

The background of the book cover is a photograph of the Terracotta Army in China. It shows a vast number of life-sized terracotta soldiers standing in neat, dense rows. The soldiers are dark in color, possibly black or dark brown, and are wearing traditional Chinese armor. The perspective is from a slightly elevated position, looking down at the rows of figures. The lighting is somewhat dramatic, with shadows that emphasize the scale and uniformity of the army.

Ten Thousand Things Module And Mass Production In Chinese Art:

Ten Thousand Things Lothar Ledderose, 2000-01 Chinese workers in the third century b c created seven thousand life sized terracotta soldiers to guard the tomb of the First Emperor In the eleventh century a d Chinese builders constructed a pagoda from as many as thirty thousand separately carved wooden pieces In the seventeenth and eighteenth centuries China exported more than a hundred million pieces of porcelain to the West As these examples show the Chinese throughout history have produced works of art in astonishing quantities and have done so without sacrificing quality affordability or speed of manufacture How have they managed this Lothar Ledderose takes us on a remarkable tour of Chinese art and culture to explain how artists used complex systems of mass production to assemble extraordinary objects from standardized parts or modules As he reveals these systems have deep roots in Chinese thought in the idea that the universe consists of ten thousand categories of things for example and reflect characteristically Chinese modes of social organization Ledderose begins with the modular system par excellence Chinese script an ancient system of fifty thousand characters produced from a repertoire of only about two hundred components He shows how Chinese artists used related modular systems to create ritual bronzes to produce the First Emperor s terracotta army and to develop the world s first printing systems He explores the dazzling variety of lacquerware and porcelain that the West found so seductive and examines how works as diverse as imperial palaces and paintings of hell relied on elegant variation of standardized components Ledderose explains that Chinese artists unlike their Western counterparts did not seek to reproduce individual objects of nature faithfully but sought instead to mimic nature s ability to produce limitless numbers of objects He shows as well how modular patterns of thought run through Chinese ideas about personal freedom China s culture of bureaucracy Chinese religion and even the organization of Chinese restaurants Originally presented as a series of Mellon lectures at the National Gallery of Art *Ten Thousand Things* combines keen aesthetic and cultural insights with a rich variety of illustrations to make a profound new statement about Chinese art and society *Ten Thousand Things* Lothar Ledderose, 2000 *The Art of the Chinese Picture-Scroll* Shane McCausland, 2023-10-25 The first extended history of the Chinese picture scroll The Chinese picture scroll a long horizontal painting or calligraphic work has been China s pre eminent aesthetic form throughout the last two millennia This first history of the picture scroll explores its extraordinary longevity and adaptability to social political and technological change The book describes what the picture scroll demands of a viewer how China s artists grappled with its cultural power and how collectors and connoisseurs left their marks on scrolls for later generations to judge **Artisans in Early Imperial China** Anthony J.
