Law Norman K. Denzin, Georges Gurvitch, 2020-01-29 Georges Gurvitch occupies an interesting position in the development of the sociology of law In the period immediately preceding its quantitative expansion he produced an explicitly conceived systematic theoretical intervention What is particularly significant about Gurvitch's Sociology of Law at first appears as a contradiction His work has had very little lasting impact on developments within the field of the sociology of law At best his existence is occasionally footnoted but he engendered no great controversy or debate nor does he have any active contemporary disciples Despite this lack of attention Gurvitch's work provides a concentrated expression of the theoretical problems that beset the field The core of Gurvitch's sociology of law is at root a continuation of the efforts apparent in the work of Max Weber to resolve or integrate the dualism which is so markedly affecting law It is the apparent dualism between law as a positive institution resting upon a framework of social power while at the same time being a system of values or norms having some compelling internal strength and validity Gurvitch's Sociology of Law shines as a beacon in the ongoing quest for a transformative vision of law The new introduction by Alan Hunt discusses Gurvitch's place in the history of the sociology of law and the context in which his works should be placed It also features a brief biography of the sociologist as well as a discussion of the central features of Gurvitch's sociology This book will be of interest to students of sociology and law
