Knowledge, Values and Educational Policy Harry Daniels, Hugh Lauder, Jill Porter, 2012-07-26 Knowledge Values and Educational Policy focuses on what schools are for and what should be taught in them how learning is possible across boundaries and issues of diversity and equity Policies and practices relating to schools

are also considered Within this volume internationally renowned contributors address a number of fundamental questions designed to take the reader to the heart of current debates around curriculum knowledge transfer equity and social justice and system reform such as What are schools and what are they for What knowledge should schools teach How are learners different from each other and how are groups of learners different from one another in terms of social class gender ethnicity and disability What influence does educational policy have on improving schools What influence does research have on our understanding of education and schooling To encourage reflection many of the chapters also include questions for debate and a guide to further reading Read alongside its companion volume Educational Theories Cultures and Learning readers will be encouraged to consider and think about on some of the key issues facing education and educationists today

Evidence-Based Policy Ray Pawson, 2006-04-07 In this important new book Ray Pawson examines the recent spread of evidence based policy making across the Western world Few major public initiatives are mounted these days in the absence of a sustained attempt to evaluate them Programmes are tried tried and tried again and researched researched and researched again And yet it is often difficult to know which interventions and which inquiries will withstand the test of time The evident solution going by the name of evidence based policy is to take the longer view Rather than relying on one off studies it is wiser to look to the weight of evidence Accordingly it is now widely agreed the most useful data to support policy decisions will be culled from systematic reviews of all the existing research in particular policy domains This is the consensual starting point for Ray Pawson s latest foray into the world of evaluative research But this is social science after all and harmony prevails only in the first chapter Thereafter Pawson presents a devastating critique of the dominant approach to systematic review namely the meta analytic approach as sponsored by the Cochrane and Campbell collaborations In its place is commended an approach that he terms realist synthesis On this vision the real purpose of systematic review is better to understand programme theory so that policies can be properly targeted and developed to counter an ever changing landscape of social problems The book will be essential reading for all those who loved or loathed the arguments developed in Realistic Evaluation Sage 1997 It offers a complete blueprint for research synthesis supported by detailed illustrations and worked examples from across the policy waterfront It will be of especial interest to policy makers practitioners researchers and students working in health education employment social care criminal justice regeneration and welfare
