Social Reconstructions Of The World Automobile Industry Competition Power And Industrial Flexibility:

Social Reconstructions of the World Automobile Industry Frederic C. Deyo, 2016-07-27 This book assesses the varying ways in which automobile assemblers in several countries of East and Southeast Asia Europe and the Americas have sought to enhance their efficiency and flexibility in response to heightened global competition during the 1980s and early 1990s It then explores the implications of such managerial strategies for workers and trade unions and the responses of unions in seeking to preserve or enhance worker welfare and voice under industrial restructuring *The Global Automotive Industry* Paul Nieuwenhuis, Peter Wells, 2015-08-06 The automotive industry is still one of the world's largest manufacturing sectors but it suffers from being very technology focused as well as being relatively short term focused There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it The Global Automotive Industry addresses this need and is a first port of call for any academic official or consultant wanting an overview of the state of the industry An international team of specialist researchers both from academia and business review and analyse the key issues that make vehicle manufacturing still the world's premier manufacturing sector closely tied in with the fortunes of both established and newly emerging economies In doing so it covers issues related to manufacturing both established practices as well as new developments issues relating to distribution marketing and retail vehicle technologies and regulatory trends and crucially labour practices and the people who build cars In all this it explains both how the current situation arose and also likely future trajectories both in terms of social and regulatory trends as the technological marketing and labour practice responses to those leading in many cases to the development of new business models Key features Provides a global overview of the automotive industry covering its current state and considering future challenges Contains contributions from international specialists in the automotive sector Presents current research and sets this in an historical and broader industry context Covers threats to the industry including globalization economic and environmental sustainability The Global Automotive Industry is a must have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools governments and graduate and undergraduate students in automotive engineering After Lean Production Thomas A. Kochan, Russell D. Lansbury, John Paul MacDuffie, 2018-09-05 Nearly every country that produces cars views the automobile industry as strategically important because of its direct economic significance and because it serves as a bellwether for innovation in employment conditions In this book industrial relations experts from eleven countries consider the state of the industry worldwide They are particularly interested in assessing whether the loudly heralded model of lean production initiated by Toyota has become pervasive The contributors focus on employment practices the way work is organized how workers and managers interact the way worker representatives respond to lean production strategies and the nature of the adaptation and innovation process itself **The Global Korean Motor Industry** Russell D. Lansbury, Chung-Sok

Suh,Seung-Ho Kwon,2007-01-24 Based upon extensive fieldwork in India and Korea this book is a detailed account of the globalization of the Korean automobile industry and Hyundai Motor Company one of the most prominent of the new Korean multinational corporations **Inside China's Automobile Factories** Lu Zhang,2015 In Inside China s Automobile

Factories Lu Zhang explores the current conditions subjectivity and collective actions of autoworkers in the world s largest and fastest growing automobile manufacturing nation Based on years of fieldwork and extensive interviews conducted at seven large auto factories in various regions of China Zhang provides an inside look at the daily factory life of autoworkers and a deeper understanding of the roots of rising labor unrest in the auto industry Combining original empirical data and sophisticated analysis that moves from the shop floor to national political economy and global industry dynamics the book develops a multilayered framework for understanding how labor relations in the auto industry and broader social economy can be expected to develop in China in the coming decades **Capital beyond Borders** Kenneth P. Thomas,2016-07-27

This book challenges the established wisdom regarding the balance of bargaining power between multinational corporations and host governments Most theories beginning with Raymond Vernon s claim that the bargaining power of host states should increase over time This work shows the opposite is true at least for the automobile industry in the industrialized world The reason for this is the growing mobility of production which undercuts host states bargaining positions Capital mobility is thus central to both firm state relations and IPE generally **The Social and Labour Impact of Globalization in the**

Manufacture of Transport Equipment Paul Bailey,Pallavi Rai,1999 This objective of this study is to exchange ideas and experience with a view to fostering a broader understanding of sector specific issues and problems developing an international tripartite consensus on sectoral concerns and providing guidance for national and international policies and measures to deal with related issues and problems promoting the harmonization of all ILO activities of a sectoral character and acting as a focal point between the Office and its constituents and providing technical advice practical assistance and support to facilitate the application of international labour standards **New Frontiers of the Automobile Industry** Alex

Covarrubias V.,Sigfrido M. Ramírez Perez,2019-11-28 Analysing developments in digital technologies and institutional changes this book provides an overview of the current frenetic state of transformation within the global automobile industry An ongoing transition brought about by the relocation of marketing design and production centres to emerging economies and experimentation with new mobility systems such as electrical autonomous vehicles this process poses the question as to how original equipment manufacturers OEMs and newcomers can remain competitive and ensure sustainability With contributions from specialists in the automobile sector this collection examines the shifts in power and geographical location occurring in the industry and outlines the key role that public policy has in generating innovation in entrepreneurial states Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry this book will provide valuable reading for those researching internationalization and emerging markets business

strategy and more specifically the automotive industry

Korean Attitudes Toward the United States David I.

Steinberg, 2015-05-11 This is the first book length work in English dealing with the crucial and troubled relationship between Korea and the United States Leading scholars in the field examine the various historical political cultural and psychological aspects of Korean American relations in the context of American global and East Asian relationships especially with Japan

Labour, Politics and the State in Industrialising Thailand Andrew Brown, 2004-03 This book focuses on how the state has become entangled in the processes through which workers have been organized reorganized and disorganized as social and political actors in different historical periods
