Tairora Culture Contingency And Pragmatism:

Tairora Culture James Bennett Watson, 1983 *Anyan's Story* Virginia Drew Watson, 2012-12-18 Anyan was born in the mid 1920s into the pre metal culture of the Tairora of what is now called Papua New Guinea Her early life was rooted in the traditions of her remote village where she worked the land and took part in the rituals connected with raising food but she lived at the time of first contact between her people and those from outside and she saw the traditional ways begin to change At her marriage she moved to the government station at Kainantu where she was exposed to more Western influences even as she tried to hold on to her past and her ties to her village Before she died in the mid 1970s this woman of indomitable spirit rode in an airplane and voted in a Western style election When Virginia Watson began her anthropological fieldwork in the eastern highlands of New Guinea in 1954 she needed an interpreter for the unwritten language of the Tairora Fortune sent her Anyan In their work together as Watson researched the role of Tairora women Anyan gradually painted a picture of her society using events from her own life Over many years of collaboration and deepening friendship a remarkable life history was told one that bridged the periods before and after contact with Western culture When Watson suggested the book to Anyan she was elated She was anxious that everyone know about Tairora Her pride in her upbringing in her culture in her beautiful corner of the world was apparent Individuals experience the shock of cultural transplantation in many ways As Watson writes some of those forced to make the move from one culture to another were consumed by it and some were consigned to straddling the dark void that the cultural disparities created Others like Anyan were able to maintain equilibrium in both cultures Anyan s Story will be of interest to anthropologists and other social scientists It is a valuable study of gender roles women s experience in cross cultural societies and culture shock [From Primitive to Postcolonial in Melanesia and Anthropology](#) Bruce Knaft, 2025-10-01 What have anthropologists taught us about Melanesia one of anthropology s most important and intensively studied world regions In this book Professor Bruce Knaft draws together and critically reanalyzes what we know about major features of Melanesian cultural history warfare and politics gender bodily practices and spirituality as discerned from more than a century of academic study From Primitive to Postcolonial in Melanesia and Anthropology is arguably the most comprehensive single reassessment of Melanesia as an ethnographic world area to have been published in several decades Written for students as well as professional scholars this work further broadens our understanding by analyzing the history of Melanesian ethnography and relating this history to the larger relationship between Melanesia as a contemporary world area and anthropology as a field of contemporary human study Bruce M Knaft is Professor of Anthropology Emory University and the author of three previous books as well as some thirty journal articles and chapters Knaft s interests span a wide range of issues in the anthropology of Melanesia and he is articulate with general issues of cultural theory and anthropological history **The Legacy of Solomon Asch** Irvin Rock, 2014-01-14 This volume honors Solomon Asch a pioneer in social psychology whose experiments in this field are

considered classic Asch has made important contributions to the fields of memory learning and thinking and perception along with extending Gestalt theories to social psychology research Former students and colleagues honor Asch with essays that either expand on his research or describe original research on new topics of related interest An interesting and informative text for faculty and researchers in the fields of cognition and perception as well as social experimental and personality psychology

Anthropological Perspectives On Kinship Ladislav Holy, 1996-10-20 This authoritative introductory text takes into account the changes in the conceptualisation of kinship brought about by new reproductive technologies and the growing interest in culturally specific notions of personhood and gender Holy considers the extent to which Western assumptions have guided anthropological study of kinship in the past In the process he reveals a growing sensitivity on the part of anthropologists to individual ideas of personhood and gender and encourages further critical reflection on cultural bias in approaches to the subject

Ethnographic Presents Terence E. Hays, 1992-09-24 Until the middle of this century the Western world knew little about the peoples of the Central Highlands of what is now Papua New Guinea and vice versa Only in 1930 was the curtain abruptly lifted on those valleys and mountain ridges with their tens of thousands of inhabitants whose mineral resources service as laborers fealty as colonial subjects and souls became objects of intense interest on the part of gold prospectors Australian administrative officers and missionaries For the most part these early interlopers were mere sojourners and all were too preoccupied with their immediate objectives to learn or report much about the lives of people whose very existence had only recently been suspected Within the general framework of how and why they conducted their early Highlands fieldwork but with the freedom to develop their essays as they chose potential contributors were asked to reflect on a range of interrelated topics Before the Highlands training and theoretical orientation prior to the experience previous fieldwork why the Highlands and a particular region were chosen expectations and preparation Arrival first impressions of the region and the people the colonial encounter selecting and establishing a field base hosts reactions and expectations hosts understandings of the fieldworker's objectives Fieldwork logistics of living in the field relationships with administrators and or missionaries the role of the anthropologists in the community what the community gained from the ethnographer's presence methods employed Analysis how the anthropological climate of the times shaped or influenced analyses how the Highlands experience may have changed the author's theoretical orientation After the Highlands how return visits or later work has been influenced by the first encounter

