Th Huxleys Place In Natural Science:

The Huxleys Alison Bashford, 2022-11-16 A New Yorker and Economist Best Book of the Year Two hundred years of modern science and culture told through one family history This momentous biography tells the story of the Huxleys the Victorian natural historian T H Huxley Darwin s Bulldog and his grandson the scientist conservationist and zoologist Julian Huxley Between them they communicated to the world the great modern story of the theory of evolution by natural selection In The Huxleys celebrated historian Alison Bashford writes seamlessly about these omnivorous intellects together almost as if they were a single man whose long vital life bookended the colossal shifts in world history from the age of sail to the Space Age and from colonial wars to world wars to the cold war The Huxleys specialty was evolution in all its forms at the grandest level of species deep time the Earth and at the most personal and intimate They illuminated the problems and wonders of the modern world and they fundamentally shaped how we see ourselves as individuals and as a species But perhaps their greatest subject was themselves Bashford s engaging brilliantly ambitious book interweaves the Huxleys momentous public achievements with their private triumphs and tragedies The result is the history of a family but also a history of humanity grappling with its place in nature This book shows how much we owe for better or worse to the unceasing curiosity self absorption and enthusiasm of a small strange group of men and women *Styles of Reasoning in the British Life Sciences*

James Elwick, 2007-09-15 Elwick explores how the concept of compound individuality brought together life scientists working in pre Darwinian London Scientists conducting research in comparative anatomy physiology cellular microscopy embryology and the neurosciences repeatedly stated that plants and animals were compounds of smaller independent units Discussion of a bodily economy was widespread But by 1860 the most flamboyant discussions of compound individuality had come to an end in Britain Elwick relates the growth and decline of questions about compound individuality to wider nineteenth century debates about research standards and causality He uses specific technical case studies to address overarching themes of reason and scientific method

When Science & Christianity Meet David C. Lindenberg, Ronald L. Numbers, 2024-05-31 This book in language accessible to the general reader investigates twelve of the most notorious most interesting and most instructive episodes involving the interaction between science and Christianity aiming to tell each story in its historical specificity and local particularity Among the events treated in When Science and Christianity Meet are the Galileo affair the seventeenth century clockwork universe Noah s ark and flood in the development of natural history struggles over Darwinian evolution debates about the origin of the human species and the Scopes trial Readers will be introduced to St Augustine Roger Bacon Pope Urban VIII Isaac Newton Pierre Simon de Laplace Carl Linnaeus Charles Darwin T H Huxley Sigmund Freud and many other participants in the historical drama of science and Christianity Taken together these papers provide a comprehensive survey of current thinking on key issues in the relationships between science and religion pitched as the editors intended at just the right level to appeal to students Peter J Bowler Isis [Huxley at Work](#) Michael Collie, 2016-07-27

The previously unpublished correspondence of T H Huxley with Rev George Gordon is an important new addition to the literature on Huxley and Victorian science The correspondence is self contained and wholly scientific concerning the unexpected discovery of reptilian fossils and footprints near Elgin and relates to a most important aspect of Huxley s career defining the relationship between geology and palaeontology The letters are complemented by an incisive analysis of Huxley s work as a palaeontologist and the development of his views on evolution

The Temptations of Evolutionary Ethics Paul Lawrence Farber,1994 Evolutionary theory tells us about our biological past can it also guide us to a moral future Paul Farber s compelling book describes a century old philosophical hope held by many biologists anthropologists psychologists and social thinkers that universal ethical and social imperatives are built into human nature and can be discovered through knowledge of evolutionary theory Farber describes three upsurges of enthusiasm for evolutionary ethics The first came in the early years of mid nineteenth century evolutionary theories the second in the 1920s and 30s in the years after the cultural catastrophe of World War I and the third arrived with the recent grand claims of sociobiology to offer a sound biological basis for a theory of human culture Unlike many who have written on evolutionary ethics Farber considers the responses made by philosophers over the years He maintains that their devastating criticisms have been forgotten thus the history of evolutionary ethics is essentially one of oft repeated philosophical mistakes Historians scientists social scientists and anyone concerned about the elusive basis of selflessness altruism and morality will welcome Farber s enlightening book

The Great Dinosaur Controversy Keith Parsons,2003-12-02 A historical review of the most important scientific controversies that have shaped our knowledge of dinosaurs since the discovery of important fossils in the 1820s In *The Great Dinosaur Controversy A Guide to the Debates* the major scientific disputes that have contributed to the understanding of dinosaurs come to light Each chapter presents a major controversy then ponders the lessons learned and their impact on the scientific field Colorful characters such as anti evolutionist Robert Owen Darwin s bulldog T H Huxley and dinosaur heretic Robert Bakker enliven the debates which range from the origin of dinosaurs and their posture to their evolution or retrogression and whether they were warm or cold blooded Two of the most recent debates concern how dinosaurs became extinct and whether or not birds are their descendents

The Natural History Review ,1864

Free Will and the Human Sciences in Britain, 1870-1910 Roger Smith,2015-07-28 From the late nineteenth century onwards religion gave way to science as the dominant force in society This led to a questioning of the principle of free will if the workings of the human mind could be reduced to purely physiological explanations then what place was there for human agency and self improvement Smith takes an in depth look at the problem of free will through the prism of different disciplines Physiology psychology philosophy evolutionary theory ethics history and sociology all played a part in the debates that took place His subtly nuanced navigation through these arguments has much to contribute to our understanding of Victorian and Edwardian science and culture as well as having relevance to current debates on the role of genes in determining behaviour

Making Modern Science

Peter J. Bowler, Iwan Rhys Morus, 2010-02-24 The development of science according to respected scholars Peter J Bowler and Iwan Rhys Morus expands our knowledge and control of the world in ways that affect but are also affected by society and culture In Making Modern Science a text designed for introductory college courses in the history of science and as a single volume introduction for the general reader Bowler and Morus explore both the history of science itself and its influence on modern thought Opening with an introduction that explains developments in the history of science over the last three decades and the controversies these initiatives have engendered the book then proceeds in two parts The first section considers key episodes in the development of modern science including the Scientific Revolution and individual accomplishments in geology physics and biology The second section is an analysis of the most important themes stemming from the social relations of science the discoveries that force society to rethink its religious moral or philosophical values Making Modern Science thus chronicles all major developments in scientific thinking from the revolutionary ideas of the seventeenth century to the contemporary issues of evolutionism genetics nuclear physics and modern cosmology Written by seasoned historians this book will encourage students to see the history of science not as a series of names and dates but as an interconnected and complex web of relationships between science and modern society The first survey of its kind Making Modern Science is a much needed and accessible introduction to the history of science engagingly written for undergraduates and curious readers alike

Darwin's Armada: Four Voyages and the Battle for the Theory of Evolution Iain McCalman, 2010-11-15 Sparkling an extraordinary true adventure story complete with trials tribulations and moments of exultation Kirkus Reviews starred review Award winning cultural historian Iain McCalman tells the stories of Charles Darwin and his staunchest supporters Joseph Hooker Thomas Huxley and Alfred Wallace Beginning with the somber morning of April 26 1882 the day of Darwin's funeral Darwin's Armada steps back and recounts the lives and scientific discoveries of each of these explorers who campaigned passionately in the war of ideas over evolution and advanced the scope of Darwin's work
