Scheibe, 1982 **The Storied Nature of Human Life** Karl E. Scheibe, Frank J. Barrett, 2017-10-23 This book sheds new light on the life and the influence of one of the most significant critical thinkers in psychology of the last century Theodore R Sarbin 1911 2005 In the first section authors provide a comprehensive account of Sarbin s life and career The second section consists in a collection of ten publications from the last two decades of his career The essays cover topics such as the adoption of contextualism as the appropriate world view for psychology the establishment of narrative psychology as a major mode of inquiry and the rejection both mechanism and mentalism as suitable approaches for psychology The book is historically informed and yet focused on the future of psychological theory and practice It will engage researches and scholars in psychology social scientists and philosophers as well general readership interested in exploring Sarbin s theories **Theories of Hypnosis** Steven J. Lynn, Judith W. Rhue, 1991-10-04 It has been said that hypnosis is a collection of techniques in need of a unifying theory James A Hall Hypnosis A Jungian Perspective While the varied substrates of these techniques preclude the formation of any one theory of hypnosis this volume presents a state of the science view of existing theories of hypnosis Written by eminent scholars and researchers this uniquely authoritative resource also provides a wealth of information about the history of hypnosis clinical and research perspectives on hypnosis and the strengths and weaknesses of empirical methods used to address crucial theoretical questions The streamlined organization of the volume facilitates the reader s ability to contrast and compare research findings and concepts across theories In the introductory chapters the editors describe hypnosis paradigms and schools of thought including major points of convergence and divergence as well as a broad vista of different perspectives on the history of hypnosis The theoretical chapters that follow present definitive statements by an international array of eminent scholars who are at the forefront of conceptual advances in the realms of clinical and experimental hypnosis Their contributions written in lively first person narratives explore current thinking about hypnosis and represent important clinical and research traditions that extend beyond the territory of hypnosis to mainstream psychology Providing a thorough discussion of hypnotic phenomena the book tackles tough questions such as whether hypnosis evokes an altered state of consciousness whether hypnotic behavior is involuntary whether hypnotizability is stable trait like and modifiable and whether hypnotic and non hypnotic behavior can be distinguished in meaningful ways The diversity of viewpoints including competitive ones illuminates the debates which have expanded the frontiers of knowledge about hypnosis In the concluding section the editors compare and contrast these theories discuss pertinent research issues and lay out an agenda for future research Given its stellar list of contributors and the unique niche it occupies as the first authoritative survey of its kind THEORIES OF HYPNOSIS is of value to anyone interested in the topic The editors ten years of experience teaching hypnosis

to psychology and medical students has resulted in a book with enormous appeal to students and instructors as well as clinicians and researchers. A wide variety of professionals—academics, clinical psychologists, psychiatrists, social workers, dentists—will find it an authoritative introduction and invaluable reference to this still growing, ever fascinating field.

Narrative Psychology Theodore R. Sarbin, 1986-05-15 This book features essays by the major supporters of the narrative metaphor. They approach the subject from philosophical, religious, anthropological, and historical perspectives as well as from the psychological point of view. Psychologists, psychiatrists, and literary theorists will find the book provocative and a convenient reference source to the narrative approach.

Narrative Identities George Yancy, 2005 The contributors address challenging questions about identity in relation to personality development, language, and socialisation. They demonstrate how their cultural and historical contexts influenced their theoretical approaches to the nature of self and how these ideas in turn shaped how they perceive their personal histories.

Environment and Behavior Studies Irwin Altman, Kathleen Christensen, 2012-12-06 This eleventh volume in the series departs from the pattern of earlier volumes. Some of those volumes addressed research design and policy topics in terms of environmental settings, for example, homes, communities, neighborhoods, and public places. Others focused on environmental users, for example, children and the elderly. The present volume examines the field of environment and behavior studies itself in the form of intellectual histories of some of its most productive and still visible senior participants. In so doing, we hope to provide readers with a grand sweep of the field: its research and design content, methodology, institutions, and past and future trajectories through the experiences and intellectual histories of its participants. Why intellectual histories? Several factors led to the decision to launch this project. For one, 1989 was an anniversary and commemorative year for the Environmental Design Research Association, perhaps the major and most long-standing interdisciplinary organization of environment and behavior researchers and practitioners. Established in 1969, this organization has been the vehicle for generations of researchers and practitioners from many disciplines to come together annually to exchange ideas, present papers, and develop professional and personal relationships. It held its first and twentieth meetings in North Carolina, with the twentieth conference substantially devoted to discussions of the past, present, and future of the field, a taking stock, so to speak. Thus, it seemed appropriate to launch a volume on intellectual histories at this significant juncture in the life of the field.

The Drama of Everyday Life Karl Scheibe, 2002-03-15 Psychologists say the old joke: know everything there is to know about the college sophomore and the white rat. But what about the rest of us, older than the former, bigger than the latter, with lives more labyrinthine than either? In this ambitious book, Karl E. Scheibe aims to take psychology out of its rut and bring it into contact with the complex lives that most people quietly live. Drama, Scheibe reminds us, is no more confined to the theater than religion is to the church or education to the schoolroom. Accordingly, he brings to his reflection on psychology the drama of literature, poetry, philosophy, history, music, and theater. The essence of

drama is transformation the transformation of the quotidian world into something that commands interest and stimulates conversation It is this dramatic transformation that Scheibe seeks in psychology as he pursues a series of suggestive questions such as Why is boredom the central motivational issue of our time Why are eating and sex the biological foundations of all human dramas Why is indifference a natural condition caring a dramatic achievement Why is schizophrenia disappearing Why does gambling have cosmic significance Writing with elegance and passion Scheibe asks us to take note of the self representation performance and scripts of the drama that is our everyday life In doing so he challenges our dispirited senses and awakens psychology to a new realm of dramatic possibility Biographical Dictionary of Psychology Noel Sheehy, Antony J. Chapman, Wendy A. Conroy, 2002 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality
