The Transmission of Chinese Medicine Elisabeth Hsu, 1999-11-11 This is one of the first studies of traditional medical education in an Asian country Conducting extensive fieldwork in Kunming the capital of Yunnan Province in the People's Republic of China Elisabeth Hsu became the disciple of a Qigong master a scholarly private practitioner who almost wordlessly conveys esoteric knowledge and techniques attended seminars given by a senior Chinese doctor an acupuncturist and masseur who plunges his followers into the study of arcane medical classics and studied with students at the Yunnan College of Traditional Chinese Medicine where the standardised knowledge of official Chinese medicine is inculcated Dr Hsu compares the theories and practices of these different Chinese medical traditions and shows how the same technical terms may take on different meanings in different contexts This is a fascinating insider's account of traditional medical practices which brings out the way in which the context of instruction shapes knowledge The Spiritual Dimension of Alternative Medicine Ernest M. Valea, 2020-02-20 We often hear that alternative medicine is superior to classical medicine for it treats us holistically both the physical body and the immaterial part of our nature Although such an approach seems desirable it is precisely this aspect that opens the door to spiritual views incompatible with Christianity Many forms of alternative medicine speak of a divine essence we allegedly possess of a vital force that we can manipulate of spiritual beings that can help us and other such views closely related to Eastern religions and New Age thought In their desire to find healing at any price Christians often resort to these methods without realizing the spiritual danger involved For Christians who want to live

consistently with their faith this book is intended to raise awareness of the hidden beliefs of alternative medicine
