Talking with Children Amelia Church, Amanda Bateman, 2022 In early childhood education and care ECEC the importance of extended conversations with children is emphasised through professional practice principles i e what teachers should do and in learning outcomes for children i e what children should be able to do Early childhood curricula frameworks or statements of learning goals for young children necessarily respond to the historical educational and political priorities of their communities There is however a universal understanding of the primacy of talk in interaction as both the medium of learning and a skill for children to develop All early childhood curricula reference the fundamental importance of talking with children Early childhood curricula do not however specify how talking with children might be done The deliberate lack of explicit directions on how to talk with children allows teachers to develop pedagogical strategies that incorporate each child s experiences abilities and interests forming a continuum of learning from their home and community environments The flexibility and responsivity of curriculum frameworks for early childhood education frameworks developed and evaluated through national education and care policy enables teachers to create individualized learning for the children and families they work with The fact that early childhood curricula are not prescriptive aligns with a sociocultural approach to education where programs can adapt and respond to the needs of local communities It does mean however that the practices to implement national curricula and enable learning outcomes are less visible to teachers this illusiveness can be problematic as learning outcomes for children are specified in ECEC curricula Teachers know where they are going i e learning goals and

why i e professional knowledge beliefs and theory but they are not always sure how to initiate navigate and extend conversations with children throughout this journey Talking with Kids Alison Mulvaney,1995 Parents communicate many things to their children As the first and most enduring role models parents set goals and teach values Successful communication between a parent and child is also one of the cornerstones of good family relationships but it is not always easy In all families different patterns of communication develop and sometimes they can break down causing conflict and unhappiness Using exercises case studies and dialogue examples Alison Mulvaney examines classic communication patterns and the common barriers that prevent us from learning changing and developing new skills In positive and practical terms she explains the fundamentals of establishing good communication with children including how to focus and use active listening and how to implement win win resolution strategies In addition she shows how to motivate your children and build their self esteem and provides methods for teaching important values
