Tackling Inequalities Where Are We Now And What Can Be Done:

Tackling inequalities Pantazis, Christina, Gordon, David, 2000-01-12 The growing divide between the poor and the rich is the most significant social change to have occurred during the last few decades The new Labour government inherited a country more unequal than at any other time since the Second World War This book brings together a collection of contributions on inequalities in the main areas of British life income wealth standard of living employment education housing crime and health It charts the extent of the growth in inequalities and offers a coherent critique of the new Labour government's policies aimed at those tackling this crisis In particular the numerous area based anti poverty policies currently being pursued are unlikely to have a significant and long lasting effect since many lessons from the past have been ignored The contributors use and interpret official data to show how statistics are often misused to obscure or distort the reality of inequality A range of alternative policies for reducing inequalities in Britain are discussed and set within the global context of the need for international action Tackling inequalities is a valuable contribution to the emerging policy debate written by the leading researchers in the field It is essential reading for academics policy makers and students with an interest in inequalities poverty and social exclusion Studies in poverty inequality and social exclusion series Series Editor David Gordon Director Townsend Centre for International Poverty Research Poverty inequality and social exclusion remain the most fundamental problems that humanity faces in the 21st century This exciting series published in association with the Townsend Centre for International Poverty Research at the University of Bristol aims to make cutting edge poverty related research more widely available For other titles in this series please follow the series link from the main catalogue page

Understanding Inequality, Poverty and Wealth Ridge, Tess, Wright, Sharon, Sharon Elizabeth Wright, 2008-06-30 At a time when the divide between the wealthy and the disadvantaged is widening this major textbook provides students with a critical understanding of poverty and social exclusion in relation to wealth rather than as separate from it Raising fundamental questions about the organisation of society social structures and relationships and social justice the book is split into four main sections exploring key concepts and issues people and place poverty and wealth across different groups and situations the role of the state and prospects for the future This is the only textbook to focus on the links between wealth and poverty and contains an edited collection of chapters specially written by a distinguished panel of contributors including Pete Alcock Daniel Dorling Mary Shaw Gill Scott and Jay Ginn It is designed with the needs of students in mind and includes useful chapter summaries illustrative boxes and diagrams and pointers to relevant websites and other sources of further information This is an essential textbook for level 1 2 undergraduate students studying social policy either as a main subject or as part of their course It is a core text for level 3 4 specialist modules in this field

Poverty in Plenty Jane Seymour, 2013-12-19 Poverty in Plenty breaks new ground in two ways It is the first national Human Development Report to focus on an industrialised country and it is the first to be produced by a non governmental organisation While problems of

poverty and deprivation are less extreme in countries such as the UK than in some other parts of the world the human development message is still highly relevant There are many people who suffer through inadequate housing insufficient means to guarantee a nutritious diet and the absence of secure rewarding and remunerative employment From the Foreward by Sakiko Fukuda Parr Human Development Report Office United Nations Development Programme The economics that dominates Britain loosely known as globalisation is a kind of religion which dictates that the worship of money should take preference over common human values like the sharing of wealth and the right to a decent life This report reveals the power of traditional economics over our society and the way in which the lives of our grandmothers and grandfathers men and women girls and boys have been damaged and impoverished I highly recommend it Ann Pettifor Director Jubilee 2000 UK The UK's performance on poverty and deprivation ranks 16th out of 18 industrialised countries People living in Glasgow Shettleston are 3.8 times more likely to die before they are 65 years old than those living in Wokingham In industrialised countries wealth and affluence are widely perceived to be growing although not at the same rate for everyone But economic growth is not the same as genuine human development Poverty in Plenty applies accepted measures of human poverty education health and employment to the UK and assesses how our food and housing policies contribute to a sustainable way of life It draws on the work of leading research institutes and campaigning groups to determine the real state of society in the UK Using a range of indicators to measure livelihoods and well being the report shows how widespread poverty is and highlights the vast geographical disparities in levels of poverty that exist within the UK It goes on to set out what urgently needs to be done to address the sobering trends revealed and describes effective policies that will allow us to improve the current situation The findings are of vital importance to those working on social issues in the public and voluntary sectors and to students and general readers wanting the truth behind the public statistics Jane Seymour is an independent researcher and writer on health and environment issues Originally published in 2000

