The Archaeological And Linguistic Reconstruction Of African History:

The Archaeological and Linguistic Reconstruction of African History Christopher Ehret, Merrick Posnansky, 1982-01-01

A History of African Societies to 1870 Elizabeth Isichei, 1997-04-13 This comprehensive and detailed exploration of the African past from prehistory to approximately 1870 is intended to provide a fully up to date complement to the Cambridge History of Africa Reflecting several emphases in recent scholarship it focusses on the changing modes of production on gender relations and on ecology laying particular stress on viewing history from below A distinctive theme is to be found in its analyses of cognitive history The work falls into three sections The first comprises a historiographic analysis and covers the period from the dawn of prehistory to the end of the Early Iron Age The second and third sections are for the most part organised on regional lines the second section ends in the sixteenth century the third carries the story on to 1870 A second volume now in preparation will cover the period from 1870 to 1995 This book attempts a more rounded view of African history than most of the other textbooks on the subject addressed to a largely undergraduate level student Earlier histories have tended to ignore some of the current foci in the scholarly literature on Africa generally not reflected in the textbooks these include discussions of topical issues like ecology and gender Isichei's book is also more radical

Archaeology, Language, and the African Past Roger Blench, 2006-06-22 Archaeology Language and the African Past is an overview of theories and methods a fusion of African linguistics and archaeology Roger Blench provides a comprehensive look at the history of all African language families incorporating the latest linguistic classifications current evidence from archaeology genetic research and recorded history This original and definitive volume examines the economic culture of the continent _from major crops and plant life to animals and livestock_ from a multi dimensional perspective It provides students of linguistics archaeology and anthropology with a critical discussion on the history of African languages and the cultures they articulate

Writing African History John Edward Philips, 2006 A comprehensive evaluation of how to read African history Writing African History is an essential work for anyone who wants to write or even seriously read African history It will replace Daniel McCall's classic Africa in Time Perspective as the introduction to African history for the next generation and as a reference for professional historians interested readers and anyone who wants to understand how African history is written Africa in Time Perspective was written in the 1960s when African history was a new field of research This new book reflects the development of African history since then It opens with a comprehensive introduction by Daniel McCall followed by a chapter by the editor explaining what African history is and is not in the context of historical theory and the development of historical narrative the humanities and social sciences The first half of the book focuses on sources of historical data while the second half examines different perspectives on history The editor's final chapter explains how to combine various sorts of evidence into a coherent account of African history Writing African History will become the most important guide to African history for the 21st century Contributors Bala Achi Isaac Olawale Albert Diedre L Badjo

Encyclopedia of African History 3-Volume Set KEVIN SHILLINGTON.,2005 *Great Zimbabwe* Joseph O. Vogel,2019-08-22 First Published in 1994 This research guide was written as a comprehensive though by no means exhaustive survey of the literature pertinent to studying the indigenous complex societies of south central Africa Although the paramount focus of the compilation was the archaeology of Great Zimbabwe the author has drawn from a broad geographical area and a wider period of time than that usually associated with Zimbabwean culture in order to demonstrate the cultural background for the growth of monumental trading towns in south central Africa *The Peopling of Africa* James L. Newman,1995-01-01 Discovering the African past takes one on a journey back to the origins of humanity over four million years ago which is where James L Newman begins his account of the continent s peoples He ends it at the onset of the colonial era in the late nineteenth century noting that Africa and Africans deserve to be known on their own terms and to achieve this goal we need to improve our understanding of what took place before colonialism rewrote many of life s rules African identities constitute one of Newman s main themes and thus he discusses the roles played by genetic background language occupation and religion Population distribution is the other main theme running through the book As a geographer the author uses regions spaces and places as his filters for viewing how Africans have responded through time to differing natural and human environmental circumstances Drawing on the fields of biology archaeology linguistics history anthropology and demography as well as geography Newman describes the richness and diversity of Africa s inhabitants the technological changes that transformed their lives how they formed polities from small groups of kin to states and empires and how they were influenced by external forces particularly the slave trade Maps are an important part of the book conveying information and helping readers interrelate local regional continental and global contexts *Archaeologies of Us and Them* Charlotta Hillerdal,Anna Karlström,Carl-Gösta Ojala,2017-02-17 *Archaeologies of Us and Them* explores the concept of indigeneity within the field of archaeology and heritage and in particular examines the shifts in power that occur when we define the other by categorizing them as indigenous Recognizing the complex and shifting distinctions between indigenous and non indigenous pasts and presents this volume gives a nuanced analysis of the underlying definitions concepts and ethics associated with this field in order to explore Indigenous archaeology as a theoretical ethical and political concept Indigenous archaeology is an increasingly important topic discussed worldwide and as such critical analyses must be applied to debates which are often surrounded by political correctness and consensus views Drawing on an international range of global case studies this timely and sensitive collection significantly contributes to the development of archaeological
