Feathertop and snowfields are found throughout the northeastern Australian Alps from June to September. Hemming in the land are 1 800 km 1 116 mi of coastlines along the Bass Strait and the Southern Ocean with Melbourne and Geelong fronting the central cut inland to Port Phillip Bay. This is a cool state akin to the Pacific Northwest or the lower New England states of the U S with warm summers but chilling wet winters. Some regions do dip below freezing namely the northeastern mountains while the Gippsland highlands in the east and the western Otway Ranges see more rain than anywhere else. Skip a couple hours south or west and you'll hit the arid Mallee region and the Little Desert and Big Desert national park areas. Farmlands fill in the gaps where orchards and vineyards are filled with apples, grapes, oranges and other citrus fruits. Main crops are grains and vegetables, the fields fronting huge dairy farms or sheep and cattle ranches. Tasmania is offshore from Victoria. The name Tasmania is one of the world's most intriguing and it rightfully sounds such as one of the most fascinating places on earth. And yes it's a heck of a journey to reach this offshore Australian state but once you're here if you're adventurous you won't want to leave. Indeed the island state of Tasmania is ripe for adventure. A heart shaped mountainous landmass 298 km 185 mi southeast of the main Australian continent it's covered with forests threaded with rivers and edged by wild rugged beaches and bays. Its wilderness comprises an international Heritage Site of its own filled with some of the world's oldest and most unusual plants, animals that are found nowhere else on earth, rock formations that span every geological era and among the longest underground tunnels ever found. The capital of Hobart where almost half the island's residents live is tucked into the southeastern edge and the sleepy northern ferry town of Devonport brings in visitors from the mainland. No one ventures far though which leaves the majority of the island open to exploring and free of crowds even at the loveliest of national wonders such as Tasman National Park in the southeast, Freycinet National Park in the east and Franklin Gordon Wild Rivers National Park in the west.

To the convicts arriving in Van Diemen's Land it must have felt as though they'd been sent to the very ends of the earth. In *Tasmania's Convicts* Alison Alexander tells the history of the men and women transported to what became one of Britain's most notorious convict colonies. Following the lives of dozens of convicts and their families she uncovers stories of success, failure and everything in between. While some suffered harsh conditions, most served their time and were freed becoming ordinary and peaceful citizens. Yet over the decades a terrible stigma became associated with the convicts and they and the whole colony went to extraordinary lengths to hide it. The majority of Tasmanians today have convict ancestry whether they know it or not. While the public stigma of its convict past has given way to a contemporary fascination with colonial history, Alison Alexander debates whether the convict past lingers deep in the psyche of white Tasmania.
