand in hand with research on specific problem solving methods and paradigms therefore representing their conceptual and practical glueing element The papers contained in this proceedings are just one instance of such awareness activity in the international scientific community *Computerworld* , 1987-03-23 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network **CASE Strategies Guide for Information Managers** Simon Holloway, Tony Bidgood, 2018-12-17 First published in 1993 this book explores the technical opportunities and constraints vendors and users business objectives and critical success factors and intellectually inspired advances in methodologies and techniques of Computer Aided Systems Engineering or CASE for short This book is designed to be read on its own as a high level guide to the strategies of the certain vendors *InfoWorld* , 1990-10-29 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also
