Freed, 1971 **Transformative Eco-Education for Human and Planetary Survival** Jing Lin, Rebecca L. Oxford, 2011-12-01 Transformative eco education is environmental education that is literally needed to transform and save our planet especially during the global ecological crises of our present century Such education demands inner transformation of many deeply rooted ideas such as the following the Earth exists merely to provide for human comfort the extinction or reduction of other species does not matter we are free to consume or destroy natural resources at will but are safe from destruction ourselves and the Earth will continue to sustain us even if we do not sustain the Earth Unless these concepts are changed we will increase global warming and add to the ruin of much of the Earth This book presents powerful ideas for transformative eco education At this time of ever increasing ecological crisis such education is needed more than ever before We urge readers to use the ideas and activities in this book with your students develop them further and create new conceptions to share with other educators and students The chapters in this book provide key principles of which the following are just a few First educators can and should prepare students for natural disasters Second stories case studies the arts and hands on environmental experience all enriched by reflection and discussion can offer profound learning about ecology Third education at all levels can benefit from a true ecological emphasis Fourth teachers must receive preparation in how to employ transformative eco education Fifth Indigenous wisdom can offer important holistic spiritual paths to understanding and caring for nature and other spiritual traditions also provide valid ways of comprehending humans as part of the universal web of existence Sixth transformative eco education can be an antidote to not only environmental breakdown but also to materialistic overconsumption and moral confusion Seventh we can only heal the Earth by also healing ourselves If we heed these principles together we can make transformative eco education a blazing torch to light the path for the current century and beyond **Cognitive Self-Instruction (CSI) for Classroom Processes** Brenda H.
