Social Research On Children And Adolescents Ethical Issues:

Social Research on Children and Adolescents Barbara Stanley, Joan E. Sieber, 1991-10-31 A first in its field this timely volume effectively bridges the gap between the legal requirements that govern research on minors and the research methodology literature in adolescent psychology The editors skillfully bring together the insights of a group of leading researchers and scholars to address and resolve the following issues what theory and research on human development can tell researchers about adolescents vulnerability to several kinds of risk research and how to reduce that vulnerability what the law says about young peoples rights to privacy how the relevant ethical theory or guidelines should apply to minors approaching adulthood under what circumstances parental consent does not protect children s rights and how one explains the research process to a young adult *Social Research on Children and Adolescents* reaches a wide audience from professionals in development psychology family studies and education to researchers in evaluation research methods and sociology to students in the above fields all will undoubtedly benefit from this book *Social Research on Children and Adolescents* is an invaluable resource for researchers who confront questions such as how to assess risks and benefits within a developmental framework what legal constraints and ethical principles guide research practice and how to explain research participation to youth who differ greatly in their comprehension of the enterprise The major strength of this book aside from its effective integration of developmental theory and research ethics is the repeated examination of concrete research problems in light of ethical principles and legal requirements This book will be a useful addition to the library of any social scientist who conducts psychological research with children **Death Studies Ethical Issues in Mental Health**

Research With Children and Adolescents Kimberly Hoagwood, Peter S. Jensen, Celia B. Fisher, 2014-06-03 Studies involving children with mental emotional or behavioral problems or their families have to meet certain standards of research ethics This book contains chapters on the kinds of ethical dilemmas that typically occur in different types of studies of children and then presents 65 real world cases from experts who study children s mental health These experts offer practical suggestions for how to handle these dilemmas Chapters on the perspectives of parents regulators and bioethicists provide additional points of view on these issues Written in down to earth language this book will be useful for professionals who study children for those who train students in research methods and for parents who are thinking about participating in research studies In attempting to bridge the apparent gap between ethics and science the editors close this volume on a note commonly sounded by researchers more research is needed Yet in this area a new kind of research is required The science of scientific ethics must be developed and expanded and better understanding of the determinants and circumstances under which children can comprehend and evaluate risks and benefits is needed Likewise fuller knowledge of the contextual factors affecting children s and families consent to participate in research is essential In particular development of scales to assess children s ability to comprehend risk benefit issues studies of families reactions to research procedures and empirical data on

the impact of various forms of participant reimbursement will advance both science and ethics This volume should spur further research serving as a guide for current investigators participating families institutional review boards and policymakers who shape the research enterprise Social Research on Children and Adolescents Barbara Stanley,1992 The important issues of what theory and research on human development can teach us about adolescents vulnerability how to reduce that vulnerability and under what circumstances parental consent does not protect children s rights are considered in this volume The editors skilfully bridge the gap between those volumes which set out legal requirements that govern research on minors and the research methodology literature on adolescent psychology *Conducting Research with Children and Adolescents* Julie Tinson,2009-06-04 This book is designed as a definitive guide to the sensitive and significant area of researching with children It is based on the key academic concepts in the field and summarises the seminal papers and salient ethics access and engagement issues The SAGE Handbook of Child Research Gary B Melton,Asher Ben-Arieh,Judith Cashmore,Gail S. Ross Leadbeater, Elizabeth Bannister, Cecilia Benoit, Anne Marshall, Mikael Jansson, Ted Riecken, 2006-01-01 Efforts to apply ethical guidelines and regulations to vulnerable populations are often problematic Consequently health and social scientists sometimes shy away from the challenges of research particularly when it means addressing value laden social problems such as sexuality drugs and racism *Ethical Issues in Community Based Research with Children and Youth* is a collection of essays

that describe the uniqueness of community based research outlining several of the ethical concerns that it engenders The contributors examine such issues as the scope of informed consent to multiple stakeholders determining competence to give consent in marginalized populations and managing dual roles as participant researchers The collection suggests that a more collaborative ongoing and discursive approach is needed by researchers and by ethical review boards to ensure that research on sensitive social problems with high risk populations is supported and also conducted with a clear understanding of the highest ethical standards possible
