The Taste Experience Xena Mindhurst, AI, 2025-02-12 The Taste Experience explores the fascinating science behind how we perceive flavor impacting our food choices health and overall well being It delves into how taste buds function as detectors transmitting signals to the brain to create complex flavor profiles Interestingly genetics play a role leading to supertasters who are more sensitive to certain tastes The book examines the journey of taste from initial contact with receptor cells to the brain s processing centers highlighting the roles of the thalamus and cortex It reveals how taste integrates with other senses like smell and texture to shape our holistic experience of flavor The influence of culture and personal experiences on taste preferences is also discussed Using insights from sensory biology neuroscience and food science the book presents data from various studies to support its arguments Progressing across chapters it offers readers a complete overview of the field perfect for students food enthusiasts and anyone curious about the science of taste **Taste of Control** René Alexander D. set of rhetorical strategies Gephardt argues that British writers envisioned their country simultaneously as distinct from the Continent and as a part of Europe anticipating the contradictory British discourse around European integration that involves both fear that the European super state will violate British sovereignty and a desire to play a more central role in the European Union

Women, travel and identity Emma Robinson-Tomsett, 2016-05-16 The years between 1870 and 1940 are often considered a golden age of travel as larger and evermore sumptuous ships and trains were built including the Orient Express Blue Train Lusitania and Normandie journeying abroad became and remains today synonymous with chic splendour and luxury Utilising women s diaries and letters art advertising fiction and etiquette guides this book considers the journey s impact upon understandings of female identity definitions of femininity modernity glamour class travel tourism leisure and sexual opportunity and threat during this period It explores women s relationship with train and ship technology cultural understandings of the journey public expectations of women journeyers how women journeyed in practice their use of journey space sociability with both Western and Other non Western journeyers experience of love sex and danger during the journey and how women fashioned a journeyer identity which fused their existing domestic identities with new journey identities such as the journey chronicler The journey is revealed to be an experience of sociability as much as mobility dominated by ideas of respectability and reputation class power vision and observation and home as well as the foreign and new

Pathologies of Travel , 2016-08-22 The essays in this volume which range across Europe America and Africa and from the 18th to the 20th centuries argue that the experience of travel and the business of representing that experience involved an obligatory engagement with the disturbing perception that travel s pleasures were inseparable from its dangers and ennui Despite the confidence of some medical authorities in their recommendations of the therapeutic benefits to be derived from change of air as a way of restoring a state of health such opinions failed to establish a consensus either amongst those who followed such peripatetic prescriptions or amongst the medical professions in general Mad doctors and climatologists alike were forced to adopt an essentially partisan stance in arguing their case for such recommendations and were confronted by rival practitioners who could marshal counter case histories which demonstrated diametrically opposed conclusions concerning the advisability of travel To this extent the history of travel and its pathologies is a particularly revealing instance of the way medical thinking was dependent on localised studies which might do more to challenge the universal applicability of generally accepted theories than they did to confirm their diagnostic reliability The essays collected here not only contribute to our understanding of the conception and application of a variety of medical ideas showing how they depended on beliefs about climate and corporeal constitution as well as often inconsistent data or r cits culled from travellers and geographically dispersed case histories but also open up illuminatingly complex perspectives on the uncertainties and dangers of the phenomenon of modern travel

Politics, Identity, and Mobility in Travel Writing Miguel A. Cabañas, Jeanne Dubino, Veronica Salles-Reese, Gary Totten, 2015-06-26 This collection examines the intersections

between the personal and the political in travel writing and the dialectic between mobility and stasis through an analysis of specific cases across geographical and historical boundaries The authors explore the various ways in which travel texts represent actual political conditions and thus engage in discussions about national transnational and global citizenship how they propose real world political interventions in the places where the traveler goes what tone they take toward political or socio political violence and how they intersect with political debates Travel writing can be viewed as political in a purely instrumental sense but as this volume also demonstrates travel writing s reception and ideological interventions also transform personal and cultural realities This book thus examines the ways in which politics material effects inform and intersect with personal experience in travel texts and engage with travel s dialectic of mobility and stasis In spite of globalization and efforts to eradicate the colonial vision in travel writing and in travel writing criticism this vision persists in various and complex ways While the travelogue can be a space of discursive and direct oppression these essays suggest that the travelogue is also a narrative space in which the traveler employs the genre to assert authority over his or her experiences of mobility This book will be an important contribution for interdisciplinary scholars with interests in travel writing studies global and transnational studies women s studies multicultural studies the social sciences and history

The Experience of Idling in Victorian Travel Texts, 1850-1901 Heidi Liedke, 2018-08-02 This book brings together theories of spatiality and mobility with a study of travel writing in the Victorian period to suggest that idleness is an important but neglected condition of subjectivity in that era Contrary to familiar stereotypes of the Victorians as characterized by speed work and mechanized travel this books asserts a counter narrative in which certain writers embraced idleness in travel as a radical means to re subjectification and the assertion of a late Romantic sensibility Attentive to the historical and literary continuities between Romantic and Victorian the book reconstructs the Victorian discourse on idleness It draws on an interdisciplinary range of theorists and brings together a fresh selection of accounts viewed through the lens of cultural studies as well as accounts of publication history and author biography Travel texts from different genres by writers such as Anna Mary Howitt Jerome K Jerome and George Gissing are brought together as representing the different facets of the spectrum of idleness in the Victorian context
