

The Anaesthetics of Architecture

Preface

This is a polemical work. In an age when manifestos and polemics have become somewhat unfashionable, such a work may appear out of place. Yet it is precisely because Western culture has developed into a largely tolerant, pluralistic society, dominated by a mild-mannered political correctness, that this book is so necessary. In an architectural culture whose liberal openness is always prone to collapse into a libertarian conformity, it will have a particular relevance. The book will no doubt prove controversial, but if it succeeds only in eliciting criticism, it will have achieved its primary objective of stirring up debate in what is perceived as an all too complacent domain.

The text is often extreme in its argumentation. In this it follows the 'fatal strategies' of Jean Baudrillard of pushing analyses to their limit. If, therefore, many of the arguments appear to be somewhat exaggerated, and to lead on occasions to potentially absurd generalisations, these should be recognised as part of a deliberate strategy. The text offers less a representation of reality, than a transfiguration of it, while nonetheless aiming to highlight a very real problem within contemporary architectural culture.

The book draws on contemporary philosophy and cultural theory. In particular, it seeks to offer an overview of a tradition of critical European thinking on the subject of the 'image', beginning with the work of Walter Benjamin and others, and continuing through to Guy Debord and Baudrillard. Whilst these thinkers do not share an identical outlook — indeed there are many differences and tensions between their

The Aesthetics of Environment Arnold Berleant, 2010-06-10 An engaging discussion of environment as aesthetic experience **Wonder, the Rainbow, and the Aesthetics of Rare Experiences** Philip Fisher, 1998 Why pause and study this particular painting among so many others ranged on a gallery wall Wonder which Descartes called the first of the passions is at play it couples surprise with a wish to know more the pleasurable promise that what is novel or rare may become familiar This is a book about the aesthetics of wonder about wonder as it figures in our relation to the visual world and to rare or new experiences In three instructive instances a pair of paintings by Cy Twombly the famous problem of doubling the area of a square and the history of attempts to explain rainbows Philip Fisher examines the experience of wonder as it draws together pleasure thinking and the aesthetic features of thought Through these examples he places wonder in relation to the ordinary and the everyday as well as to its opposite fear The remarkable story of how rainbows came to be explained fraught with errors half knowledge and incomplete understanding suggests that certain knowledge cannot be what we expect when wonder engages us Instead Fisher argues a detailed familiarity similar to knowing our way around a building or a painting is the ultimate meeting point for aesthetic and scientific encounters with novelty rare experiences and the genuinely new
