## **Talking Shop Authentic Conversation And Teacher Learning:**

**Talking Shop** Christopher Michael Clark, 2001-01-01 This is a set of stories about how something as simple sounding as ordinary talk among teachers can become a powerful medium for teacher learning and professional development The chapters of the book draw from the work of eight groups of teachers in the US and Israel who have met in conversation for the past 4 to 5 years The chapter authors use the teachers own words to document their learning and describe the ways in which readers could begin their own sustainable teacher conversation group both with experienced teachers and with teacher education students

**Teacher Educators' Professional Learning in Communities** Linor Hadar, David Brody, 2016-11-10 Teacher Educators Professional Learning in Communities explores teacher educators professional development in the communal model of learning Learning in groups has proved to be a major avenue for supporting such development and change among teachers and other professions but one which has received sparse attention with regards to teacher educators development This book aims to examine such communities in order to identify factors that promote or hinder professional learning for teacher educators Blending research on communal learning with seven years of practical experience in these contexts the authors present their analysis of the communal professional development process and provide a conceptual basis for understanding this type of professional learning for teacher educators The book addresses organizational aspects of teacher educators learning in communities such as creating a safe environment group reflection feedback and discussion about student learning Personal professional learning aspects are also explored including the reduction of personal isolation the process of transition towards change and withdrawal from the goals of the community Finally influences and implications for professional learning among teacher educators are discussed Teacher educators stand at the crux of the entire educational enterprise because of their responsibility in training the next generation of teachers As such their professional development is increasingly important in promoting and advancing educational practice Integrating current literature with pictures of practice about the use of the communal model in professional development in educational settings it will be of key interest to researchers and postgraduate students in several fields professional development teacher educators and communities of learners Practitioners who are involved with the professional development of teacher educators will also find this book extremely useful

contribution to the field of teacher education      **Wise Social Studies in an Age of High-Stakes Testing** Elizabeth Anne Yeager, O. L. Davis, 2005-08-01 The chapters in this volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and lowlevel rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987 previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational experiences

**Literary Praxis** Piet-Hein van de Ven, Brenton Doecke, 2011-11-16 Literary Praxis A Conversational Inquiry into the Teaching of Literature explores the teaching of literature in secondary schools It does this from the vantage point of educators in a range of settings around the world as they engage in dialogue with one another in order to capture the nature of their professional commitment the knowledge they bring to their work as literature teachers and the challenges of their professional practice as they interact with their students The core of the book comprises accounts of their day to day teaching by Dutch and Australian educators These teachers do more than capture the immediacy of the here and now of their classrooms they attempt to understand those classrooms relationally exploring the ways in which their professional practice is mediated by government policies national literary traditions and existing traditions of curriculum and pedagogy They thereby enact a form of literary praxis that grapples with major ideological issues most notably the impact of standards based reforms on their work Educators from other countries then comment on the cases written by the Dutch and Australian teachers thus taking the concept of praxis to a new level as part of a comparative inquiry that acknowledges the richly specific character of the cases and resists viewing teaching around the world as though it lends itself unproblematically to the same standards of measurement as in the fetish made of PISA They step back from a judgmental stance and try to understand what it means to teach literature in other educational settings than their own The essays in this collection show the complexities of literature teaching as a form of professional praxis exploring the intensely reflexive learning in which teachers engage as they induct their students into reading literary texts and reflect on the socio cultural contexts of their work

**Learner Autonomy Across Cultures** D. Palfreyman, R. Smith, 2003-11-03 What does autonomy mean within language learning Should it be enhanced within national institutional or small group culture and if so how can that be done A variety of new theoretical perspectives are here firmly anchored in research data from projects worldwide By foregrounding cultural issues and thus explicitly addressing the concerns of many educators on the appropriateness and feasibility of developing learner autonomy in practice this book fills a gap in the literature and offers practical benefits to language teachers

teachers learn effective ways to improve literacy instruction and student achievement The range of tools offered in the text invite customization based on the reader s specific instructional context This framework empowers literacy coaches and teachers through conversation sustained engagement and reflective analysis Dozier argues that at its best literacy coaching is responsive collegial thoughtful thought provoking deliberate reflective and transferable In this book she invites readers to enter into a coaching dialogue through vignettes that bring coaching interactions to life prompts to engage both teachers and students occasions for collaborative reflection frequently asked questions As literacy tasks are documented and analyzed coaching interactions logged and categorized and assessment scores scrutinized Dozier cautions coaches to avoid being so caught up in the doing of coaching that one forgets the purpose behind it In this book she provides an occasion for them to step back and ask what is the goal of literacy coaching What kind of literacy environments and experiences are we creating for our schools and our students What is possible as we engage in transformative literacy practices While the tools offered in this book do not provide a quick fix they foster critical thinking and sustained inquiry that leads to positive change for both teachers and students