Development and Social Policy

Christian Aspalter, Kenny Teguh Pribadi, 2016-12-19 In recent years government and policymakers around the world have shifted their attention away from money oriented supply side economics to institutional economics and people oriented social and economic development Issues such as poverty reduction win win solutions and strategies in social policy and their implementation universalization and a variety of new large scale conditional cash transfers programs have become ever present in the global discussion about development and social policy This book provides win win strategies for social policies on the ground as developed and put forward by the normative theoretical paradigm of Developmental Social Policy DSP Taking the state of the art general development theory as a starting point of reference and discussion it goes on to discuss in detail the key win win strategies that form the basis and core of the DSP paradigm It examines key related issues such as the performance of provident fund systems the performance of conditional cash transfer systems especially their elements that are based on asset and means testing universalism and extension in social security provision in the context of especially

developing countries and non economically targeted social welfare benefits and services Providing fully fledged theoretical guidance paired with key social policy strategies and solutions it will be highly valuable for students and scholars of social policy development studies and Asia Pacific studies

Financial Exclusion and the Poverty Trap Pamela Lenton, Paul Mosley, 2012-02-27 The persistence of poverty hurts us all and attacking poverty is a major policy objective everywhere In Britain the main political parties have an anti poverty mandate and in particular an agreed commitment to eliminate child poverty by 2020 but there is controversy over how this should be done This book addresses one of the main causes of poverty financial exclusion the inability to access finance from the high street banks People on low or irregular incomes typically have to resort to loan sharks doorstep lenders and other informal credit sources a predicament which makes escape from the poverty trap doubly difficult Over the last fifteen years a strategy of breaking down the poverty trap has been implemented known in the UK as community development financial institutions CDFIs typically non profit lending institutions focussed on the financially excluded and seeking to learn from the achievements of microfinance around the world Focussing on the period 2007-09 during which the UK went into a global recession this book investigates how CDFIs work and how well they have helped low income people and businesses to weather that recession Based on a study of eight CDFIs in four UK cities we ask what ideas for overcoming financial exclusion have worked well and which have worked badly What can we learn from the experience of these CDFIs which can help reduce poverty in this country and globally We assess the impact of CDFIs using a range of indicators including income assets education health and ask what changes in policy by both CDFIs and government agencies for example benefits agencies might be able to increase impact Some of the key lessons are CDFIs need to work with appropriate partners to build up savings capacity in their clients the community environment is vital in determining who escapes from the poverty trap and CDFIs can never function properly unless they learn how to control their overdue debts This book will be vital reading for those concerned with social policy microfinance and anti poverty policies in industrialised countries and around the world

Evidence versus politics Monaghan, Mark, 2011-01-26 The initial enthusiasm for the evidence based policy agenda has recently been replaced with increasing scepticism Critics point out that policy based evidence characterises the relationship more accurately Analysing the role and nature of evidence in the context of UK drug policy and drawing on a range of theories of the policy process and research utilisation this book pursues an alternative route for conceptualising the evidence and policy connection which moves beyond zero sum statements of evidence based policy and policy based evidence It will be essential reading for students and researchers in public policy and criminology

Placing Health Tim Blackman, 2006-10-18 Placing Health examines England's Neighbourhood Renewal Strategy and its health targets to see if where people live matters to their health and whether health improvement strategies targeted on where people live can work

Town and Country Planning in the UK Barry Cullingworth, Vincent Nadin, 2003-09-02 Town and Country Planning in the UK has become the Bible of British planning In this new edition detailed

consideration is given to the nature of planning and its historical evolution central and local government the EU and other agencies the framework of plans and other instruments development control land policy and planning gain environmental and countryside planning sustainable development waste and pollution heritage and transport planning urban policies and regeneration This twelfth edition has been completely revised and expanded to cover the whole of the UK The new edition explains more fully the planning policies and actions of the European Union and takes into account the implications of local government reorganization the plan led system and the growing interest in promoting sustainable development
