

SCHWARZENEGGER
TERMINATOR 2
JUDGMENT DAY

He said he'd be back! Arnold Schwarzenegger returns as the Terminator in this explosive action-adventure spectacle.

His mission: to protect John Connor, the boy destined to lead the freedom fighters of the future.

His opponent: the T-1000, the most lethal machine ever created, sent back through time to kill young John.

His ally: Sarah Connor, John's mother, Linda Hamilton co-stars, reprising her role as the quintessential survivor, a woman warrior whose warnings go unheeded by a world careening toward a nuclear holocaust she knows is inevitable.

Co-written, produced and directed by James Cameron (*The Terminator*, *Alien*, *The Abyss*), *T2* is a tour-de-force of stunts and outstanding special effects, built around a touching and emotional human story. Visually stunning, unexpectedly moving, the film is a true epic.

"THUNDEROUSLY VISCERAL..." Some of the most special effects in cinema... Schwarzenegger is impressive, hilarious, almost touching. This brutally exciting movie never loses sight of its humanity."

THE RESEARCHERS studied two groups of people with and without dementia. The 146 participating people were divided into two groups: 72 people with dementia and 74 people without dementia. The researchers found that people with dementia had a higher risk of falling than people without dementia. The researchers also found that people with dementia had a higher risk of falling if they had a history of falls. The researchers also found that people with dementia had a higher risk of falling if they had a history of falls.

Abstract The purpose of this study was to determine whether there were differences in the prevalence of self-reported depression between men and women who had been exposed to violence during childhood and adulthood. Data from the National Longitudinal Study of Adolescent Health (*N = 9,800*) revealed that exposure to violence during childhood and adulthood was associated with higher rates of self-reported depression among both men and women. However, the association between exposure to violence and self-reported depression was stronger for women than for men.
