Talking With The Enemy Negotiation And Threat Perception In South Africa And Israel Palestine:

Talking with the Enemy Daniel Lieberfeld, 1999-08-30 The decisions to negotiate in the South African and Israeli Palestinian conflicts can be understood in terms of changed perceptions of threat among political elites and their constituents As perceptions of an imminent threat to national survival receded debate over national security policy became a focus of internal politics on the government sides in each case and prompted changes of leadership The new leaders F W de Klerk and Yitzhak Rabin faced emerging threats at the national and international levels that made negotiation seem advantageous Lieberfeld analyzes the decisions of the opposition ANC and PLO in terms of changing threat perceptions and incentives for compromise Lieberfeld also evaluates developments since the breakthrough agreements He concludes by identifying revised indicators of conflicts ripeness for negotiated settlement and discussing their applicability to other cases of intense protracted conflict

Handbook of International Negotiation Mauro Galluccio, 2014-12-04 This book reinforces the foundation of a new field of studies and research in the intersection between social sciences and specifically between political science international relations diplomacy psychotherapy and social cognitive psychology It seeks to promote a coherent and comprehensive approach to international negotiation from a multidisciplinary viewpoint generating a longer term of studies researches and networking process that both respond to changes and differences in our societies and to the unprecedented demand and opportunities for international conflict prevention and resolution There is a need to increase cooperation coherence and efficiency of international negotiation It is necessary to focus our shared attention on new ways to better formulate integrated and sustainable negotiating strategies for conflict resolution This book acquires innovative relevance in and will impact on the new context of international challenges which do not have a one off solution that can be settled through a single target oriented negotiation process The book brings together leading scholars and researchers into the field from different disciplines diplomats politicians senior officials and even a Cardinal of the Holy See to give their contributions and make proposals on how best to optimize the use of negotiation and diplomacy structures tools and instruments However unlike most studies and researches on international negotiation this book emphasizes processes not simply outcomes or even tools but the way in which tools are and can be used to achieve better outcomes in international reality based negotiation

Violence, Nonviolence, and the

Palestinian National Movement Wendy Pearlman, 2011-10-24 Why do some national movements use violent protest and others nonviolent protest Wendy Pearlman shows that much of the answer lies inside movements themselves Nonviolent protest requires coordination and restraint which only a cohesive movement can provide When by contrast a movement is fragmented factional competition generates new incentives for violence and authority structures are too weak to constrain escalation Pearlman reveals these patterns across one hundred years in the Palestinian national movement with comparisons to South Africa and Northern Ireland To those who ask why there is no Palestinian Gandhi Pearlman demonstrates that nonviolence is not simply a matter of leadership Nor is violence attributable only to religion emotions or stark instrumentality Instead a movement's organizational structure mediates the strategies that it employs By taking readers on a journey from civil disobedience to suicide bombings this book offers fresh insight into the dynamics of conflict and mobilization

How Fighting Ends Holger Afflerbach, Hew Strachan, 2012-07-26 There are many histories of how wars have begun but very few which discuss how they have ended This book fills that gap Beginning with the Stone Age and ending with globalized terrorism it addresses the specific issue of surrender rather than the subsequent establishment of peace At its heart is the individual warrior or soldier and his or her decision to lay down arms In the ancient world surrender led in most cases to slavery but a slave still lived rather than died In the modern world international law gives the soldiers rights as prisoners of war and those rights include the prospect of their eventual return home But individuals can surrender at any point in a war and without having such an effect that they end the war The termination of hostilities depends on a collective act for its consequences to be decisive It also requires the enemy to accept the offer to surrender in the midst of combat In other words like so much else in war surrender depends on reciprocity on the readiness of one side to stop fighting and of the other to accept that readiness This volume argues that surrender is the single biggest contributor to the containment of violence in warfare offering the vanquished the opportunity to survive and the victor the chance to show moderation and magnanimity Since the rules of surrender have developed over time they form a key element in understanding the cultural history of warfare
