ranging from a state of pre illness to an empowered act of good consumer citizenship from physical or moral purification to sustenance and care and from harm reduction to optimization Along the way Derkatch demonstrates that the idea of wellness may promise access to the good life but it serves primarily as a strategy for coping with a devastating and overwhelming present Drawing on scholarship in the rhetoric of health and medicine the health and medical humanities and related fields Derkatch offers a nuanced account of how language belief behavior experience and persuasion collide to produce and promote wellness one of the most compelling and harmful concepts that govern contemporary Western life She explains that wellness has become so pervasive in the United States and Canada because it is an ever moving and thus unachievable goal The concept of wellness entrenches an individualist model of health as a personal responsibility when collectivist approaches would more readily serve the health and well being of whole populations
