Stability and Degradation of Organic and Polymer Solar Cells Frederik C. Krebs, 2012-04-02 Organic photovoltaics OPV are a new generation of solar cells with the potential to offer very short energy pay back times mechanical flexibility and significantly lower production costs compared to traditional crystalline photovoltaic systems A weakness of OPV is their comparative instability during operation and this is a critical area of research towards the successful development and commercialization of these 3rd generation solar cells Covering both small molecule and polymer solar cells Stability and Degradation of Organic and Polymer Solar Cells summarizes the state of the art understanding of stability and provides a detailed analysis of the mechanisms by which degradation occurs Following an introductory chapter which compares different photovoltaic technologies the book focuses on OPV degradation discussing the origin and characterization of the instability and describing measures for extending the duration of operation Topics covered include Chemical and physical probes for studying degradation Imaging techniques Photochemical stability of OPV materials Degradation mechanisms Testing methods Barrier technology and applications Stability and Degradation of Organic and Polymer Solar Cells is an essential reference source for researchers in academia and industry engineers and manufacturers working on OPV design development and implementation

The Dark Matter Recordings Philip Strackbein, 2021-06-24 Philip is a Christian who works for NASDA and is in charge of the Hubble Telescope He makes some filters for the telescope that enable him to view the dark matter that exists in the universe Then he discovers that the dark matter which has the shape of ovals have been video recording everything that has ever happened in the universe He learns how to access these recordings The first thing he views is the creation of the world After the creation of man there was a population explosion that caused the whole Earth to be filled in a relatively short period of time Just think what would happen if everyone having the same intelligence that we have lived to be eight hundred to nine hundred years old and there was no birth control Who stops to think that Cain and Abel would have been over a hundred years old at the time that Cain killed Abel and that Eve would have had over fifty more children by that time and that the population of the world by that time could have been over ten thousand A large portion of the novel presents the five hundred years of Noah's life before the Great Flood The novel without violating Scripture shows that mankind before the flood was very advanced in technology It proposes a very different explanation for the existence of UFOs than most people imagine Human beings living on the Earth had succeeded in finding a way to overcome gravity and inertia had traveled to outer space and had established colonies on
