An Inculturation Model of the Catholic Marriage Ritual David William Antonio,2002 In An Inculturation Model of the Catholic Marriage Ritual David William Antonio presents a model of how the Catholic Ritual of Marriage may be adapted to the language culture and traditions of a particular people specifically the ilocanos of Northern Luzon in the Philippines Vatican II called for the revision and adaptation of the rite of marriage exhorting local churches to develop their own rites suited to their people s particular customs and traditions The work of preparing a rite of marriage for a particular region cannot be limited to merely translating the typical edition There has to be a thorough examination of both the editio typica and the people s religious and cultural traditions the socio economic and political realities that confront them attending to the positive values expressed therein Only a dialogical process such as this will guarantee a liturgy that is faithful to the Christian tradition and meaningful to a given people An Inculturation Model of the Catholic Marriage Ritual will serve as a model for people of other cultures who have to do similar liturgical preparation and will be important especially to churches whose membership includes people who experienced colonization but never lost the riches of their own cultures in the blending of cultures and beliefs that followed

A Handbook of Philippine Folklore Mellie Leandicho Lopez,2006 The voluminous book provides a range of international theories and methodologies in analytical folklore investigations and a classification scheme based on genre is offered as the system of taxonomy for Philippine traditional materials Lopez counts on the regional folklorists to refine the classification according to the texts of their respective areas The different genres too are explained and examined in another part of Lopez s study The reader will definitely find interesting and useful the illustrative examples for each genre

Children of Different Worlds Beatrice Blyth Whiting,Carolyn P. Edwards,Carolyn Pope Edwards,Carol R. Ember,1988 The culmination of twenty years of research this book is a cross cultural exploration of the ways in which age gender and culture affect the development of social behavior in children The authors and their associates observed children between the ages of two and ten going about their daily lives in communities in Africa India the Philippines Okinawa Mexico and the United States This rich fund of data has enabled them to identify the types of social behavior that are universal and those which differ from one cultural environment to another Whiting and Edwards shed new light on the nature nurture question in analyzing the behavior of young children they focus on the relative contributions of universal physiological maturation and universal social imperatives They point out cross cultural similarities but also note the differences in experience between children who grow up in simple and in complex societies They show that knowledge of the

company children keep and of the proportion of time they spend with various categories of people makes it possible to predict important aspects of their interpersonal behavior An extension and elaboration of the classic *Children of Six Cultures* Harvard 1975 *Children of Different Worlds* will appeal to the same audience developmental psychologists social psychologists anthropologists and educators and is sure to be equally influential *Four Years Old in an Urban Community* John Newson, Elizabeth Newson, 2017-07-12 Although psychologists by training John and Elizabeth Newson have more aptly been described as pioneers in social ecology they work from the conviction that the causes and the consequences of child rearing attitudes can fruitfully be investigated only in the framework of the total social environment in which they occur This book continues their analysis of child rearing in an English urban setting ***The Moral Economy of the Peasant*** James C. Scott, 1977-09-10 James C Scott places the critical problem of the peasant household subsistence at the center of this study The fear of food shortages he argues persuasively explains many otherwise puzzling technical social and moral arrangements in peasant society such as resistance to innovation the desire to own land even at some cost in terms of income relationships with other people and relationships with institutions including the state Once the centrality of the subsistence problem is recognized its effects on notions of economic and political justice can also be seen Scott draws from the history of agrarian society in lower Burma and Vietnam to show how the transformations of the colonial era systematically violated the peasants moral economy and created a situation of potential rebellion and revolution Demonstrating keen insights into the behavior of people in other cultures and a rare ability to generalize soundly from case studies Scott offers a different perspective on peasant behavior that will be of interest particularly to political scientists anthropologists sociologists and Southeast Asianists The book is extraordinarily original and valuable and will have a very broad appeal I think the central thesis is correct and compelling Clifford Geertz In this major work Scott views peasants as political and moral actors defending their values as well as their individual security making his book vital to an understanding of peasant politics Library Journal

Historical Social Psychology (Psychology Revivals) Kenneth Gergen, Mary Gergen, 2014-01-27 The vast majority of research in social psychology focuses on momentary events an attitude is changed dissonance is reduced a cognition is primed and so on Little attention is paid to the unfolding of events over time to social life as an ongoing process in which events are related in various ways as life unfolds Originally published in 1984 Historical Social Psychology opens a space for theory and research in which temporal process is central Contributors to this broad ranging work provide a rich range of perspectives from the theoretical to the methodological from micro sequences to the life span and from contemporary history to the long dur e Together these authors set the stage for a major shift in the focus of social psychological inquiry

