Talking Health Clive Wood,1988 Can conventional medicine meet the needs of every patient Can current interest in complementary therapies be explained simply by communication problems between doctors and patients Have technological advances in modern medicine resulted in de personalization and is the modern hospice movement society s reaction Is complementary medicine scientific and is there any proof that it works Should complementary practitioners be included in multidisciplinary teams to provide whole person care Is there a role for Christian counselling How does the layman view the medical scene What are the implications of the present trend towards self health Complementary Medicine Today Ursula Sharma,1992 Complementary Medicine Todayprovides an examination of current British medical practice and demonstrates the ways in which the social sciences can clarify some of the practical political and ethical issues raised by alternative health care *Teratologies* Jackie Stacey,2013-07-23 Stories of cancer are full of monster and marvels the monstrousness of the disease and the treatments the marvels of the cures and the saved lives Still one of the most dreaded diseases to haunt our imaginations cancer is more than an illness it is a cultural phenomenon People who have cancer are bombarded with competing explanations of their conditions it is genetically inherited it is environmentally produced it is the result of their personality *Teratologies A Cultural Study of Cancer* investigates how this disease is perceived experienced and theorised in contemporary society It explores changing beliefs about the causes of and the cures for cancer in both biomedicine and its increasingly popular alternative counterparts Analysing conventional and alternative medical accounts self help manuals and patients personal stories Jackie Stacey takes a critical look at the place of heroes metaphors the self and the body in these competing bids to produce the authoritative definition of the meaning of cancer today Interspersed with these detailed textual investigations are discussions of broader issues such as the feminist debates about the history of science the place of consumer culture in health practices and the status of patients and of health professionals in postmodern society Combining autobiographical narratives with contemporary theoretical debates the author carves out a specifically feminist analysis of the cultural dimensions of cancer She brings accounts of her own illness under the critical lens of academic scrutiny and situates these personal stories within a discussion of contemporary cultural change National Library of Medicine Current Catalog National Library of Medicine (U.S.),1989 Disease Management, 3rd Ed. This book doesn't assume prior medical knowledge; it introduces neurophysiological concepts of pain in an accessible manner. It progresses logically, starting with fundamental pain concepts and moving through pharmacological and non-pharmacological therapies, lifestyle adjustments, and strategies for navigating the healthcare system. 70 **Reimagining Men's Cancers** Michele Berman, Mark Boguski, David Tabatsky, 2016-10-04 America's fascination with celebrities never gets old. From People magazine with a readership of 43 million to Internet sites like JustJared.com with over 80 million monthly views, celebrity information not only sells; it educates people about important issues, including cancer. Information is empowering, and reading about a famous person coping with cancer can not only be inspiring; it can save a life. That's what Reimagining Cancer exemplifies through each of the books in the series. Cancer doesn't have to be a death sentence. About half of all cancers are preventable and can be avoided if current medical knowledge is better delivered. Reimagining Men's Cancers, focusing on cancers of the prostate, penis, and testicles, provides readers with that critical information to help them manage, cope, and recover through a concise, easy-to-read style and format. Beginning with a view of basic anatomy and an overview of how we view a particular cancer today, chapters flow easily into an explanation of signs, symptoms, diagnosis, scientific information, and guidelines, and include a comprehensive survey of treatments and prevention. Woven throughout are stories, both medical and anecdotal, from men such as Joe Torre, Robert De Niro, Sir Ian McKellen, and Scott Hamilton. Education is the key, and by using celebrity stories, Reimagining Men's Cancers can attract countless readers who might otherwise not pay attention to an epidemic that is likely to affect them or a loved one.
