Lessons from High-performing Hispanic Schools Pedro Reyes, Jay D. Scribner, Alicia Paredes Scribner, 1999 This practical volume provides school administrators and teachers with the information needed to convert ordinary schools into high performing schools It offers practices for teachers and school principals to foster academic success and strategies for involving parents in their child s education

Kill the Messenger Richard Phelps, 2017-09-04 In response to public demand federal legislation now requires testing of most students in the United States in reading and mathematics in grades three through eight Many educators parents and policymakers who have paid little attention to testing policy issues in the past need to have better information on the topic than has generally been available Kill the Messenger now in paperback fills this gap This is perhaps the most thorough and authoritative work in defense of educational testing ever written Phelps points out that much research conducted by education insiders on the topic is based on ideological preference or profound self interest It is not surprising that they arrive at emphatically anti testing conclusions Much if not most of this hostile research is passed on to the public by journalists as if it were neutral objective and independent Kill the Messenger explains and refutes many of the common criticisms of testing describes testing opponents strategies through case studies of Texas and the SAT illustrates the profound media bias against testing acknowledges testing s limitations and suggests how it can be improved and finally outlines the consequences of losing the war on standardized testing
