Implementing European Union Education and Training Policy D. Phillips, H. Ertl, 2007-05-08 The papers which make up this volume have for the most part emerged from the work of a team of young researchers based for varying periods at the Department of Educational Studies of the University of Oxford as part of an international network funded by the European Union The network known as PRESTiGE Problems of Educational Standardisation and Transition in a Global Environment involves teams at six European universities each of which can only

employ young researchers from Member States other than that in which it is situated The Oxford part of PRESTiGE has been concerned with the interpretation transmission and implementation of European Union education and training policy in four Member States France Germany Sweden and the United Kingdom As the leader of the Oxford team I had the good fortune to work with young researchers from Denmark Germany Greece Sweden and Portugal Their work is included here So too are contributions from Jake Murdoch a member of the Dijon team based at the Universit de Bourgogne and Professor Ant nio N voa the leader of the Lisbon team Together the papers which we have allowed to overlap to some extent so that each one can be read independently represent a genuinely international collaborative effort to understand the intentions and the effects of EU education and training policy and we hope that they will contribute to further discussion of the important issues that those with an interest in European co operation and development will wish to pursue

Public Services and the European Union Laura Nistor, 2011-09-15 Politically sensitive and economically important welfare services such as health care health insurance and education have opened up a heated debate in the EU The application of EU law to welfare services raises discontent from the part of the Member States who perceive their systems to be under threat Resisting to the application of the EU law is sometimes seen as part of protecting those values This book suggests that this resistance is largely unjustified EU law is not damaging to welfare systems but it provides adequate balancing mechanisms to ensure that all interests are protected The approach taken in analysing the impact of EU law on welfare services is to look at the negative integration process and answer the questions related to the extent to which EU law applies to welfare services and the kinds of safeguards the Court offers for these services The proportionality principle distinguishes itself as the central element in balancing national and Community interests Being part of the broader integration process negative harmonization creates legislative lacunae and therefore this book also looks at alternative solutions to the negative harmonization process namely positive and soft law

New Risks, New Welfare Peter Taylor-Gooby, 2004-11-11 This book introduces the concept of new social risks in welfare state studies and explains their relevance to the comparative understanding of social policy in Europe New social risks arise from shifts in the balance of work and family life as a direct result of the declining importance of the male breadwinner family changes in the labour market and the impact of globalization on national policy making They differ from the old social risks of the standard industrial life course which were concerned primarily with interruptions to income from sickness unemployment retirement

and similar issues New social risks pose new challenges for the welfare policies of European countries such as the care of children and the elderly more equal opportunities the activation of labour markets and the management of needs that arise from welfare state reform and new opportunities for the coordination of policies at the EU level The book includes detailed and up to date case studies of policy development across these areas in the major European countries These studies written by leading experts are organized in a comparative framework which is followed throughout the book They highlight the way in which national welfare state regimes and institutional arrangements shape policy making to meet new social risks A major feature of this volume is the analysis of developments at the EU level and their interaction with national policies The EU has been largely unsuccessful in its interventions in old social risk policy but appears to have more success in its attempts to coordinate policy for new social risks Experience here may provide lessons for future developments in EU policy making The comparative framework of the book seeks to inform an understanding of the development of new social risks in Europe and of the particular political opportunities and challenges that result It provides an original analysis of pressing issues at the forefront of European welfare policy debate and locates it at the heart of current theoretical debates

States' Gains, Labor's Losses Dorothy J. Solinger, 2018-07-05 In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense States Gains Labor's Losses concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective States Gains Labor's Losses emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures

Birthmarks of Europe Edelgard Mahant, 2017-11-30 By studying the negotiations which led to the conclusion of the original Treaty of Rome and the creation of the European Economic Community this informative book based on recently released archival sources analyses

the Franco German bargain which shaped the Community's initial framework and policies This is not just another book about Franco German relations and the founding of the European Union It presents a new theoretical framework which relates the founding of the European Community to its later development An attempt to apply the ideational framework of the original Community to later developments such as the single market and the Treaty on European Union finds that the Union is still shaped by many of the ideas of the founding fathers Birthmarks of Europe will be useful to teachers and students of the history and politics of the European Union as well as to those studying the dynamics of the development of other regional integration networks

Comparative Social Policy Patricia Kennett, 2001-08-16 What are the social policy processes and outcomes across different societies How are these shaped by social and economic conditions What are the limitations and potential of cross national research *Comparative Social Policy* explores the new context of social policy and considers how cross national theory and research can respond to the challenges facing welfare These challenges include changing demographic trends and economic conditions which have been accompanied by the emergence of new needs and risks within and across societies This book extends and deepens cross national research by exploring the theoretical and conceptual frameworks through which social policy and welfare systems have been understood It critically examines different policy processes and welfare outcomes as well as the ethnocentrism and cultural imperialism which has permeated cross national epistemology and methodology The author concludes by reflecting on how cross national research can illuminate the complex and diverse processes leading to discrimination and inequality across borders This leads to a consideration of how it can contribute to the implementation of welfare provision appropriate to the social and economic conditions of contemporary societies *Comparative Social Policy* is an essential text for undergraduate and masters level students of social policy and an invaluable reference for researchers embarking on cross national social research

Finbow, 2017-11-28 Assessing the effectiveness of the North American Agreement on Labour Cooperation NAALC this book examines the operation of the core institutions the Secretariat and National Administrative Offices over the past seven years It discusses the main functions of these institutions in hearing public

Specialized Administrative Law of the European Union Herwig C. H. Hofmann, Gerard C. Rowe, Alexander H. Türk, 2018-11-30 This volume deals with the law governing the administrative implementation of European Union public policy Much of this law is specific to individual policy sectors The volume provides a study of such specialized administrative law for more than twenty sectors This cross sectoral approach allows for detailed comparisons of EU administration in diverse policy fields It identifies situations where legal structures and approaches may be unnecessarily duplicated thus indicating where a comprehensive general system could be advantageous for both Union law and policy achievement The comparative nature of the study also draws attention to policy fields which have proven to be testing grounds for approaches adopted subsequently in other areas In addition the work highlights the distinctive highly networked and strongly cooperative character of EU administration as a reflection of and a foundation for the operative nature of the European Union as a whole
