Taskcentered Social Work

Mark Doel, Peter E. Marsh

Taskcentered Social Work:

Task-Centred Social Work Mark Doel, Peter Marsh, 2017-03-02 Task centred practice is a forward thinking goal orientated approach to social work. It is a practice based approach built on research which reflects the new mood being developed in the social work field and it has now been successfully used in a wide variety of settings and circumstances. The theme of Task Centred Social Work is partnership exploring the principles on which task centred practice is based while offering clear and practical guidance for work whether with people who seek help with social problems or with those who are involuntary clients. The book describes in detail the sequence of work to help clients move from present problems to future goals. This is illustrated by a case study which runs through the chapters and uses an imaginative recording style. Checklists and bibliographies are also used to aid understanding. The authors respond to the model's critics and explore both the scope and the limitations of the task centred practice. Social professionals whether working in practice or in training settings will find this book an invaluable aid to the development of successful social practice work.

Generalist Practice Eleanor Reardon Tolson, William James Reid, Charles D. Garvin, 2003 This basic textbook seeks to establish a task centered methodology a structured short term problem solving approach applicable across systems at five levels of practice: the individual, the family, the group, organizations and communities. The second edition offers more information on systems theories and includes case studies with each chapter. Checklists are provided for each level of practice along with questions for consideration and practice exercises to help students monitor their understanding and skill development.

The Task-centred Book Peter Marsh, Mark Doel, 2005 Peter Marsh and Mark Doel's new book is a radical departure from traditional literature on social work methods. The main reference point is the voice of practitioners, service users and carers as researched and developed by the authors over twenty years.

Educational Supervision in Social Work Jonathan Caspi, William James Reid, 2002 Through its emphasis on meeting learning objectives the Task Centered Model for Educational Supervision (TCS) accommodates new models of field instruction in social work teaching accountability in fieldwork supervision and instructing novice social workers in how to be self initiating and evaluative. The application of the TCS model in various real life education and practice environments is illustrated by detailed case vignettes throughout the book.

Solution-oriented Social Work Practice Gilbert J. Greene, Mo Yee Lee, 2011 Too often in practice there is a tendency to pathologize clients requiring a diagnosis as part of the helping relationship. Suppose however that most of the client problems that social workers encounter have more to do with the vagaries of life and not with what clients are doing wrong. This powerful idea is the philosophy behind the strengths based approaches to social work. This groundbreaking practice handbook takes this concept one step

further combining the different strengths based approaches into an overarching model of solution oriented social work for greater impact The strengths perspective emphasizes client strengths goal setting and a shared definition of positive outcome Solution focused therapy approaches ongoing problems when they have temporarily abated amplifying exceptions as solutions This natural but rarely explored pairing is one component in the challenging and effective practice framework presented here by the authors two seasoned practitioners with over 50 years of combined experience By integrating the most useful aspects of the major approaches a step by step plan for action emerges With this text in hand you will Integrate elements from the strengths perspective solution focused therapy narrative therapy and the strategic therapy of the Mental Research Institute the MRI approach into an effective and eclectic framework Build and practice your skills using case examples transcripts and practical advice Equip yourself with the tools you need to emphasize clients strengths Challenge the diagnosis first medical model of behavioral health care Collaborate with clients to get past thinking first order change and more to acting outside the box second order change Learn to work with a wide variety of clients including individuals groups and families involuntary clients clients with severe mental illness and clients in crisis For any student or practitioner interested in working with clients towards collaborative and empowering change this is the essential text

Task-centered Social Work with Young Offenders Lynn Kallies,1997 *Problems, Tasks and Outcomes* E. Matilda Goldberg,Jane Gibbons,Ian Sinclair,2021-11-07 In the 1980s although most social workers organised their time and described their work in terms of cases research studies had cast serious doubts on the efficacy of working in this way As a result there had been growing anxiety about what social workers do what they ought to do and the training they needed Task centred casework was an approach to social work which proposed a solution to some aspects of this dilemma Growing out of the surprising results of an American research study it broke free from the traditional psycho analytic approach to casework It aimed at clarity of purpose a concentration on the clients perceptions of the problems openness about clients and helpers intentions and agreement about what is to be done and achieved within a specified time Originally published in 1985 this book brings together three British studies that accompanied and in some respects pioneered the introduction of task centred casework into the United Kingdom The studies describe and evaluate task centred casework with social services department clients with young people on probation and with men and women referred to hospital after poisoning themselves The research suggests what task centred casework can and cannot achieve describes how clients experience it and seeks to define the skills it requires The studies also provide some reasons why many previous studies of social work have failed to find evidence for social work effectiveness The book uses much case material to illustrate methods of task centred casework and its outcomes as seen by clients social workers and an independent outsider It should still be of interest to social workers teachers of social work and social work students More generally it will be welcomed by all those who are interested in building social work on a surer basis than anecdote and fashion

Theories of Social Work with Groups Robert W.

Roberts, Helen Northen, 1976 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government's responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Tokyo District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi's investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

Social Work Treatment Francis J. Turner, 2017-03-23 First published in 1974 Social Work Treatment remains the most popular and trusted compendium of theories available to social work students and practitioners It explores the full range of theoretical approaches that drive social work treatment and knowledge development from psychoanalysis to crisis intervention A treasure trove of practice knowledge the text equips professionals with a broad array of theoretical approaches each of which shine a spotlight on a different aspect of the human condition Emphasizing the importance of a broad based theoretical approach to practice it helps readers avoid the pitfalls of becoming overly identified with a narrow focus that limits their understanding of clients and their contexts This sweeping overview of the field untangles the increasingly complex problems ideologies and value sets that define contemporary social work practice The result is an essential A to Z reference that charts the full range of theoretical approaches available to social workers regardless of their setting or specialty

Social Work Theory and Ethics Dorothee Hölscher, Richard Hugman, Donna McAuliffe, 2023-03-17 This reference work addresses the ideas that shape social work Much of the social work literature addresses questions of theory and ethics separately so that the body of thought that is represented in social work scholarship and research creates a distinction between them However the differences between these categories of thought can be somewhat arbitrary This volume goes beyond this simple separation of categories Although it recognises that questions of theory and ethics may be addressed distinctly the connections between them can be made evident and drawn out by analysing them alongside each other Social work s use and development of theory can be understood in two complementary ways First theory from the social sciences and other disciplines can be applied for social work second considered systematic examinations of practice have enabled theory to be developed out of social work These different approaches are usually referred to as theory for practice and practice theory The advancement of social work theory occurs often through the interplay between these two dimensions through research and scholarship in the field Similarly social work ethics draw on principles and concepts that

have their roots in philosophical inquiry and also involve applied analysis in the particular issues with which social workers engage and their practices in doing so In this way social work contributes to wider debates through advancement of its own perspectives and knowledge gained through practice Social Work Theory and Ethics Ideas in Practice offers a unique approach by bringing together the complementary dimensions of theory with each other and at the same time with ethical research and scholarship It presents an analysis of the ideas of social work in a way that enables connections between them to be identified and explored This reference is essential reading for social work practitioners researchers policy makers academics and students as well as an invaluable resource for universities research institutes government ministries and departments major non governmental organisations and professional associations of social work *Task Strategies* William James Reid, 1992 An in depth examination of intervention strategies suitable for common problems encountered by clinical social workers difficulties of families and children anxiety depression alcohol abuse inadequate resources and psychosocial problems associated with mental and physical illness
