Convenience Stores as Social Spaces Cosima Werner, 2023-05-30 Liquor tobacco processed food and sugary snacks this is the range of products that are far from healthy available in convenience stores Yet these stores have become people's resource for meeting daily needs in deprived neighborhoods in the United States In her book *Convenience Stores as Social Spaces Trust and Relations in Deprived Neighborhoods in the U S* Cosima Werner explores the contested meanings of these stores and their function as social hubs in a social fabric where poverty violence and social neglect are part of people's daily life Despite the strict security measures around the stores language barriers and cultural differences that make convenience stores appear as the antithesis of social spaces trustful relationships are crucial for residents to access resources such as loans food drinks or information to make ends meet The concepts of trust and mistrust shed light on the fragility of trust within these communities Through ethnographic research conducted in Chicago and Detroit she reveals the unique ways in which these stores are viewed and utilized by residents *Universities as Transformative Social Spaces* Andrea Kölbel, Joanna Pfaff-Czarnecka, Susan Thieme, 2022 Universities are social spaces where diverse personal trajectories connect confront each other and or run parallel to each other This book captures dynamic transformations in the realm of higher education from South Asian perspectives **New Transnational Social Spaces** Ludger Pries, 2013-02-01 Recent terms such as globalisation virtual reality and cyberspace indicate that the traditional notion of the geographic and the social space is changing *New Transnational Social Spaces* illustrates the contemporary relationship between the social and the spatial which has emerged with new communication and transportation technologies alongside the massive transnational movement of people **Multivariate scaling methods and the reconstruction of social spaces** Alice Barth, Felix Leßke, Rebekka Atakan, Manuela Schmidt, Yvonne Scheit, 2023-10-02 Der Sammelband vereint Beiträge von führenden Forscherinnen und Forschern im Bereich statistischer Methoden und deren Anwendung in den Sozialwissenschaften mit einem besonderen Fokus auf sozialen Räumen Multivariate Skalierungsmethoden für kategoriale Daten speziell Korrespondenzanalyse werden verwendet um die wichtigsten Dimensionen aus komplexen Kreuztabellen mit vielen Variablen zu extrahieren und Zusammenhänge in den Daten bildlich darzustellen In diesem Band werden statistische Weiterentwicklungen grundlegende methodologische Überlegungen und empirische Anwendungen multivariater Analysemethoden diskutiert Mehrere Anwendungsbeispiele thematisieren verschiedene Aspekte des Raumes und deren soziologische Bedeutung die Rekonstruktion sozialer Räume mit statistischen Methoden die Illustration räumlicher Beziehungen zwischen Nähe Distanz und Ungleichheit aber auch konkrete Interaktionen in urbanen Räumen Der Band erscheint zur Würdigung der wissenschaftlichen Leistungen von Prof. Jörg Blasius *New Spaces and Old Frontiers* Salma Ahmed Nageeb, 2004-01-01 Salma Nageeb's book provides case studies and analysis of the lives of four Muslim women living in Khartoum the capital of Sudan Nageeb examines how these women negotiate their social space locating their daily struggles within the increasingly

rigid Islamic practice in Sudan The women express resistance and cultural accommodation in different ways while some choose to instrumentalize state and religious rules and rhetoric for their own aims others stretch the boundaries with gentle persistence These case studies provide a unique dimension to Nageeb s important sociological and social anthropological analysis of everyday life in the context of globalization and Islamization