Transformations Helen Schwartzman, 2012-12-06 Writing a book about play leads to wondering In writing this book I wondered first if it would be taken seriously and then if it might be too serious Eventually I realized that these concerns were cast in terms of the major dichotomy that I wished to question that is the very pervasive and very inaccurate division that Western cultures make between play and seriousness or play and work fantasy and reality and so forth The study of play provides researchers with a special arena for re thinking this opposition and in this book an attempt is made to do this by reviewing and evaluating studies of children s transformations their play in relation to the history of anthropologists transformations their theories While studying play I have wondered in the company of many individuals I would first like to thank my husband John Schwartzman for acting as both my strongest supporter and as an anthropological colleague my severest critic His sense of nonsense is always novel as well as instructive I am also very grateful to Linda Barbera Stein for her Sherlock Holmes style help in locating obscure references checking and cross checking information and patience and persistence in the face of what at times appeared to be bibliographic chaos I also owe special thanks to my teachers of anthropology Paul J Bohannon Johannes Fabian Edward T Hall and Roy Wagner whose various orientations have directly and indirectly influenced the approach presented in this book

available for Medical Anthropology **The Nurture Assumption** Judith Rich Harris, 2011-10-25 A NEW YORK TIMES NOTABLE BOOK How much credit do parents deserve when their children turn out well? How much blame when they turn out badly? Judith Rich Harris has a message that will change parents' lives. The nurture assumption, the belief that what makes children turn out the way they do, aside from their genes, is the way their parents bring them up, is nothing more than a cultural myth. This electrifying book explodes some of our unquestioned beliefs about children and parents and gives us a radically new view of childhood. Harris looks with a fresh eye at the real lives of real children to show that it is what they experience outside the home, in the company of their peers, that matters most. Parents don't socialize children; children socialize children. With eloquence and humor, Judith Harris explains why parents have little power to determine the sort of people their children will become. **The Nurture Assumption** is an important and entertaining work that brings together insights from psychology, sociology, anthropology, primatology, and evolutionary biology to offer a startling new view of who we are and how we got that way.

Cebuano Sorcery Richard W. Lieban, 2023-11-15 **Cebuano Sorcery** Malign Magic in the Philippines offers an in-depth exploration of persistent sorcery beliefs and practices in the Cebuano region of the Philippines, shedding light on their cultural significance amidst centuries of social transformation. Drawing on extensive fieldwork conducted in Negros and Cebu City, the book examines the enduring presence of *barang* sorcery, a feared magical practice involving the use of enchanted insects to harm others. By comparing contemporary cases with historical accounts dating back to the Spanish colonial era, the author reveals striking continuities in these beliefs despite the region's exposure to colonialism, modernization, and the rise of Western medicine. Through 111 case studies, the book investigates how sorcery remains a critical lens through which Cebuanos interpret illness and social conflict. This study not only documents the mechanisms and cultural context of Cebuano sorcery but also delves into its dynamic interaction with modernity. It examines the competition between folk and modern medicine, highlighting how traditional practices persist or adapt in urban and rural settings affected by varying degrees of social change. By focusing on the intersection of medical and social factors, the book provides valuable insights into the role of magical beliefs in shaping human perception and behavior across cultures. It is both a compelling ethnographic account of Cebuano sorcery and a significant contribution to the broader understanding of witchcraft and social conflict in developing societies. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Essays in Philosophy of Education iii , **Diversity and Complexity in Feminist Therapy** Maria P. P. Root, Laura Brown, 2014-06-03 **Diversity and Complexity in Feminist Therapy** is an unprecedented new book that focuses on incorporating, appreciating, and building on the differences among women. Multicultural in content and authorship, this

intellectually and emotionally stimulating volume breaks new ground in the development of theory in feminist therapy. Chapters run the gamut from highly theoretical works that challenge us to examine the validity of current male Western psychological theories to the very personal story of one woman's struggle with oppression and her respect for the differences between her experiences of oppression and other women's experiences. You will also find provocative creative and diverse chapters that address women's development as it relates to their ethnic religious socioeconomic sexual and age differences. The one pervasive truth throughout this unique book is that feminist therapy must be based on the experiences of all women in order to be truly representative of women in the United States. Diversity and Complexity in Feminist Therapy is a first step in moving feminist therapy to a more inclusive global perspective and back into a more political and activist stance against the oppression that we all want to defeat. More introduces feminist therapists and other interested feminist behavioral scientists to an anti racist and multicultural perspective on feminist therapy both at the level of theory and practice. This volume is unique in several ways. One of them is in the emphasis on the development of a theoretical model for feminist therapy. While much has been and continues to be written about applications of feminist therapy, theory building has been neglected. This volume focuses on the necessity of taking an explicitly anti racist and multicultural perspective for such theory to be truly feminist. A second unique aspect is the very close and detailed attention to feminist therapy practice with people of color both within and outside of US culture. While this issue has been addressed in a piecemeal fashion elsewhere or has been addressed primarily by activists challenging racism within feminist therapy, this volume offers the work of feminist therapists themselves applying feminist analyses and principles. Volume is also unique in the degree to which its authors represent a diverse group within feminist therapy. This volume is not only multicultural in its intent but also in its creation.
