## **The Architecture Of Historic Lexington:**

*The Architecture of Historic Lexington* Royster Lyle (Jr.), 1977-07-01      *The Architecture of Historic Lexington* Royster Lyle, Pamela H. Simpson, 1980      *The Architecture of Historic Rockbridge* J. Daniel Pezzoni, 2015 This abundantly illustrated wide ranging volume captures the rich and diverse architectural history of Rockbridge County Virginia including the two cities of Lexington and Buena Vista While recent books have documented the area s social history this book fills a long recognized void by tracing the area s architectural heritage from the eighteenth century to the post World War II period Beginning with early log and stone structures on what was once Virginia s frontier the discussion moves on to the brick construction of the late eighteenth and early nineteenth centuries that produced some of the finest Federal homes in the Valley of Virginia The book covers the many styles that would follow often with their own vernacular interpretation T he Architecture of Historic Rockbridge is an enormously useful companion to *The Architecture of Historic Lexington* itself an invaluable resource now for forty years Including discussions of towns schools churches resorts and industrial buildings the new volume will satisfy the scholarly while presenting architectural analysis in an engaging manner accessible to a general readership The book is richly illustrated throughout with over two hundred color and black and white photographs including the work of internationally recognized photographer Sally Mann line drawings and historic maps Distributed for the Historic Lexington Foundation      *Virginia's Historic Courthouses* Margaret T. Peters, 1995 They examine historic structures ranging from the Essex County courthouse 1729 and the King William County courthouse built ca 1725 and one of the oldest public buildings in continuous use in the nation to the newer historic courthouses such as Richmond s massive Supreme Court State Library Building dedicated in 1941      *Antebellum Architecture of Kentucky* Clay Lancaster, 2014-07-15 During the eight decades preceding the Civil War Kentucky was the scene of tremendous building activity Located in the western section of the original English colonies midway between North and South Kentucky saw the rise of an architecture that combined the traditions of nationally known designers eager to achieve the refinements of their English mother culture alongside the innovativeness and bold originality proper to the frontier Tradition thus provided a tangible link with world architectural development while innovation offered refreshing variations The result was a distinctive regional architecture In his newest look at Kentucky architecture Clay Lancaster broadens his scope to include analyses of significant structures from throughout the commonwealth illustrating the entire range of stylistic development Like his acclaimed earlier book *Antebellum Houses of the Bluegrass* the current volume provides historical background as well as drawings photographs and floor plans showing both general features and details Among the many Kentucky buildings discussed are examples by such well known early American architects as Benjamin Henry Latrobe Thomas Jefferson James Dakin Isaiah Rogers Alexander J Davis and Francis Costigan as well as the work of local master builders such as Matthew Kennedy Micajah Burnett Gideon Shryock Thomas Lewinski and John McMurtry Also included are Kentucky buildings designed from nationally distributed

architectural books and builders guides Lancaster gives special attention to the Geometric Style which evolved further and produced more noteworthy monuments in Kentucky than anywhere else in America Such buildings in turn bestowed a simplicity and straightforwardness on structures in later styles As Lancaster shows the architecture that resulted from Kentucky's fertile eclecticism constitutes a rich and rewarding architectural heritage All lovers of fine architecture will treasure this handsome and informative book      Clay Lancaster's Kentucky James D. Birchfield,2014-11-04 Clay Lancaster was infected by a love of architecture at an early age a gentle madness from which he never cared to recover From the Foreword by Roger W Moss It is easy to take for granted the visual environment that we inhabit Familiarity with routes of travel and places of work or leisure leads to indifference and we fail to notice incremental changes When a dilapidated building is eliminated by new development it is forgotten as soon as its replacement becomes a part of our daily landscape When an addition is grafted onto the shell of a house fallen out of fashion or function onlookers might notice at first but the memory of its original form is eventually lost Also forgotten is the use a building once served From historic homes to livestock barns each structure holds a place in the community and can tell us as much about its citizens as their portraits and memoirs Such is the vital yet intangible role that architecture plays in our collective memory Clay Lancaster 1917 2000 began during the Great Depression to document and to encourage the preservation of America's architectural patrimony He was a pioneer of American historic preservation before the movement had a name Although he established himself as an expert on Brooklyn brownstones and California bungalows the nationally known architectural historian also spent four decades photographing architecture in his native Kentucky Lancaster did not consider himself a photographer His equipment consisted of nothing more complex than a handheld camera and his images were only meant for his own personal use in documenting memorable and endangered structures He had the eye of an artist however and recognized the importance of vernacular architecture The more than 150 duotone photographs in Clay Lancaster's Kentucky preserve the beauty of commonplace buildings as well as historic mansions and monuments With insightful commentary by James D Birchfield about the photographs and about Lancaster's work in Kentucky the book documents the many buildings and architectural treasures both existing and long gone whose images and stories remain a valuable part of the state's heritage      **Historic Architecture of Lexington, Kentucky, and the Blue Grass Region** Wanda V. Dole,1979      *The Architecture of William Lawrence Bottomley* Susan Hume Frazer,2007 Beautiful production of fine cloth inlaid image to front cover see through jacket      *Houses of God* Peter W. Williams,2024-04-22 Houses of God is the first broad survey of American religious architecture a cultural cross country expedition that will benefit travelers as much as scholars Beautifully illustrated with over 100 photographs some by well known photographers such as Walker Evans and Dorothea Lange this handsome book provides a highly accessible look at how Americans shape their places of worship into multifaceted reflections of their culture beliefs and times      **The Religious Life of Robert E. Lee** R. David Cox,2017-04-12 The first close examination of how

Robert E Lee's faith shaped his life Robert E Lee was many things accomplished soldier military engineer college president family man agent of reconciliation polarizing figure He was also a person of deep Christian conviction In this biography of the famous Civil War general R David Cox shows how Lee's Christian faith shaped his crucial role in some of the most pivotal events in American history Delving into family letters and other primary sources some of them newly discovered Cox traces the lifelong development of Lee's convictions and how they influenced his decisions to stand with Virginia over against the Union and later to support reconciliation and reconstruction in the years after the Civil War Faith was central to Lee's character Cox argues so central that it directed and redirected his life especially in the aftermath of defeat
