Tall Building Artistically Reconsidered The Search For A Skyscraper Style:

The Tall Building Artistically Reconsidered Ada Louise Huxtable, 1984 Ada Louise Huxtable offers here an energetic defense of cities and a brilliant consideration of the skyscraper as art as business as the product of politics and speculation

The Tall Building Artistically Reconsidered Ada Louise Huxtable, 1992 The skyscraper is the building type that dominates our cities absorbs vast amounts of capital in design construction and maintenance and houses large numbers of people in offices and apartments Ada Louise Huxtable America's most acclaimed architecture critic winner of the Pulitzer Prize and a MacArthur Prize Fellow offers here an energetic defense of cities and a brilliant consideration of the skyscraper as art as business as the product of politics and speculation *The American Skyscraper, 1850-1940* Joseph J. Korom, 2008 The skyscraper is an American invention that has captured the public's imagination for over a century The tall building is wholly manmade and borne in the minds of those with both slide rules and computers This is the story of the skyscraper's rise and the recognition of those individuals who contributed to its development This volume is unique its approach information and images are fresh and telling The text examines America's first tall buildings the result of twelve years of in depth research by an accomplished and published architect and architectural historian Over 300 compelling photographs charts and notes make this the ultimate tool of reference for this subject Biographies woven throughout with period norms politics and lifestyles help to place featured skyscrapers in context Quite simply there is no book like this The text carefully and insightfully written is clear concise and easily digestible the text being the product of well documented original research written in an informative tone *The American Skyscraper 1850 1940 A Celebration of Height* is a richly documented journey of a fascinating topic and it promises to be a superb addition to libraries schools of architecture students of architecture and lovers of art Planning for Tall Buildings Michael Short, 2012-11-12 In a time of recession the challenge of building and planning for tall buildings has become even more complex the economics of development legislative and planning frameworks and the local politics of development must be navigated by those wishing to design and construct new tall buildings which fit within the fabric of their host cities This book is a timely contribution to the debate about new tall buildings and their role and effect on our cities It is divided into two main parts In part one the relationship between tall buildings and planning is outlined followed by an exploration of the impacts that construction of tall buildings can have It focuses in particular on the conservation debates that proposals for new tall buildings raise The first part ends with an analysis of the way in which planning strategies have evolved to deal with the unique consequences of tall buildings on their urban locations The second part of the book focuses on seven examples of medium sized cities dealing with planning and conservation issues and implications that arise from tall buildings These have been chosen to reflect a wide range of methods to either encourage or to control tall buildings that cities are deploying The case studies come from across the western world covering England Manchester Liverpool Newcastle and Birmingham Norway Oslo Ireland Dublin and Canada Vancouver and

represent a broad spectrum of approaches to dealing with this issue In drawing together the experiences of these varied cities the book contributes to the ongoing debate about the role of the tall building in our cities their potential impacts and experiences of those who use and inhabit them The conclusions outline how cities should approach the strategic planning of tall buildings as well as how they should deal with the consequences of individual buildings particularly on the built heritage

Skyscraper Facades of the Gilded Age Joseph J. Korom, Jr.,2013-03-08 This book is about the design of the facade of 51 of America s most extravagant early skyscrapers Included are the biographies of noted architects and the aristocrats who financed America s first skyscrapers This book discusses the influences of European aesthetic values in America and scandals rogues and class distinctions Interpretations by contemporary critics are sprinkled throughout the text Woven throughout the book are inquiries about the validity of Greek and Roman mythologies and their relationships to modern America and its spirit of invention and progress Foreign traditions were challenged by some architects but then accepted by most Why was it necessary for the long dead hero of a faraway civilization to be included on the facade of a newly invented American skyscraper This book tells why

The American Skyscraper Roberta Moudry,2005-05-09 Publisher Description Tall Buildings Mehmet Halis Günel,Hüseyin Emre Ilgin,2014-06-27 The structural challenges of building 800 metres into the sky are substantial and include several factors which do not affect low rise construction This book focusses on these areas specifically to provide the architectural and structural knowledge which must be taken into account in order to design tall buildings successfully In presenting examples of steel reinforced concrete and composite structural systems for such buildings it is shown that wind load has a very important effect on the architectural and structural design The aerodynamic approach to tall buildings is considered in this context as is earthquake induced lateral loading Case studies of some of the world s most iconic buildings illustrated with full colour photographs structural plans and axonometrics will bring to life the design challenges which they presented to architects and structural engineers The Empire State Building the Burj Khalifa Taipei 101 and the HSB Turning Torso are just a few examples of the buildings whose real life specifications are used to explain and illustrate core design principles and their subsequent effect on the finished structure

Bangkok Marc Askew,2004-08-02 Bangkok is one of Asia s most interesting varied controversial and challenging cities It is a city of contradictions both in its present and past This unique book examines the development of the city from its earliest days as the seat of the Thai monarchy to its current position as an infamous contemporary metropolis Adopting insights from anthropology urban studies and human geography this is a powerful account of the city and its dynamic spaces Marc Askew examines the city s variety from the inner city slums to the rural urban fringe and gives us a keen insight into the daily life of the city s inhabitants be they middle class suburbanites or sex workers

