Socioeconomic Determinants Of Regional Mortality Differences In Europe:

Socioeconomic Determinants of Regional Mortality Differences in Europe Jeroen Johannes Anthonius Spijker, 2004 The objective of this thesis is to assess the importance of socioeconomic and other factors on mortality differences across Europe over time and between regions to determine which factors should be incorporated into future mortality scenarios When possible *Regional Mortality Differences in Germany* Eva U.B. Kibele, 2012-10-01 Regional mortality differences are one dimension of health inequalities but its trends and determinants in Germany are widely unknown This book examines and illustrates patterns of regional mortality in Germany with focus on small area differentials and their changes over time It identifies explanatory factors at individual and regional level Mortality differences between eastern and western Germany exist but small area mortality differentials are often greater Though the main spatial mortality patterns remain this study provides evidence that some distinct changes in the small area mortality patterns in Germany especially among women occurred within a short period of time Mortality inequalities at younger ages and in behavior related causes as well as differences in socioeconomic conditions contribute strongly to regional mortality differences in Germany The book shows that the complex interplay between individual and regional level mortality risk factors requires a multidimensional approach to reduce regional mortality inequalities Macro-economic Determinants of International Migration in Europe Roel Peter Wilhelmina Jennissen, 2004 Discusses macro economic determinants of international migration in Europe **International Handbook of Adult Mortality** Richard G. Rogers, Eileen M. Crimmins, 2011-02-18 This handbook presents a comprehensive and up to date overview of unprecedented substantive theoretical methodological and statistical developments and insights and an in depth examination of trends and patterns in adult mortality around the world With over two dozen chapters and more than 50 authors this volume draws from top international mortality experts to provide one of the best overviews of life expectancy extant The book documents remarkable gains in life expectancy which stand out as one of the most important accomplishments of the twentieth century Individuals in more developed countries can expect to live longer now than ever before especially the Japanese who enjoy record setting life expectancies The book also explores unfortunate declines in life expectancy in selected countries brought on by such factors as infectious diseases accidents suicides and homicides and political and economic conflict and turmoil This book synthesizes the wealth of mortality information available clearly articulates the central findings to date identifies the most appropriate datasets and methods currently available illuminates the central research questions and develops an agenda to address these research questions The authors carefully examine central factors related to mortality including health behaviors socioeconomic status social relations biomarkers and genetic factors The book will prove especially relevant to researchers students and policy makers within social and health sciences who want to better understand international trends and patterns in adult mortality *Mathematical Demoeconomy* Yuri S. Popkov, 2014-04-02 This monograph aspires to lay the foundations of a new scientific

discipline demoeconomics representing the synthesis of demography and spatial economics This synthesis is performed in terms of interaction between population and its economic activity The monograph appears a unique research work having no analogs in scientific literature Demoeconomic systems are studied involving the macrosystems approach which combines the generalized entropy maximization principle and the local equilibria principle Demoeconomic systems operate in an uncertain environment thus and so the monograph develops the methodology and technique of probabilistic modeling and forecasting of their evolution

Handbook of Socioeconomic Determinants of Occupational Health Töres Theorell, 2020-08-12 This anthology provides readers of scientific literature on socioeconomic factors and working conditions with the newest knowledge in this field Since our world is subjected to constant change in accelerating speed scientific reviews and updates are needed Fortunately research methodology in epidemiology physiology psychology and sociology is also developing rapidly and therefore the scientific community can provide politicians and policy makers with increasingly sophisticated and exact descriptions of societal factors in relation to work The anthology starts in the macro level sphere with international perspectives and reviews related to working conditions in relation to political change the fall of the Soviet Union gender age precarious employment national economy and retirement Two chapters relate to national policies and activities in international organizations The second part of the book relates to the meso level sphere with reviews on social patterns in distributions of psychosocial and physical risks at work in general as well as reviews on noise shift work under overemployment occupational physical activity job intensity which may be a particularly important problem in low income countries digitization in modern work climate change childhood determinants of occupational health in adult years and theoretical models currently used in occupational epidemiology demand control effort reward organizational justice psychosocial safety climate conflicts bullying harassment This part of the book ends with two chapters on interventions one chapter on the use of cultural interventions and one on interventions and their evaluation in general and two chapters on financial aspects of poor good work environments and evaluations of interventions In the third part of the book the micro level is addressed Here mechanisms translating working conditions into physiology are discussed This starts in general theory relating basic theories regarding energy storage and release to psychosocial theory extension of demand control theory It also includes regeneration physiology autonomic nervous system function immunology and adverse behaviour Sections in the Handbook Macro level determinants of occupational health Akizumi Tsutsumi Meso level determinants of occupational health Morten Wahrendorf and Jian Li Micro level determinants of occupational health Bradley J Wright

Culture, Risk and HIV/AIDS Among Migrant and Mobile Men in Goa, India Ajay Bailey, 2008 **International Migration and the Future of Populations and Labour in Europe** Marek Kupiszewski, 2013-02-11 The changes of populations are determined by fertility mortality and migration On the national level international migration is a factor of increasing demographic economic social and political importance This book addresses the debate on the impact of

international migration and economic activity on population and labour force resources in future It presents a study conducted for 27 European countries looking 50 years ahead 2002 2052 An extended discussion of theories and factors underlying the assumed evolution of the components of change and economic activity is included as well as a detailed analysis of the historical trends These theoretical and empirical considerations lead to defining scenarios of future mortality fertility economic activity and international migration which have been fed into a projection model producing various future population dynamics and labour force trajectories In addition simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe The results presented in this book allow researchers governments and policy makers to evaluate to what extent various migration and labour market policies may be instrumental in achieving the desired population and labour size and structures The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view Healthiness and the Economic Determinants of Mortality Fluctuations José Antonio Ortega, 1996 IBSS: Sociology: 1993 Vol 43 International Committee for Social Science Information and Documentation, 1994 This bibliography lists the most important works published in sociology in 1993 Renowned for its international coverage and rigorous selection procedures the IBSS provides researchers and librarians with the most comprehensive and scholarly bibliographic service available in the social sciences The IBSS is compiled by the British Library of Political and Economic Science at the London School of Economics one of the world's leading social science institutions Published annually the IBSS is available in four subject areas anthropology economics political science and sociology

OECD Economic Surveys: Finland 2012 OECD, 2012-02-07 OECD's 2012 Economic Survey of Finland examines recent economic developments policies and prospects examines what could be done to restart economic growth and includes a more detailed analysis of health care in Finland Europe's Population Ray Hall, Paul White, 2005-08-17 First Published in 1995 In the final decade of the twentieth century two common themes of public debate and of academic discussion in the social sciences have concerned futures research and the European scene in the context both of developments in the European Union and of post Cold War changes in other parts of the continent At the 1992 Annual Conference of the Institute of British Geographers the Population Geography Study Group organized a session on the future of population change in Europe bringing together these two major themes in the context of demographic change The aim of Europe's population towards the next century is to contribute to informed discussion of the demographic futures of Europe as a whole The whole range of population geography is covered including considerations of fertility and mortality household and family structures labour force issues population redistribution and international migration The authors were each asked to look to the year 2000 and where possible beyond The approach adopted eschews highly technical projections instead highlighting issues and

alternative scenarios within general contexts of societal and economic evolution The authors have been drawn from several European countries and the intended coverage is Europe wide although in certain chapters the paucity of current data from some countries especially in eastern Europe narrows the discussion to the countries of the European Union
