

Introduction to Health and social policy

Homework

In my opinion, welfare states still protect cradle to the grave because of the support that they provide, for example, people can claim benefits if they need extra support for any number of reasons, and support with education is provided by state schools for those who cannot afford private schools or scholarships/bursaries for those who cannot afford private schools. Although there are many benefits to the welfare state, there are also some disadvantages. For example, people who bought council housing were unable to afford the additional costs associated with maintaining the house, and the support that was provided had some disadvantages as well.

Beveridge's five giants have been defeated to a certain degree due to being supported with housing, finding a good education, finding and gaining suitable employment along with increasing health and reducing poverty. However, there are still issues in society that are preventing the five giants from being defeated further.

The areas I believe that has made the most progress has been education and health due to policies being implemented that have brought improvements to health and decreased illness or made the public more aware of diseases and illnesses, another area is education because of policies allowing children of all background and various skills to have the education to help progress them further. But areas where I think have made the least progress are poverty and housing especially now as the cost of living crisis has impacted people's ability to afford to house or prevent poverty.

Debating universalism vs selectivity

Child benefit should be selective due to not everyone needs to seek or claim benefit such a well-off person doesn't necessarily need to claim child benefit. Another reason could be the resources could be wasted or people could fall through the cracks if universalism is applied to child benefit.

of postmodernity might improve understanding of welfare issues in the 1990s and assessing the relevance of theories of diversity and difference to mainstream and critical social policy traditions this book will be an essential text for all students of social policy social administration social work and sociology