how the early work relates to issues subsequently prominent in Highlands ethnography or anthropology in general **The Abandoned Narcotic** Ron Brunton, 1989 In this book Ron Brunton attempts to explain the strange geographical distribution of kava a narcotic drink once widely consumed by south west Pacific islanders Hierarchy in the Forest Christopher BOEHM, Christopher Boehm, 2009-06-30 Are humans by nature hierarchical or egalitarian Hierarchy in the Forest addresses this question by examining the evolutionary origins of social and political behavior Christopher Boehm an anthropologist whose fieldwork has focused on the political arrangements of human and nonhuman primate groups postulates that egalitarianism is in effect a hierarchy in which the weak combine forces to dominate the strong The political flexibility of our species is formidable we can be quite egalitarian we can be quite despotic Hierarchy in the Forest traces the roots of these contradictory traits in chimpanzee bonobo gorilla and early human societies Boehm looks at the loose group structures of hunter gatherers then at tribal segmentation and finally at present day governments to see how these conflicting tendencies are reflected Hierarchy in the Forest claims new territory for biological anthropology and evolutionary biology by extending the domain of these sciences into a crucial aspect of human political and social behavior This book will be a key document in the study of the evolutionary basis of genuine altruism Table of Contents The Question of Egalitarian Society Hierarchy and Equality Putting Down Aggressors Equality and Its Causes A Wider View of Egalitarianism The Hominoid Political Spectrum Ancestral Politics The Evolution of Egalitarian Society Paleolithic Politics and Natural Selection Ambivalence and Compromise in Human Nature References Index Reviews of this book This well written book geared toward an audience with background in the behavioral and evolutionary sciences but accessible to a broad readership raises two general questions What is an egalitarian society and How have these societies evolved Christopher Boehm takes the reader on a journey from the Arctic to the Americas from Australia to Africa in search of hunter gatherer and tribal societies that emanate the egalitarian ethos one that promotes generosity altruism and sharing but forbids upstartism aggression and egoism Throughout this journey Boehm tantalizes the reader with vivid anthropological accounts of ridicule criticism ostracism and even execution prevalent tactics used by subordinates in egalitarian societies to level the social playing field Hierarchy in the Forest is an interesting and thought provoking book that is surely an important contribution to perspectives on human sociality and politics Ryan Earley American Scientist Reviews of this book Combining an exhaustive ethnographic survey of human societies from groups of hunter gatherers to contemporary residents of the Balkans with a detailed analysis of the behavioral attributes of non human primates chimpanzees gorillas bonobos Boehm focuses on whether humans are hierarchical or egalitarian by nature Boehm's hypotheses are invariably intriguing and well documented He raises topics of wide interest and his book should get attention Publishers Weekly Boehm has been the first to look at egalitarianism with a cold unromantic eye He sees it as a victory over hierarchical tendencies which are equally marked in our species I would predict that his insightful examination will reverberate within anthropology and the social sciences as well as among

biologists interested in the evolution of social systems Frans de Waal Emory University Hierarchy in the Forest is an original and stimulating contribution to thinking about the origins of egalitarianism I personally find Boehm's ideas convincing but whether one agrees with him or not he has formulated his hypotheses in such a way that this book is likely to set the terms of the discussion for the foreseeable future Barbara Smuts University of Michigan The most unique and interesting feature of this clear well written book is the way Boehm links the study of nonhuman primates particularly chimpanzees to traditional concepts of political anthropology As a political scientist I was intrigued by Boehm's suggestion that democracy both ancient and modern could be understood as the expression of the same natural dispositions that support the egalitarianism of nomadic bands and sedentary tribes I expect that many scholars in biology anthropology and the social sciences would learn from this stimulating book Even those who disagree with Boehm's arguments are likely to be provoked in instructive ways Larry Arnhart Northern Illinois University Chris Boehm boldly and cogently attacks a whole orthodoxy in anthropology which sees hunter gatherer egalitarianism as somehow the basic form of human society No praise can be too high for Boehm's brilliant and courageous book Robin Fox Rutgers University *A Law of Blood-ties - The 'Right' to Access Genetic Ancestry* Alice Diver, 2013-08-28 This text collates and examines the jurisprudence that currently exists in respect of blood tied genetic connection arguing that the right to identity often rests upon the ability to identify biological ancestors which in turn requires an absence of adult centric veto norms It looks firstly to the nature and purpose of the blood tie as a unique item of birthright heritage whose socio cultural value perhaps lies mainly in preventing or perhaps engendering a feared or revered sense of otherness It then traces the evolution of the various policies on telling and accessing truth tying these to the diverse body of psychological theories on the need for unbroken attachments and the harms of being origin deprived The law of the blood tie comprises of several overlapping and sometimes conflicting strands the international law provisions and UNCRC Country Reports on the child's right to identity recent Strasbourg case law and domestic case law from a number of jurisdictions on issues such as legal parentage vetoes on post adoption contact court delegated decision making overturned placements and the best interests of the relinquished child The text also suggests a means of preventing the discriminatory effects of denied ancestry calling upon domestic jurists legislators policy makers and parents to be mindful of the long term effects of genetic kinlessness upon origin deprived persons especially where they have been tasked with protecting this vulnerable section of the population
