Social Economics Of Old Age:

Old Age Income Assurance, 1968 *The Social Economics of Health Care* John B Davis, 2001-05-10 For too long now the issue of health care reform has been dominated by the techniques of mainstream economics and the constant application of the tools of cost benefit analysis to an area that does not suit it Issues such as privacy genetic testing and the allocation of organ transplants require a more sensitive approach to the setting of budgets and so a more socially responsible attitude towards health care economics is emerging John Davis has gathered together an impressive range of contributors to explore these phenomena *Revisiting Economic Vulnerability in Old Age* Julia Henke, 2020-03-04 This book offers an interdisciplinary analysis of the experience of economic vulnerability among older adults Drawing on various fields ranging from happiness economics to stress research it integrates assessments from objective and subjective measurement perspectives The book offers nuanced insights into prevalent experiences of low economic quality of life in wealthy countries using empirical data from Switzerland A sample of some 1500 adults aged 65-84 is taken as the basis for a systematic comparison of the demographic and socioeconomic characteristics of three overlapping groups of potentially vulnerable pensioners those who are income poor objective measure those who report difficulties making ends meet subjectively self assessed measure and those who worry about not having enough money for current expenses subjectively perceived measure Theoretical and empirical evidence is offered for the distinctiveness of the two subjective indicators one of which assesses the experience of economic strain while the other captures the individual's response in terms of stress The conceptual contribution of this research includes a typology of economic vulnerability eight distinct profiles emerge at the intersection of the objective self assessed and perceived measures These profiles correspond to specific risk constellations and they reflect varying degrees of human agency in dealing with economic vulnerability *Social, Economic, and Health Aspects of Low Fertility* Arthur A. Campbell, 1980 **Aging, Economic Growth, and Old-age Security in Asia** Donghyun Park, Sang-Hyop Lee, Andrew Mason, 2012-01-01 Population aging is perhaps the single biggest economic and social obstacle confronting Asia's future The region wide demographic transition towards an older population is fundamentally reshaping the demographic landscape and is giving rise to two key socio economic challenges This timely book provides an in depth analysis of these challenges and presents concrete policy options for tackling them First the expert contributors argue Asia must find ways to sustain rapid economic growth in the face of less favorable demographics which implies slower growth of the workforce Second they contend Asia must find ways to deliver affordable adequate and sustainable old age economic security for its growing elderly population Underpinned by rigorous analysis a wide range of concrete policy options for sustaining economic growth while delivering economic security for the elderly are then presented These include Asia wide policy options relevant to the entire region such as building up strong national pension systems whilst other policy options are more relevant to sub groups of countries This stimulating and informative book will be of great interest to academics students and researchers

with an interest in Asian studies economics generally and more specifically public sector economics

Social Work with Older People Ann McDonald, 2010-03-08 Social Work with Older People provides an authoritative and practical guide to working with older people in a range of settings It addresses the complexities of individual work with older people as well as work with families groups and the wider community and is not afraid to tackle the challenges as well as opportunities of practice in this area The book begins by explaining the demographic changes that have led to a greying of the general population It goes on to discuss the diversity in experiences of ageing across society and the range of issues which confront older people and those who wish to work proactively with them Clear attention is paid to the processes of assessment care planning and review with readers encouraged to reflect on developing good practice through case studies and exercises Although it has a strong practical emphasis the book also stresses the value of theoretical perspectives with insights from fields such as sociology and psychology woven throughout the book Clear links are also made to policy guidelines and organizational standards without losing sight of the deeper often more complex issues that arise when working with older people Social Work with Older People will be essential reading for social work students and practitioners but also for others who are interested in the development of practice with older people as citizens and service users

Neoliberalising Old Age John Macnicol, 2015-09-29 Governments are encouraging later life working and state pension ages are being raised There is also a growing debate on intergenerational equity and on ageism age discrimination John Macnicol one of Europe's leading academic analysts of old age and ageing examines the effect of neoliberalism on the recent ageing and social policy agenda in the UK and the USA He argues that the demographic and economic impulses behind recent policy changes are in fact less important than the effect of neoliberalism as an ideology which has caused certain key problems to be defined in a particular way The book outlines past theories of old age and examines pensions reform the debate on life expectancy gains the causes of retirement the idea of intergenerational equity the current debate on ageism age discrimination and the likely human consequences of raising state pension ages

Research Findings in the Economics of Aging David A. Wise, 2010-04-15 The baby boom generation's entry into old age has led to an unprecedented increase in the elderly population The social and economic effects of this shift are significant and in Research Findings in the Economics of Aging a group of leading researchers takes an eclectic view of the subject Among the broad topics discussed are work and retirement behavior disability and their relationship to the structure of retirement and disability policies While choices about when to retire are made by individuals these decisions are influenced by a set of incentives including retirement benefits and health care and this volume includes cross national analyses of the effects of such programs on these decisions Furthermore the volume also offers in depth analysis of the effects of retirement plans employer contributions and housing prices on retirement It explores well established relationships among economic circumstances health and mortality as well as the effects of poverty and lower levels of economic development on health and life satisfaction By combining micro and macro evidence this volume continues

a tradition of expanding the research agenda on the economics of aging **Old Age In Europe** Kathrin Komp, Marja Aartsen, 2013-01-24 Europe currently is the oldest continent in the world and its population is still ageing This demographic shift affects society economy and welfare states Scholars from various disciplines and the public noted this development and wonder what effects it may have but lack adequate information They call for explanations that are concise and easily accessible The book at hand fills this lacuna It introduces readers to the most important developments theories concepts and discussions in ageing studies always keeping an eye on the current situation in Europe Each chapter adopts the perspective of a different discipline e g public health sociology economics or technology To make the explanations easy to understand the book includes learning tools such as learning objectives multiple choice questions and a glossary **Old Age and Urban Poverty in the Developing World** P. Lloyd-Sherlock, 1997-07-23 Many countries in the developing world are facing a rapid acceleration in population ageing To date this problem has generated little interest either from academics or policy makers Studies which focus exclusively on social security are of little relevance for the majority of elderly in these regions for whom the possibilities of saving or making pension contributions are remote This book takes a more comprehensive approach combining analysis of social security issues in all developing countries with micro level case studies of poor urban elderly survival strategies in Buenos Aires
