Tanzania is one of the most biologically diverse nations in the world Traveling from west to east across Tanzania one encounters an incredible array of ecosystems and species Beginning at Lakes Victoria Tanganyika and Nyasa that form much of the western boundary of Tanzania one finds the most diverse and some of the most spectacular concentrations of endemic fish in any of the world s lakes Moving further inland from the lakes one meets the woodlands and plains of Serengeti Ngorongoro Tarangire and Lake Manyara The assemblages and movements of large mammals in these protected areas are unparalleled worldwide Traveling yet further to the east one comes to Mount Kilimanjaro the highest mountain in Africa Mount Kilimanjaro is of sufficient height to not only contain seven major vegetation zones but also maintain permanent glaciers Finally shortly before arriving at the Indian Ocean one encounters the Eastern Arc Mountains a series of isolated and geologically ancient mountains which due to their height and proximity to the Indian Ocean intercept sufficient precipitation to support in many areas moist tropical forest The Eastern Arc Mountains are among the richest sites biologically in all of Africa and harbor unusually high concentrations of endemic species species whose geographic distribution are restricted to these mountains Unfortunately much of Tanzania s biodiversity is threatened by habitat alteration destruction and exploitation The Eastern Arc forests face some of the most severe threats to any of Tanzania s biologically unique sites      **Our Gigantic Zoo** Thomas M. *A Motorcycle on Hell Run* Seth M. Markle, 2017-08-01 Between 1964 and 1974 Tanzania came to be regarded as a model nation and a leading frontline state in the struggle for African liberation on the continent and beyond During this time a number of African American and Caribbean nationalists leftists and pan Africanists traveled to and settled in Tanzania to join the country that many believed to be leading Africa s liberation struggle This historical study examines the political landscape of that crucial moment when African American Caribbean and Tanzanian histories overlapped shedding light on the challenges of creating a new nation and the nature of African American and Caribbean participation in Tanzania s nationalist project In examining the pragmatic partnerships and exchanges between socialist Tanzania and activists and organizations associated with the Black Power movements in the United States and the Caribbean this study argues that the Tanzanian one party government actively engaged with the diaspora and sought to utilize its political cultural labor and intellectual capital to further its national building agenda but on its own terms creating tension within the pan Africanism movement An excellent resource for academics and nonacademics alike this work is the first of its kind revealing the significance of the radical political and social movements of Tanzania and what it means for us today

*Religion at Work in Globalised Traditions* Anders Kaliff, 2014-03-26 Why do traditions disappear How is the disappearance of tradition also a vehicle for social change and re

inventions of practices and new traditions Using case studies from one Sukuma area along the southern shores of Lake Victoria in Tanzania global processes of how religions work in practice are analysed by focusing on rainmaking witchcraft and Christianity Traditionally Sukuma society was culturally and cosmologically structured around the chief the ancestors and rainmaking Everything was dependent upon the rain Rainmaking as a ritual practice has disappeared and ancestral propitiations are declining while at the same time Christianity is spreading and witchcraft and witch killings are increasing Although Christianity as a religion may provide answers and hopes for life after death the religion provides few solutions in the here and now when it comes to poverty and suffering problems and challenges that have to be solved Witchcraft on the other hand does or is believed to do so and the increase in witchcraft is analysed in relation to the impacts of more than a century of globalisation from the missionaries and colonizers onwards With the declining ancestral tradition witchcraft and Christianity as religious practices supplement each other in the ways they are believed to work in providing answers solutions or divine interferences in different realms this world and the Otherworld Offering an approach going beyond structural functionalism on different premises the book's focus on religion at work will facilitate new understandings of how to study religion as it is perceived and believed in practice Yamada: Knowledge, Education and Social Structur, 2023-06-27 In searching for the potential that lies in African societies the chapters of this volume consider relationships between knowledge education and social structure from multiple angles from a macro continental scale to national education systems schools and local communities The themes that cut across the chapters include education as a mode of transmitting values the contrasting effects of school credentials and knowledge for use politics and interactions among people surrounding a school and knowledge acquisition as a subjective process The rich empirical analyses suggest that the subjective commitment of and mutuality among people will make the acquired knowledge a powerful tool for conviviality to realize a stable life even given the turmoil created by rapid institutional and environmental changes that confront African societies *The Statesman's Year-Book 1986-87* J. **Nominal Pluralization and Countability in African Varieties of English** Susanne Mohr, 2021-10-28 This book is the first comprehensive analysis of nominal plural marking its morphosyntax and semantics across different African varieties of English. Mohr explores the rich diversity in the varieties and how different conceptualizations of the number category are realized across different cultures. The investigation of unstandardized noun plurals in Kenyan, Tanzanian, Ghanaian and Nigerian Englishes is based on a mixed methods design drawing on corpus linguistics, acceptability questionnaires and psycholinguistic experiments. In this vein, the book not only contributes to the description of each of these four varieties but also sheds light on standardization processes and language change in New Englishes. Importantly, it is a plea for the triangulation of data and mixed methods approaches in World Englishes research as the combination of these methods grants insight into unforeseen areas of language structures and use. This volume is a useful reference work for students and researchers in World Englishes, varieties of English and African Studies as well as those interested in linguistic anthropology.

*A History of Islamic Societies* Ira M. Lapidus, 2014-10-13 This new edition of one of the most widely used course books on Islamic civilizations around the world has been substantially revised to incorporate the new scholarship and insights of the last twenty-five years. Ira Lapidus' history explores the beginnings and transformations of Islamic civilizations in the Middle East and details Islam's worldwide diffusion. The history is divided into four parts. Part I is a comprehensive account of pre-Islamic late antiquity, the beginnings of Islam, the early Islamic empires and Islamic religious, artistic, legal and intellectual cultures. Part II deals with the construction in the Middle East of Islamic religious communities and states to the fifteenth century. Part III includes the history to the nineteenth century of Islamic North Africa and Spain, the Ottoman, Safavid and Mughal empires and other Islamic societies in Asia and Africa. Part IV accounts for the impact of European commercial and imperial domination on Islamic societies and traces the development of the modern national state system and the simultaneous Islamic revival from the early nineteenth century to the present.

**African Democracy** Thompson, Gardner, 2016-04-17 The concepts of democracy and good governance have been at the centre of criticism of governments all over the world. What democracy entails, however, has never been agreed, most notably on the African continent. African politicians who have been criticised for reigning over undemocratic regimes have insisted that the West judges them by

criteria that don't apply to African circumstances. Is there such a thing as African democracy? Informed and intrigued by two events that happened in different eras in different countries, Gardner Thompson has written an in-depth historical examination of the nature of imported democracy as practised in the East African countries of Uganda where he worked as a young History teacher in the 70s, Kenya and Tanzania. The events were the 1971 Amin capture of power from Milton Obote in Uganda and the post-election violence that rocked Kenya in 2007-2008 pitting then incumbent Mwai Kibaki against his erstwhile colleague Raila Odinga along what many read to be tribal lines. Dividing the book into three sections, Thompson treats democracy in the three former colonies from the perspectives of pre-independence colonialism, the transition to independence and governance since independence. Reflecting indigenous history, the colonial past and evolving culture, flawed but functioning forms of government have emerged in the three states.
