Lang, Helen L.W.

Chan, 2007-12-31 The eld of ferroelectricity is a very active one Many hundreds of papers in this eld are published each year and a large number of local and international conferences are held We felt that it would be appropriate at this time to publish a set of papers in a single journal describing some of the most active areas in the eld The Journal of Materials Science agreed to publish a special issue on ferroelectricity Accordingly we sent requests for papers to a number of research groups around the world It was difficult to select a small number of groups from among the many excellent ones in the eld and we apologize to those not included We received 24 manuscripts from groups in North America Asia and Europe each one of which was reviewed by two referees The papers include reviews and current research both experimental and theoretical It was especially satisfying that the authors included not only established researchers but also many younger people who are destined to continue in the eld in the future The special issue entitled **Frontiers of Ferroelectricity** appeared as Volume 41 Issue 1 of the Journal of Materials Science in January 2006 Because we believed that many researchers and students would find great value in having the complete set of papers on their bookshelf we suggested to the editors of Springer that **Frontiers of Ferroelectricity** should be published in book form **Design Requirements for Amorphous Piezoelectric Polymers** Z.

Ounaies, 1999 An overview of the piezoelectric activity in amorphous piezoelectric polymers is presented The criteria required to render a polymer piezoelectric are discussed Although piezoelectricity is a coupling between mechanical and electrical properties most research has concentrated on the electrical properties of potentially piezoelectric polymers In this work we present comparative mechanical data as a function of temperature and offer a summary of polarization and electromechanical properties for each of the polymers considered **Polymers for Electronic & Photonic Application** C.

P. Wong, 2013-10-22 The most recent advances in the use of polymeric materials by the electronic industry can be found in **Polymers for Electronic and Photonic Applications** This book provides in depth coverage of photoresist for micro lithography microelectronic encapsulants and packaging insulators dielectrics for multichip packaging electronic and photonic applications of polymeric materials among many other topics Intended for engineers and scientists who design process and manufacture microelectronic components this book will also prove useful for hybrid and systems packaging managers who want to be informed of the very latest developments in this field Presents most recent advances in the use of polymeric materials by the electronic industry Contributions by foremost experts in the field **FeFET Devices, Trends, Technology and Applications** Balwinder Raj, Shiromani Balmukund Rahi, Nandakishor Yadav, 2025-04-09 **FeFET Devices Trends Technology and Applications** is essential for anyone seeking an in depth understanding of the latest advancements in

ferroelectric devices as it offers comprehensive insights into research techniques novel materials and the historical context of semiconductor development This book serves as an encyclopedia of knowledge for state of the art research techniques for the miniaturization of ferroelectric devices This volume explores characteristics novel materials used modifications in device structure and advancements in model FET devices Though many devices following Moore s Law and More Moore are proposed a complete history of existing and proposed semiconductor devices is now available here This resource focuses on developments and research in emerging ferroelectric FET devices and their applications providing unique coverage of topics covering recent advancements and novel concepts in the field of miniaturized ferroelectric devices **Ferroelectric**
