The Evolution of Human Sociality Stephen K. Sanderson,2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory

21st Century Sociology: A Reference Handbook Clifton D. Bryant,Dennis L. Peck,2007 Publisher Description

Studying Societies and Cultures Lawrence A. Kuznar,Stephen K. Sanderson,2015-12-03 A thought provoking stimulating volume on the past present and future of cultural materialism that is both laudatory of Harris research strategy and critical of it Paul Shankman University of Colorado One of the most important anthropologists of all time Marvin Harris was influential worldwide as the founder of cultural materialism This book accessibly analyzes Harris s theories and their important legacies today The chapters explore cultural materialism s epistemology and its relation to rational choice theory Darwinian social science and population pressures The authors assess recent attempts to extend and reformulate cultural materialism and highlight cross cultural archaeological and ethnographic applications of cultural materialism today

The Spiral of Capitalism and Socialism Terry Boswell,Christopher K. Chase-Dunn,2000 At the core of this book is the argument that though the word socialism is widely held in disdain in the current discourse about the world s past and its future the idea of socialism as collective rationality and popular democracy is far from dead

Revisiting Institutionalism in Sociology Seth Abrutyn,2013-11-07 There may not be a concept so central to sociology yet so vaguely

defined in its contemporary usages than institution In *Revisiting Institutionalism in Sociology* Abrutyn takes an in depth look at what institutions are by returning to some of the insights of classical theorists like Max Weber and Herbert Spencer the functionalisms of Talcott Parsons and S N Eisenstadt and the more recent evolutionary institutionalisms of Gerhard Lenski and Jonathan Turner Returning to the idea that various levels of social reality shape societies Abrutyn argues that institutions are macro level structural and cultural spheres of action exchange and communication They have emergent properties and dynamics that are not reducible to other levels of social reality Rather than fall back on old functionalist solutions Abrutyn offers an original and synthetic theory of institutions like religion or economy the process by which they become autonomous or distinct cultural spaces that shape the color and texture of action exchange and communication embedded within them and how they gain or lose autonomy by theorizing about institutional entrepreneurship Finally Abrutyn lays bare the inner workings of institutions including their ecology the way structure and culture shape lower levels of social reality and how they develop unique patterns of stratification and inequality founded on their ecology structure and culture Ultimately Abrutyn offers a refreshing take on macrosociology that brings functionalist conflict and cultural sociologies together while painting a new picture of how the seemingly invisible macro world influences the choices humans make and the goals we set

Sociology of Law as the Science of Norms Håkan Hydén, 2021-12-28 This book proposes the study of norms as a method of explaining human choice and behaviour by introducing a new scientific perspective The science of norms may here be broadly understood as a social science which includes elements from both the behavioural and legal sciences It is given that a science of norms is not normative in the sense of prescribing what is right or wrong in various situations Compared with legal science sociology of law has an interest in the operational side of legal rules and regulation This book develops a synthesizing social science approach to better understand societal development in the wake of the increasingly significant digital technology The underlying idea is that norms as expectations today are not primarily related to social expectations emanating from human interactions but come from systems that mankind has created for fulfilling its needs Today the economy via the market and technology via digitization generate stronger and more frequent expectations than the social system By expanding the sociological understanding of norms the book makes comparisons between different parts of society possible and creates a more holistic understanding of contemporary society The book will be of interest to academics and researchers in the areas of sociology of law legal theory philosophy of law sociology and social psychology

The Prospect of Global History James Belich, John Darwin, Margret Frenz, Chris Wickham, 2016-02-11 The Prospect of Global History takes a new approach to the study of global history seeking to apply it rather than advocate it The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones and insists on depth in historical analysis The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history Chapters range from historical sociology to economic history from medieval to modern times from European expansion to constitutional

history and from the United States across South Asia to China
