Freeman, 2012-09-20 One of the first Thunderbolt groups to see action in the European Theatre of Operations ETO with the US Army Air Forces the 56th Fighter Group FG was also the only fighter unit within the Eighth Air Force to remain equipped with the mighty P 47 until war s end Led by the inspirational Hub Zemke this group was responsible for devising many of the bomber escort tactics employed by VIII Fighter Command between 1943 and 1945 By VE Day the 56th FG had shot down 100 more enemy aircraft than any other group in the Eighth Air Force its pilots being credited with 677 kills during 447 missions The exploits of this elite fighter unit are detailed in this volume together with photographs their aircraft profiles and insignia

*Professional Journal of the United States Army*, 1942      *Fighter Group* Lt Col Jay A. Stout, 2012-10-01 Jay Stout breaks new ground in World War II aviation history with this gripping account of one of the war s most highly decorated American fighter groups      **Field Manuals** United States. War Department, 1946      *Battle of the Bulge*, 1995 Consists primarily of biographies of soldiers      Spanish Civil War Tanks Steven J. Zaloga, 2011-12-20 The tanks used during the Spanish Civil War are not often examined in any great detail and are often labeled as little more than test vehicles in a convenient proving ground before World War II But with groundbreaking research armor expert Steven J Zaloga has taken a fresh look at the tanks deployed in Spain examining how future tanks and armored tactics were shaped and honed by the crews experiences and how Germany was able to benefit from these lessons while their Soviet opponents were not Based on recently uncovered records of Soviet tankers in Spain and rare archival accounts this book describes the various tanks deployed in Spain including the PzKpfw I and the T 26      *Armor*, 2010      Rhino Tanks and Sticky Bombs Robert P. Wettemann, 2025-06-10 Coming of age during the Great Depression the American boys who fought in World War II had through necessity developed a unique brand of technological resourcefulness This proficiency Robert P Wettemann Jr contends provided GIs with another weapon in a distinctly American way of war Rhino Tanks and Sticky Bombs is Wettemann s eminently readable account of how this hard won use it up wear it out make it do or do without mentality was critical to America s success giving servicemen the know how and can do spirit to creatively engineer solutions to wartime problems More than all the other soldiers in the conflict American servicemen grew up in a society where the machine was ubiquitous where enduring an unparalleled period of financial distress meant learning to keep their Model Ts Fordson tractors or other machinery operational Wettemann describes how this tinkerer s mentality promoted a technical aptitude and willingness to adapt unmatched by other armies fielded during World War II At the same time the US command structure demonstrated a

willingness to evaluate accept and employ such efforts to improve both fighting capacity and the general comfort of US servicemen Seamlessly blending social military intellectual and technological history Rhino Tanks and Sticky Bombs weaves an engaging narrative about the roots of American ingenuity during World War II and makes a compelling case for a specific instance of American distinctiveness that proved crucial to Allied victory *Military Review* ,1941 **Warfare in Europe 1919-1938** Geoffrey Jensen,2017-05-15 Although ostensibly a time of peace one of the richest and most fascinating periods in military history falls between the two world wars With good reason even today military theorists look to these years for relevant lessons The articles and papers collected together in this volume highlight the major themes and developments of interwar military affairs in Europe including the new doctrines of tank warfare air power German Blitzkrieg and Soviet operational art They also demonstrate the important place of the major armed conflicts of the period such as the Russian and Spanish Civil Wars in European history **List and Index of War Department Publications** United States. Zaloga,2015-01-20 The T 26 was the first major Soviet armour program of the 1930s beginning as a license built version of the British Vickers 6 ton export tank Although the T 26 retained the basic Vickers hull and suspension the Red Army began to make extensive changes to the turret and armament starting with the addition of a 45mm tank gun in 1933 The T 26 was built in larger numbers than any other tank prior to World War II Indeed more T 26 tanks were manufactured than the combined tank production of Germany France Britain and the United States in 1931 40 This book surveys the development of the T 26 as well as its combat record in the Spanish Civil War the war in China the border wars with Poland and Finland in 1939 40 and the disastrous battles of 1941 during Operation Barbarossa
