**A Study of the Metamorphic Rocks of Karema and Kungwe Bay, Western Tanganyika** John Sutton (Geologist), J. Watson, T. C. James, 1954 *A Study of the Metamorphic Rocks of Karema and Kungwe Bay, Western Tanganyika* John Sutton, 1954 Precambrian Geology Alan M. Goodwin, 2016-02-06 The main goal of this book is to provide a modern comprehensive statement on the Earth's Precambrian crust. It uses geographic and tectonic location, lithostratigraphy, geochronology and petrogenesis as a basis for considering Precambrian coastal evolution including the role of plate tectonics. Detailed consideration is given to the endogenic and exogenic processes which formed the continental crust and also to its subsequent secular evolution across Precambrian time. An essential reference volume for every Precambrian geologist.

*Plate Tectonics, Ophiolites, and Societal Significance of Geology* John Wakabayashi, Yildirim Dilek, 2021-09-24 This volume honors Eldridge Moores, one of the most accomplished geologists of his generation. The volume starts with a summary of Moores' achievements along with personal dedications and memories from people who knew him. Leading off the volume's 12 chapters of original scientific contributions is Moores' last published paper that presents an example of the Historical Contingency concept which suggested that earlier subduction history may result in supra-subduction zone geochemical signatures for some magmas formed in non-subduction environments. Other chapters highlight the societal significance of geology, the petrogenesis of ophiolites, subduction zone processes, orogenic belt evolution and other topics covering the globe and intersecting with Moores' interests and influences.
