The Architecture Of Supercomputers Titan A Case Study:

The Architecture of Supercomputers Daniel P. Siewiorek, Philip John Koopman, 2014-05-10 The Architecture of Supercomputers Titan A Case Study describes the architecture of the first member of an entirely new computing class the graphic supercomputing workstation known as Titan This book is divided into seven chapters Chapter 1 provides an overview of the Titan architecture including the motivation organization and processes that created it A survey of all the techniques to speed up computation is presented in Chapter 2 Chapter 3 reviews the issue of particular benchmarks and measures while Chapter 4 analyzes a model of a concurrency hierarchy extending from the register set to the entire operating system The architecture of Titan graphics supercomputer and its implementation are considered in Chapter 5 Chapter 6 examines the performance of Titan in terms of the various information flow data rates The last chapter is devoted to the actual performance on benchmark kernels and how the architecture and implementation affect performance This publication is recommended for architects and engineers designing processors and systems **Choice**, 1992 **Big Data Technologies**

for Monitoring of Computer Security: A Case Study of the Russian Federation Sergei Petrenko, 2018-05-17 This timely book offers rare insight into the field of cybersecurity in Russia a significant player with regard to cyber attacks and cyber war Big Data Technologies for Monitoring of Computer Security presents possible solutions to the relatively new scientific technical problem of developing an early warning cybersecurity system for critically important governmental information assets Using the work being done in Russia on new information security systems as a case study the book shares valuable insights gained during the process of designing and constructing open segment prototypes of this system Most books on cybersecurity focus solely on the technical aspects But Big Data Technologies for Monitoring of Computer Security demonstrates that military and political considerations should be included as well With a broad market including architects and research engineers in the field of information security as well as managers of corporate and state structures including Chief Information Officers of domestic automation services CIO and chief information security officers CISO this book can also be used as a case study in university courses *Cyber Security Innovation for the Digital Economy* Sergei Petrenko, 2022-09-01 Cyber Security Innovation for the Digital Economy considers possible solutions to the relatively new scientific technical problem of developing innovative solutions in the field of cyber security for the Digital Economy The solutions proposed are based on the results of exploratory studies conducted by the author in the areas of Big Data acquisition cognitive information technologies cognitive technologies new methods of analytical verification of digital ecosystems on the basis of similarity invariants and dimensions and computational cognitivism involving a number of existing models and methods In practice this successfully allowed the creation of new entities the required safe and trusted digital ecosystems on the basis of the development of digital and cyber security technologies and the resulting changes in their behavioral preferences Here the ecosystem is understood as a certain system of organizations created around a certain

Technological Platform that use its services to make the best offers to customers and access to them to meet the ultimate needs of clients legal entities and individuals The basis of such ecosystems is a certain technological platform created on advanced innovative developments including the open interfaces and code machine learning cloud technologies Big Data collection and processing artificial intelligence technologies etc The mentioned Technological Platform allows creating the best offer for the client both from own goods and services and from the offers of external service providers in real time This book contains four chapters devoted to the following subjects Relevance of the given scientific technical problems in the cybersecurity of Digital Economy Determination of the limiting capabilities Possible scientific and technical solutions Organization of perspective research studies in the area of Digital Economy cyber security in Russia *The British National Bibliography* Arthur James Wells,1992 *Computer Sciences Technical Report* ,1991 □□□□□□□□ ,1992 Books in Print ,1994 **The Cumulative Book Index** ,1992 A world list of books in the English language Forthcoming Books Rose Army,1992
