Moschis, 2019-01-31 This book examines consumer behavior using the life course paradigm a multidisciplinary framework for studying people s lives structural contexts and social change It contributes to marketing research by providing new insights into the study of consumer behavior and illustrating how to apply the life course paradigm s concepts and theoretical perspectives to study consumer topics in an innovative way Although a growing number of marketing researchers either implicitly or explicitly subscribe to life course perspectives for studying a variety of consumer behaviors their efforts have been limited due to a lack of theories and methods that would help them study consumers over the lifecycle When studying consumers over their lifespan researchers examine differences in the consumer behaviors of various age groups e g children baby boomers elderly etc or family life stages e g bachelors full nesters empty nesters etc inferring that consumer behavior changes over time or linking consumption behaviors to previous experiences and future expectations Such efforts however have yet to benefit from an interdisciplinary research approach This book fills

this gap in consumer research by informing readers about the differences between some of the most commonly used models for studying consumers over their lifespan and the life course paradigm and providing implications for research public policy and marketing practice Presenting applications of the life course approach in such research topics as decision making maladaptive behaviors e g compulsive buying binge eating consumer well being and cognitive decline this book is beneficial for students scholars professors practitioners and policy makers in consumer behavior consumer research consumer psychology and marketing research *Consumer Culture Theory* Russell W. Belk,Linda Price,Lisa Penaloza,2013-12-06 This volume of Research in Consumer Behavior is made up from a selection of papers from the Eight Consumer Culture Theory Conference and represents the latest research on consumption and consumer culture from scholars around the world

The fashion industry has and continues to make major contributions to our cultural and social environment. It is an industry that responds to our inherent longing for tribal belonging, our socio-economic needs, individual lifestyles, status stratification, and professional apparel requirements. The fashion industry is fast-paced, complex, and ever-changing in response to consumer needs. Throughout the world, vast numbers of people contribute to this industry, each with the shared goal of supplying an end product of a particular price point directed at a target consumer. This second edition of *Historical Dictionary of the Fashion Industry* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 1,400 cross-referenced entries on designers, models, couture houses, significant articles of apparel and fabrics, trade unions, and the international trade organizations. This book is an excellent resource for students, researchers, and anyone wanting to know more about the fashion industry.

Marketing to the Aging Population George P. Moschis, 2022-10-06. This book coaches marketing practitioners and students how to best satisfy the needs of the older consumer population. It first highlights the heterogeneity of the older consumer market, then examines the specific needs of the older consumer. Lastly, the book highlights the most effective ways of reaching and serving older consumer segments for different products and services, such as financial services, food and beverages, healthcare, and pharmaceuticals, and travel, among others. It presents segment- and industry-specific strategies that help marketers develop more refined and targeted micro-marketing strategies and customer relationship management (CRM) systems for building and retaining a large base of older customers. These strategies also help demonstrate how companies can make decisions that increase profitability, not only by satisfying consumer needs and wants but also by creating positive change and improvement in consumer well-being.

Social Structures, Social Capital, and Personal Freedom Peter Lawler, Dale McConkey, 2000-04-30. A variety of social institutions are analyzed. Three chapters cover political/legal issues, two cover religion, three address education, and two examine the macrostructures of the military and the economy. An important collection for scholars and other researchers interested in the communitarian movement, sociology, and political science, particularly for those in public administration.
