Social Movements And Networks Relational Approaches To Collective Action:

Social Movements and Networks Mario Diani, Doug McAdam, 2003 *Social Movements and Networks* examines the extent to which a network approach should inform research on collective action. For the first time in a single volume leading social movements researchers systematically map out and assess the contribution of social network approaches to their field of enquiry in light of broader theoretical perspective. By exploring how networks affect individual contributions to collective action in both democratic and non democratic organizations and how patterns of inter organizational linkages affect the circulation of resources within and between movements the authors show how network concepts improve our grasp of the relationship between social movements and elites and of the dynamics of the political processes. Research in Social Movements, Conflicts and Change Patrick G. Coy, 2010-03-05 *Research in Social Movements Conflicts and Change* showcases deeply empirical and often multi method research by senior and junior scholars alike. Comparative analysis and qualitative case studies push into new territories in this illuminating and important research which seeks to define and advance the multiple fields reflected in the series title. *Social Networks and Social Movements* Nick Crossley, 2016-03-22 The concept of networks and the techniques of social network analysis have each assumed increasing importance in social science in recent years not least in relation to the analysis of collective action and particularly social movements. This timely collection offers a fascinating glimpse into the state of the art. Each chapter uses network analysis to tackle a different question regarding the nature and dynamics of social movement activity and each reflects upon the advantages and limitations of the method for its purposes. The case studies focused upon are drawn from a variety of national contexts both contemporary and historical and both the methods used and the uses to which they are put are no less diverse. A must have book for anybody interested in social movement networks and contemporary ways of analysing them. This book was published as a special issue of *Social Movement Studies*. The Oxford Handbook of Political Networks Jennifer Nicoll Victor, Alexander H. Montgomery, Mark Lubell, 2018 Politics is intuitively about relationships but until recently the network perspective has not been a dominant part of the methodological paradigm that political scientists use to study politics. This volume is a foundational statement about networks in the study of politics. *Environmentalism, Resistance and Solidarity* B. Doherty, T. Doyle, 2013-10-16 Drawing from a rich mix of survey data interviews and access to internal meetings Brian Doherty and Timothy Doyle show how FoEI has developed a distinctive environmentalism which allows for the differences in context between regions and across the North South divide.

Contentious Minds Florence Passy, Gian-Andrea Monsch, 2020 This is an open access title available under the terms of a CC BY NC ND 4.0 International license. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Why does the mind matter for collective action? In *Contentious Minds* Florence Passy and Gian Andrea

Monsch explain how cognitive and relational processes allow activists participate in and sustain their commitment to activism Based on a wide array of survey and interview data with activists engaged in protest volunteering and unions they highlight how a commitment community develop shared values identities and meanings through interaction The interplay of talk and ties enables stories and meanings to be constructed and exchanged conveys worldviews and intentions that are modified through ongoing conversations and reinforces and maintains commitment over time Passy and Monsch s ambitious work brings the mind and culture back into the study of social movements and highlights the crucial role social networks play in constructing the communities and shared values that sustain commitment

To Care for Creation Stephen Ellingson,2016-08-26 Controversial megachurch pastor Mark Driscoll proclaimed from a conference stage in 2013 I know who made the environment and he s coming back and going to burn it all up So yes I drive an SUV The comment which Driscoll later explained away as a joke highlights what has been a long history of religious anti environmentalism Given how firmly entrenched this sentiment has been surprising inroads have been made by a new movement with few financial resources which is deeply committed to promoting green religious traditions and creating a new environmental ethic To Care for Creation chronicles this movement and explains how it has emerged despite institutional and cultural barriers as well as the hurdles posed by logic and practices that set religious environmental organizations apart from the secular movement Ellingson takes a deep dive into

the ways entrepreneurial activists tap into and improvise on a variety of theological ethical and symbolic traditions in order to issue a compelling call to arms that mobilizes religious audiences Drawing on interviews with the leaders of more than sixty of these organizations Ellingson deftly illustrates how activists borrow and rework resources from various traditions to create new meanings for religion nature and the religious person s duty to the natural world