Spaces of Interaction, Places for Experience David Benyon,2014-10-01 Spaces of Interaction Places for Experience is a book about Human Computer Interaction HCI interaction design ID and user experience UX in the age of ubiquitous computing The book explores interaction and experience through the different spaces that contribute to interaction until it arrives at an understanding of the rich and complex places for experience that will be the focus of the next period for interaction design The book begins by looking at the multilayered nature of interaction and UX not just with new technologies but with technologies that are embedded in the world People inhabit a medium or rather many media which allow them to extend themselves physically mentally and emotionally in many directions The medium that people inhabit includes physical and semiotic material that combine to create user experiences People feel more or less present in these media and more or less engaged with the content of the media From this understanding of people in media the book explores some philosophical and practical issues about designing interactions The book journeys through the design of physical space digital space information space conceptual space and social space It explores concepts of space and place digital ecologies information architecture conceptual blending and technology spaces at work and in the home It discusses navigation of spaces and how people explore and find their way through environments Finally the book arrives at the concept of a blended space where the physical and digital are tightly interwoven and people experience the blended space as a whole The design of blended spaces needs to be driven by an understanding of the correspondences between the physical and the digital by an understanding of conceptual blending and by the desire to design at a human scale There is no doubt that HCI and ID are changing The design of microinteractions remains important but there is a bigger picture to consider UX is spread across devices over time and across physical spaces The commingling of the physical and the digital in blended spaces leads to new social spaces and new conceptual spaces UX concerns the navigation of these spaces as much as it concerns the design of buttons and screens for apps By taking a spatial perspective on interaction the book provides new insights into the evolving nature of interaction design

is a strong case today for a specific focus on mental public health and its relation to social and physical environments From a public health perspective we now appreciate the enormous significance of mental distress and illness as causes of disability and impairment Stress and anxiety and other mental illnesses are linked to risks in the environment This book questions how and why the social and physical environment matters for mental health and psychological wellbeing in human populations While putting forward a number of different points of view there is a particular emphasis on ideas and research from health geography which conceptualises space and place in ways that provide a distinctive focus on the interactions between people and their social and physical environment The book begins with an overview of a rich body of theory and research from sociology psychology social epidemiology social psychiatry and neuroscience considering arguments concerning mind body dualism and presenting a conceptual framework for studying how attributes of space and place are associated with human mental wellbeing It goes on to look in detail at how our mental health is associated with material or physical aspects of our environment such as natural and built landscapes with social environments involving social relationships in communities and with symbolic and imagined spaces representing the personal cultural and spiritual meanings of places These relationships are shown to be complex with potential to be beneficial or hazardous for mental health The final chapters of the book consider spaces of care and the implications of space and place for public mental health policy offering a broader view of how mental health might be improved at the population level With boxed case studies of specific research ideas and methods chapter summaries and suggestions for introductory reading this book offers a comprehensive introduction which will be valuable for students of health geography public health sociology and anthropology of health and illness It also provides an interdisciplinary review of the literature by the author and by other writers to frame a discussion of issues that challenge more advanced researchers in these fields

Plug&Play Places Robert Nadler, 2014-10-08 In post industrial societies more and more people earn an income in creative knowledge work a highly

flexible labour market segment that demands a geographically mobile workforce Creative knowledge work is based on an understanding of language culture and symbolic meanings This can best be obtained through local and national embeddedness Yet this necessity for embeddedness stands in contrast to the demand in geographical mobility How is this contradiction solved by individuals What new forms of place attachment does this bring about This book introduces a showcase of 25 multilocal creative knowledge workers who live in different countries at the same time It investigates how continuous mobility becomes part of their lifeworld and how it changes their feelings of belonging and practices of place attachment Applying an innovative methodological mix of social phenomenology hermeneutics and mental mapping this book takes a detailed look at biographies and the role of places in mobile lifeworlds Plug Play Places brings forth the idea that places have to be understood as individual items which are configured and then plugged into the system of the own lifeworld They can be played without great effort once an individual needs to make use of them This new type of place attachment is a form of subjective standardization of place which complements the well known models of objective standardization of places Plug Play Places is relevant for scientists who deal with mobility and its impact on individual lifeworlds with transnational multilocality and with flexibilized labour markets Furthermore the book provides a detailed qualitative perspective which can enrich the explanations of quantitative research in the same field It is an interesting reading also for practitioners engaged in urban planning housing and real estate development Robert Nadler holds a doctoral degree in Urban and Local European Studies from the University of Milan Bicocca He is a researcher at the Leibniz Institute for Regional Geography and published on creative industries multilocality and labour mobility
