electronic media as well as success media such as money power truth and love all of which structure this fluidity and make communication possible An investigation into the ways in which social systems produce and reproduce themselves the book asks what gives rise to functionally differentiated social systems how they evolve and how social movements organizations and patterns of interaction emerge The advent of the computer and its networks which trigger potentially far reaching processes of restructuring receive particular attention A concluding chapter on the semantics of modern society s self description bids farewell to the outdated theoretical approaches of old Europe that is to ontological holistic ethical and critical interpretations of society and argues that concepts such as the nation the subject and postmodernity are vastly overrated In their stead society long considered a suspicious term by sociologists one open to all kinds of reification is defined in purely operational terms It is the always uncertain answer to the question of what comes next in all areas of communication
