Social Traps And The Problem Of Trust:

Social Traps and the Problem of Trust Bo Rothstein, 2005-10-06 A social trap is a situation where individuals groups or organisations are unable to cooperate owing to mutual distrust and lack of social capital even where cooperation would benefit all Examples include civil strife pervasive corruption ethnic discrimination depletion of natural resources and misuse of social insurance systems Much has been written attempting to explain the problem but rather less material is available on how to escape it In this book Bo Rothstein explores how social capital and social trust are generated and what governments can do about it He argues that it is the existence of universal and impartial political institutions together with public policies which enhance social and economic equality that creates social capital By introducing the theory of collective memory into the discussion Rothstein makes an empirical and theoretical claim for how universal institutions can be established Social Traps and the Problem of Trust Bo Rothstein, 2005-10-06 Bo Rothstein explores how social capital and social trust are generated and what governments can do about it A social trap is a situation where individuals groups or organizations are unable to cooperate owing to mutual distrust and lack of social capital even where cooperation would benefit all Examples include civil strife pervasive corruption ethnic discrimination depletion of natural resources and misuse of social insurance systems Much has been written attempting to explain the problem but rather less material is available on how to escape it

Social Traps and Social Trust Michael A. Cowan, 2021-01-07 The articles in this special issue of the New England Journal of Public Policy are unusual in two respects First they reflect the practical wisdom of seasoned actors rather than the theoretical knowledge of academicians The typically unexamined assumption of the academy is that good practice in the world is simply the application of sound theory from the academy It does not take long in the public arena however to discover that leaders there are not applying theory from the academy to the decisions they face Rather they base their interventions on what they have learned about people organizations conflict race and politics in the rough and tumble of living in the world Their working understandings may be valuably leavened by theory but are not guided primarily by it Second the authors were not separate individuals working on isolated issues like children engaged in parallel play but rather partners in a fluid informal collaborative social action network operating in an environment of constantly shifting challenges and possibilities for change The authors are not a collection of Is they are a we They decided pragmatically to connect their power their political and financial and social capital at critical moments to accomplish shared goals The network grew more powerful in the process becoming more than the sum of its organizational parts This volume is ours as was the collective action out of which it emerged Like a choir's songs its articles give voice to a group's experiences Each is a part of a larger whole Whenever I speak about how Hurricane Katrina changed New Orleans an audience member invariably asks Would the changes you described have occurred without a hurricane The simple answer is no but a fuller response is required to do justice to the situation Nature can create temporary vacuums but it cannot fill them The coalition led public meetings action

McNall,2015-12-07 Within and among nations rising levels of social inequality threaten our collective future Currently upwards of 80% of people s life chances are determined by factors over which they have absolutely no control Social inequality threatens the democratic project because it destroys the trust on which governments depend and it gives rise to corrupt political and economic institutions How can we get out of the traps we have created for ourselves We need to reboot capitalism Drawing on diverse examples from a range of countries McNall explains the social economic and ecological traps we have set for ourselves and develops a set of rules of resilience that are necessary conditions for the creation and maintenance of democratic societies and a set of rules essential for creating a sustainable future **Lessons from the Northern Ireland Peace Process**

Timothy J. White,2013 This book incorporates recent research that emphasizes the need for civil society and a grassroots approach to peacebuilding while taking into account a variety of perspectives including neoconservatism and revolutionary analysis The contributions which include the reflections of those involved in the negotiation and implementation of the Good Friday Agreement also provide policy prescriptions for modern conflicts **Allegiance and Identity in a Globalised**

Web-mediated Social Spaces Alexander Ljung,Eric Wahlforss,2008-09-17 As web mediated social spaces become more commonplace on the internet a need arises for understanding classical social phenomena in this new context Trust is one of these phenomena The purpose of this book is to study several aspects of interpersonal trust in web mediated social spaces More specifically this book discusses questions on how predominant social orders space design and representations of user identity affect trust on the individual level **Democratic Deficit** Pippa Norris,2011-02-14 Many fear that democracies are

suffering from a legitimacy crisis This book focuses on democratic deficits reflecting how far the perceived democratic performance of any state diverges from public expectations Pippa Norris examines the symptoms by comparing system support in more than fifty societies worldwide challenging the pervasive claim that most established democracies have experienced a steadily rising tide of political disaffection during the third wave era The book diagnoses the reasons behind the democratic deficit including demand rising public aspirations for democracy information negative news about government and supply the performance and structure of democratic regimes Finally Norris examines the consequences for active citizenship for governance and ultimately for democratization This book provides fresh insights into major issues at the heart of comparative politics public opinion political culture political behavior democratic governance political psychology political communications public policymaking comparative sociology cross national survey analysis and the dynamics of the democratization process

Political Trust and Disenchantment with Politics, 2014-12-04 That the publics of Western democracies are becoming increasingly disenchanted with their political institutions is part of the conventional wisdom in Political Science This trend is often equated with the expectation that all forms of political attachment and participation show similar patterns of decline Based on empirical underpinnings derived from a range of original and sophisticated comparative analyses from Europe and beyond this collection shows that no such universal pattern of decline exists Nor should it be expected given the diversity of reasons that citizens have to place or withdraw trust and to engage in conventional political participation or in protest Contributors are Christoph Arndt Wiebke Breustedt Christina Eder Manfred te Grotenhuis Alexia Katsanidou Rik Linssen Michael P McDonald Ingvill C Mochmann Kenneth Newton Maria Oskarson Suzanne L Parker Glenn R Parker Markus Quandt Peer Scheepers Hans Schmeets Thoralf Stark and Terri L Towner