Tower Power: The US on a Freudian Couch after 9/11 Devrim F Kilicer Yarangumeli,2012-05-25 Tower Power presents an engaging series of discussions in dialogue on one of the first truly interdisciplinary and historically informed studies of the American skyscraper and September 11 Devrim F

Kilicer's book offers a critical inspection of the ways in which the center of the center the vertical temenos of the United States New York City is comprehended as the place for the American Dream of material success with its overwhelming bundle of skyscrapers. The author contends that it is only by approaching the phenomenon of September 11 in the context of iconic American skyscrapers that we can truly understand the ways September 11 has been canonized and imbued with a sacred character. At the same time her study allows September 11 to inform our understanding of the skyscraper as the essential American architectural form. She provides a socio psychoanalytic lens through the works of psychoanalysts Sigmund Freud and Jacques Lacan together with social theorists Michel Foucault and Pierre Bourdieu in understanding why New York City has been expanding vertically and what this architectonic verticality tells us about the American psyche. Malaysia, Modernity and the Multimedia Super Corridor Tim Bunnell, 2004-07-31 Based on fieldwork in Malaysia this book provides a critical examination of the country's main urban region. The study first provides a theoretical reworking of geographies of modernity and details the emergence of a globally oriented high tech stage of national development. The Multimedia Super Corridor is framed in terms of a political vision of a fully developed Malaysia before the author traces an imagined trajectory through surrounding landscapes in the late 1990s. As the first book length academic analysis of the development of Kuala Lumpur Metropolitan Area and the construction of the Multimedia Super Corridor this work offers a situated contextual account which will appeal to all those with research interests in Asian Urban Studies and Asian Sociology. Framing Places Kim Dovey, Professor of Architecture and Urban Design at the University of Melbourne Kim Dovey, 2002-01-08 Framing Places investigates how the built forms of architecture and urban design act as mediators of social practices of power. It is an account of how our lives are framed within the clusters of rooms, streets and cities we inhabit. **Divided We Stand** Eric Darton, 2011-08-02 When the World Trade Towers in New York City were erected at the Hudson's edge they led the way to a real estate boom that was truly astonishing. Divided We Stand reveals the coming together and eruption of four volatile elements: super tall buildings, financial speculation, globalization and terrorism. The Trade Center serves as a potent symbol of the disastrous consequences of undemocratic planning and development. This book is a history of that skyscraping ambition and the impact it had on New York and international life. It is a portrait of a building complex that lives at the convergence point of social and economic realities central not only to New York City but to all industrial cities and suburbs. A meticulously researched historical account based on primary documents. Divided We Stand is a contemporary indictment of the prevailing urban order in the spirit of Jane Jacobs's mid century classic *The Death and Life of Great American Cities*. **Inventing Times Square** William R. Taylor, 1991-11-26 Times Square in its heyday expressed American culture in the moment of vivid change. A stellar group of critics and scholars examines this transitional moment in *Inventing Times Square* a study of the development of New York's central entertainment district. A fascinating visit to Times Square from its christening in 1905 to its eventual decline after the Depression the book explores the colorful configuration of institutions and cultural practices.

that propelled Times Square from a local and regional entertainment center to a national cultural marketplace. Changes in the economy, in religion, in leisure culture, and in aesthetics gave birth to a geographical space that fostered Vaudeville and Tin Pan Alley. Flo Ziegfeld and Billy Rose, the spectacle of the Hippodrome and the bright lights of the Great White Way. Out of this same place eventually came national network radio and many Hollywood films. Though conceived as a public space, Times Square was quickly transformed into a commercial center. Power brokers wielded their influence on a public ready to succumb to consumerism. Theatrical entertainment became a large-scale national business based in and operated out of Times Square. A new commercial aesthetic travelled with Joseph Urban from Vienna to Times Square to Palm Beach, bringing to society a sophisticated style that will forever say Broadway. Times Square as the center of the universe had its darker sides as well, for it was the testing ground for a new morality. The packaging of sexuality on the stage gave it legitimacy on the streets, as hotels and sidewalks became the province of female prostitution, male hustling, and pornography. At the center of New York City, Times Square's commercial activities gave full rein to urban appetites and fantasies and challenged and defied the norms of behavior that prevailed elsewhere in the city. Cultural history at its finest. Inventing Times Square portrays the vibrant convergence of social and economic forces on Forty-second Street. Sexuality & Space Beatriz Colomina, Jennifer Bloomer, 1992. Both timely and well worth the time. Thomas Keenan Newsline AIA Award Winner Oculus Bestseller Times Square Roulette Lynne B. Sagalyn, 2003-08-29. The compelling story of the politics, policies, and personalities that made Times Square's revitalization possible. The spectacularly successful transformation of Times Square has become a model for other cities. From its beginning as Longacre Square, Times Square's commercialism, signage, cultural diversity, and social tolerance have been deeply embedded in New York City's psyche. Its symbolic role guaranteed that any plan for its renewal would push the hot buttons of public controversy, free speech, property taking, through eminent domain, development, density tax, subsidy, and historic preservation. In Times Square Roulette, Lynne Sagalyn debunks the myth of an overnight urban miracle performed by Disney and Mayor Giuliani to tell the far more complex and commanding tale of a twenty-year process of public controversy, nonstop litigation, and interminable delay. She tells how the troubled execution of the original redevelopment plan provided a rare opportunity to rescript it. And timing was all: the mid-1990s saw rising international corporate interest in the city, which was a mecca for mass-market entertainment and synergistic merchandising. Sagalyn details the complex relationship between planning and politics and the role of market forces in shaping Times Square's redevelopment opportunities. She shows how policy was wedded to deal-making and how persistent individuals and groups forged both. Skyscraper Lynn Curlee, 2025-07-01. The stunning visual history of the rise of the skyscraper in the United States and around the world, told with dramatic paintings and lucid prose. School Library Journal from award-winning author/illustrator Lynn Curlee, now with a new look. Did you know that it took ten million bricks to build the Empire State Building? Or that residents of the John Hancock Center sometimes have to call down to the doorman to find out the weather on the streets below? Or that a building

