A Treatise on the Capitalist Society Xing Yu, 2023-11-07

This book explains the formation and evolution of the capitalist society from the perspective of language and media. It argues that linguistic presentations given by using language serve as a basis for humans to define private property rights, engage in market exchange, establish the wage labor system, exploit science and technology in production, and organize socialized production. It clarifies the reason for the distinction between the rich and the poor in a capitalist society, arguing against Marx's theory of surplus value and asserting that the wage labor system is a cooperative system. It also discusses the relations of social classes and the relations between democracy and dictatorship, as well as the origin of the state from the perspective of language and media. The book will help its readership to deepen their understanding of capitalism.

Social Interaction and Organisational Change Oswald Jones, Steve Conway, Fred Steward, 2001. This book provides a detailed multi-disciplinary analysis of innovation networks in a variety of organisational settings. All the contributors are employed at Aston Business School, which is one of the UK's foremost institutions in terms of both teaching and research. The book illustrates the way in which innovation networks are formed and sustained in a variety of organisational settings: the public sector, public-private collaboration, national policy level, inter-organisational, credit links, as well as the more traditional focus on manufacturing firms. The strength of the network approach is that it encourages detailed analyses of the dyadic links which must be mobilised in the innovation process. At the same time, networks provide a framework for exploring the multiple sources and pluralistic patterns of communication typical of innovative activity. Therefore, in contrast to much of the innovation network research undertaken in recent years, the focus of this book is as much on notions of OC network as method, OCO as on OC network as phenomenon, OCO. Contents: Introduction, Social Interaction and Organisational Change, Micropolitics and Network Mapping, Innovation Management in a Mature Firm, Employing Social Network Mapping to Reveal Tensions Between Informal and Formal Organisation, Organisation: An Economic Perspective on Innovation Networks, Patterns of Networking in the Innovation Process, A Comparative Study of the UK, Germany and Ireland, Shaping Technological Trajectories Through Innovation Networks and Risk Networks, Investigating the Food Sector, Techno-Economic Networks, Technological Transfer via the Teaching Company Scheme, Organisations, Networks and Learning: A Sociological View, The Innovative Capacity of Voluntary and Non-Profit Organisations, Networks and the External Environment, Innovation Through Postmodern Networks, The Case of Ecoprotectors, Realising the Potential of the Network Perspective in Researching Social Interaction and Innovation. Readership: Academics in innovation studies, policy studies, and organisational behaviour theory.

George Herbert Mead and Human Conduct Herbert Blumer, 2004. In this posthumous volume, renowned sociologist Herbert Blumer analyzes George Herbert Mead's position in the study of human conduct. Engaged with Mead's work for over half a century, Blumer explored Mead's ideas for developing the theoretical and methodological position of symbolic interactionism, a term that Blumer would later introduce. Although Blumer focused on the sociological and social

psychological implications of Mead's pragmatism his objective was to explore social processes embodied in and formed through social action Envisioning individual and collective social action as ongoing accomplishments achieved through symbolic interaction Blumer insisted on grounding scholarly knowledge about the human condition in the empirical world of people's experiences Organized and introduced by Thomas J. Morrione a colleague and friend to whom Blumer entrusted his unpublished papers the volume also includes Blumer's correspondence with David L. Miller about Mead's theories and other related correspondence For a greater understanding of both Mead's philosophies and Blumer's this volume will be essential reading for students and teachers of social theory and symbolic interactionism
