Stainton, 2001-07-27 This is the only contemporary text to cover both epistemology and philosophy of mind at an introductory level It also serves as a general introduction to philosophy it discusses the nature and methods of philosophy

as well as basic logical tools of the trade The book is divided into three parts The first focuses on knowledge in particular skepticism and knowledge of the external world and knowledge of language The second focuses on mind including the metaphysics of mind and freedom of will The third brings together knowledge and mind discussing knowledge of mind other minds and our own and naturalism and how epistemology and philosophy of mind come together in contemporary cognitive science Throughout the authors take into account the needs of the beginning philosophy student They have made very effort to ensure accessibility while preserving accuracy

The New Critical Thinking Jack Lyons, Barry Ward, 2024-05-21 This book aims to improve real world critical thinking Traditional critical thinking texts neglect two crucial facts First as psychologists have shown many of our mistakes are caused not by faulty formal reasoning but because we bypass it in favor of intuitive often unreliable heuristics Second good critical thinking requires not only the proper assessment of inference but also of our premises the evaluation of information sources is of fundamental importance especially in this internet era of fake news and politicized science This highly innovative text is psychologically informed both in its diagnosis of inferential errors and in teaching students how to watch out for and circumnavigate their natural intellectual blind spots It also incorporates insights from epistemology and philosophy of science to formulate best practices for assessing information sources on the internet and other media The result is a practical hands on primer for real world critical thinking The authors bring more than five combined decades of classroom experience to the subject covering the usual core topics of deductive inductive causal and probabilistic inference argument identification reconstruction and diagramming while also extending the text s scope to include testimony the nature and credibility of science rhetoric and dialectical argumentation The Second Edition further develops and refines these innovations combining in depth discussion of fake news and conspiracy theories with exercises and projects designed to teach broadly applicable source assessment skills There is also a more nuanced positive account of science that emphasizes its continuity with commonsense causal reasoning For instructors there are additional online resources notably banks of exam questions with solutions and various class projects

Key Features Uses contemporary psychological explanations and remedies for pervasive errors in belief formation No other critical thinking text generally applies this psychological approach Rigorously addresses the evaluation of premises based on testimony in particular the testimony of internet sources Carefully explains the concept of validity paying particular attention to distinguishing logical possibility from other species of possibility Uses frequency trees as a simple and reliable alternative to more complicated Bayesian methods Uses arguments maps which improve students reasoning and argument evaluation

Key Updates to the Second Edition Expanded discussion of the psychology of reasoning and belief including treatment of motivated reasoning Uses a conventional truth table based approach to propositional logic while incorporating a more intuitive psychologically informed approach to the logic of conditionals New Summary Boxes Enhanced treatment of testimony with an expanded discussion of fake news conspiracy theories and the application of general epistemic principles to navigate the extremes of

gullibility and unmotivated skepticism New exercises that emphasize practical hands on source assessment skills An improved discussion of the nature of science emphasizing the central role of causal inference and the multi generational cumulative character of scientific knowledge A new Index of Arguments summarizing the most common argument forms and associated defeaters for the inductive forms New online content including exams and additional questions plus solutions suitable for upload to course management software e g Blackboard etc For online resources for students and instructors use the Instructor Student Resources and Support Material links below

Philosophical Manuscripts David Lewis,2023-09-28 David Lewis 1941 2001 was a celebrated and influential figure in analytic philosophy When Lewis died he left behind a large body of unpublished notes manuscripts and letters This volume contains two longer manuscripts which Lewis had originally intended to turn into books and thirty one shorter items The longer manuscripts are The Paradoxes of Time Travel his David Gavin Young Lectures at the University of Adelaide and Confirmation Theory which is based on a graduate course on probability and logic that he gave at UCLA Lewis s described his purposes in The Paradoxes of Time Travel as being 1 to solve a philosophical problem hitherto largely ignored or casually mis solved by philosophers 2 to introduce the layman to various topics in metaphysics since our problem turns out to connect with many more familiar ones and 3 to show of several of my favorite doctrines and methods in metaphysics By contrast Confirmation Theory is a technical work in which Lewis aimed to present in a unified fashion what he considered to be the best from competing theories of confirmation Lewis described the work as Mathematically self contained with proofs for the major theorems but the mathematics is kept down to hairy high school algebra The thirty one shorter items cover such topics as causation freedom of the will probability counterparts reference logic value and divine evil They are included here both for their intrinsic philosophical interest and their historical value This volume also contains an intellectual biography of the young David Lewis by the editors

April Showers Louis Silvers,1921 **Still Complaining** Jim Foster,2001-11-01 Once again we are blessed with yet another collection of Jim Foster s ravings His first book I hate to complain but with its views on everything from bank mergers to the author s 30 year love affair with Sophia Loren is being hailed as a classic example though of what no one is quite sure Readers will be amazed at the depth of the author s knowledge on just about any subject and his total inability to keep it to himself What should you do if a comet falls on you at 1000 mph What are the best pick up lines for the man or woman looking for romance Why doesn t Julia Roberts shave her underarms All this and many other bits of useless information will have Canadians from coast to coast chuckling out loud popping their eyes in wonder and simply scratching their heads in bewilderment