in Dubai is nearly one half mile high First erected in Chicago and New York skyscrapers can be found all over America and have been expanding skyward all over the globe From the Empire State Building to the Chrysler Building to the Sears and Hancock Towers to the Petronas Towers in Kuala Lumpur to the former World Trade Center this book captures all the drama excitement and tragedy of humanity's attempt to reach ever closer to the clouds **On Architecture** Ada Louise Huxtable, 2010-07-15 Known for her well reasoned and passionately held beliefs about architecture Ada Louise Huxtable has captivated readers across the country for decades in the process becoming one of the best known critics in the United States Her brilliance over so many years is unmatched and her range has always been vast from a plea to save a particular architectural treasure to an ongoing discussion about whether modern architecture is dead Her keen eye and vivid writing have reinforced to readers how important architecture is and why it continues to be both controversial and fascinating Since so much of her writing has been in newspapers it has quickly become unavailable to her many fans On Architecture will bring together her best work from the New York Times New York Review of Books her more recent essays in the Wall Street Journal and her various books She is personally selecting and organizing the pieces into sections like Art and Culture and The Art of Architecture and is revising them as needed to bring them up to date Whether you love modern architecture or desire a return to Beaux Arts design this book will give you insight into the mind and heart of a critic who has artfully brought the discussion of architecture architects and our environment to readers for five decades *The International Who's Who of Women* 2002 Elizabeth Sleeman, 2001 Over 5 500 detailed biographies of the most eminent talented and distinguished women in the world today *The Body and the City* Steve Pile, 2013-02-01 Over the last century psychoanalysis has transformed the ways in which we think about our relationships with others Psychoanalytic concepts and methods such as the unconscious and dream analysis have greatly impacted on social cultural and political theory Reinterpreting the ways in which Geography has explored people's mental maps and their deepest feelings about places The Body and the City outlines a new cartography of the subject The author maps key coordinates of meaning identity and power across the sites of body and city Exploring a wide range of critical thinking particularly the work of Lefebvre Freud and Lacan he analyses the dialectic between the individual and the external world to present a pathbreaking psychoanalysis of space *The Skyscraper Curse* Mark Thornton, 2018-08-01 The Skyscraper Curse is Dr Mark Thornton's definitive work on booms and busts and it explains why only Austrian economists really understand them It makes business cycle theory accessible to a whole new 21st century audience And they need it especially those under 40 Many of the brilliant quants working on Wall Street and at the Fed barely remember the Crash of 2008 much less understand it But Mark Thornton does and his book is a warning about overheated equity markets over inflated housing prices and clueless central bankers Given the shaky stock markets lately 2018 may be the year the Fed's latest bubble bursts And when it does it will be even more painful than 10 years ago In fact US household and business debt is now one trillion dollars higher than 2008 Mark is well known as an

expert on bubbles and Fed malfeasance His work appears in outlets like Wall Street Journal Bloomberg Forbes The Economist Barron's and Investor's Business Daily His now infamous Skyscraper Index theory draws the connection between loose monetary policy artificially low interest rates and vanity construction projects Put the three together and it doesn't turn out well And let's not forget that Dr Thornton was among only a handful of economists to warn about the dangerous housing bubble in 2004 and again in 2006 Cabbies and waiters bought up condos with no money down in places like Las Vegas Prices rose 25 percent or more every year in some coastal markets Even people with terrible credit financed houses at five or seven times their annual income All of it was made possible by the Fed and its mania for low interest rates So when the experts said Nobody could have seen this coming the Mises Institute had Mark's articles and papers ready to go The housing crash and the meltdown in equity markets less than a year later were thoroughly explained by Austrian business cycle theory And Mark was the capable face of the Mises Institute during it all Without a lay friendly book like The Skyscraper Curse millions more Americans will be duped by the next crash Dr Thornton's book tells the story that needs to be told It will be among the only alternative explanations available when the next crisis comes
